Mr. Devansh Jain, Executive Director of the company stated that “On expected lines, the continuation of the temporary downturn of the Indian Wind Power market impacted our Q2 results. We see the wind industry to be in the last phase of transition to a complete auction based regime. We expect normalisation, from an order inflow perspective, to commence from Q3 onwards, and execution to pickup from Q4 onwards. We are heartened by our win of 250MW in the SECI-2 auction taking our total auction based order book to 550MW. From a near term perspective, we look forward to upcoming SECI auctions, 500MW Gujarat state auctions and PSU orders for scaling our order book. We believe that our inherent cost-competitive advantage places us in an ideal position to benefit from the auction based market regime.”

ABOUT INOX WIND:
