- Eicher Motors' (EIM) cons. revenue grew 3% YoY (+9.7% QoQ) to INR16.3b (v/s est INR16.8b). EBITDA margin stood at 7.3% (v/s est 8.7%) as standalone margin declined 340bp QoQ on higher other expenditure and staff cost. PAT (after minority) declined 14.8% YoY (+10.3% QoQ) to INR723m (est INR666m). Higher other income and lower tax rate led to higher-than-estimated PAT.
- Royal Enfield's margins at 11.5% (v/s est 15.4%) were impacted due to higher staff and other cost. While staff cost increased due to higher hiring for new plant, other expenditure rose due to Thunderbird model launch (one-time) and higher power & fuel cost.
- Despite demand slowdown, margins for CV business improved by 50bp QoQ (-340bp YoY) to 6.3% (est 6.6%) aided by better cost management.
- EIM indicated that given the expansion mode, on a quarterly basis there might be few aberrations at margin levels. Royal Enfield's demand remains strong, with 6-8 months waiting, despite sharp increase in production.

Valuation and view

- With several projects commencing in CY13-14 and driving 27% sales CAGR and 34% EBITDA CAGR over CY12-15E, EIM is at an inflection point. Motorcycle business will benefit from capacity expansion, new launches and network expansion. CV subsidiary will benefit from commencement of MDEP and ramp-up in HCVs.
- We marginally lower by 0.7%/0.4%/0.2% CY13E/CY14E/CY15E EPS factoring margin pressure on Royal Enfield's business due to higher power & fuel cost, partially offset by an upgrade in volumes.
- The stock trades at 22.2x/15.3x/11.3x CY13E/CY14E/CY15E EPS of INR120/174.8/236.2 respectively. Maintain **Buy** with a two-year target price of INR3,820 (CY15E SOTP).

Standalone performance (Royal Enfield): Strong revenue growth but sharp rise in other expenditure impacts operational performance

- Royal Enfield's (S/A) revenues grew 73% YoY (+7.5% QoQ) to INR2.97b led by volume growth of 68% YoY (+6.4% QoQ) and realization increase of 2.8% YoY (+1% QoQ).
- For CY12, Royal Enfield volumes increased by 52%, helped through de-bottlenecking in existing plant. Despite a sharp increase in production, Royal Enfield continues to enjoy an average waiting period of 6-8 months.
- While RM cost was largely stable QoQ, staff cost increased by 80bp (-70bp YoY) to 8%, due to increased hiring for the new plant.
- However, other expenditure increased sharply by 300bp QoQ (160bp YoY) to 16.4%. This impacted Royal Enfield margins at 11.5% (v/s est 15.4%). Other expenditure increased due to Thunderbird model launch (non-recurring) and higher power & fuel cost, driven by power shortage and increase in diesel prices. Management indicated that with the new plant becoming operational, power & fuel cost is likely to come down from 4Q levels.
- ■ Other income stood much lower than our estimate at INR106m (v/s est INR510m) as the company would recognize dividend income from CV subsidiary on receipt basis (as per revised Schedule VI). In line with the earlier practice, other income would have been higher by INR408m; however, this being an inter-company transaction, gets offset at the consolidated level.
- The board recommended a dividend of INR20/share (200%).
- With the new plant becoming operational, management expects to sell over 150,000 units in CY13.
- The new plant has ability to upgrade to higher capacity at much cheaper cost and quickly as it already has land and necessary infrastructure (including paint shop) in place.
- New launches and dealership expansion together with higher production capacity would drive strong volume growth for next few years.
- Given its leadership position, cult brand equity and minimal competition, Royal Enfield is well-positioned to benefit from increasing trend of lifestyle biking. Capacity expansion (new plant to start in 1QCY13), new launches (Thunderbird 500 and Café Racer) and network expansion to drive 25%/29% volume/EBITDA CAGR over CY12-15E.

Royal Enfield volume momentum remains strong

However, higher other expenditure impacts margins

CV business (VECV): Margins improve sequentially despite higher discounting pressure in CV industry

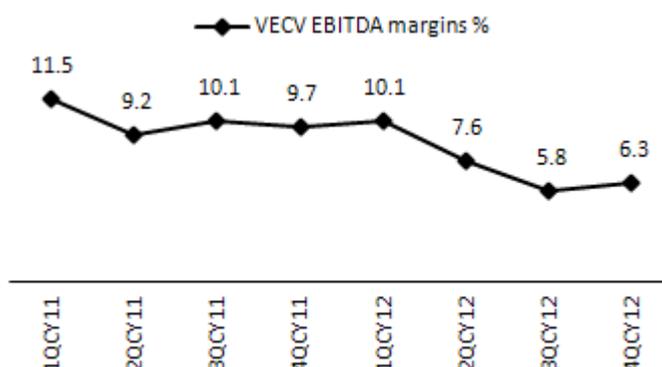

- CV volumes (VECV) declined by 8% YoY (+8.7% QoQ) in line with the weakness in overall CV industry. Realizations improved by 1.8% YoY (+0.6% QoQ) to INR1,115,023/unit.
- Revenues declined by 5.5% YoY (+10.2% QoQ) to INR13.3b (v/s est INR13.3b).
- Despite pressure on demand and consequent higher discounting in the CV industry, margins for the CV business improved by 50bp QoQ (-340bp YoY) to 6.3% (v/s est 6.6%). Better cost management helped in sequential improvement in margins.
- Despite EBITDA being lower than estimate at INR837m (v/s INR871m), higher other income at INR166m (v/s est INR47m) and lower tax rate at 10.9% (v/s 25.4%) led to PAT being higher than estimate at INR711m (INR546m).
- Management indicated that RM cost remained stable over the last few quarters and expects it to remain so over the near term.
- Launch of new range of CVs (developed with Volvo inputs) will commence from CY13-end across the entire range of products. While the new range would be much better in terms of performance, fuel efficiency, reliability etc, it would not be very expensive than the current offerings.
- Medium Duty Engine Project (MDEP) will commence from CY13-end (trial runs started). Given engines would be supplied to existing products, management does not foresee any demand related issues despite a slowdown in Europe.
- Currently, more than 50% of Eicher's 250 dealers are selling the HCV range. Over the next 2-3 years, dealership count would increase by 25-30 annually, with HCV penetration increasing at dealerships as well.
- New paint shop at Pithampur plant is capable of 100,000 vehicles. Company indicated that most of the large capex items pertaining to capacity expansion have already being incurred.

- VECV incurred capex of INR7bn in CY12. This had an impact on consolidated cash levels.
- Higher R&D spend led to lower tax rate. EIM expects tax rate to remain low in CY13 as well.

CV volumes under pressure due to slowdown

Margin improves sequentially despite weak demand

Eicher Motors: an investment profile

Company description

Promoted by the Delhi-based Vikram Lal Group, Eicher Motors (Bloomberg: EIM) is a diversified engineering company. It is engaged in the business of high end motorcycles (350cc & above) under the brand 'Royal Enfield', and commercial vehicles (CVs), automotive gears and components, and engineering solutions through its subsidiary, Volvo Eicher Commercial Vehicles (VECV).

To become a full-fledged CV player, EIM entered into a 50:50 joint venture with AB Volvo, Sweden in July 2008 and formed Volvo Eicher Commercial Vehicles (VECV).

Key investment arguments

- With several of its projects to commence in CY13-14, driving 27% sales CAGR and 34% EBITDA CAGR over CY12-15, Eicher Motors (EIM) is at an inflection point.
- Its motorcycle business will benefit from capacity expansion (new plant to start in 1QCY13), new launches (Thunderbird 500 and Café Racer), and network expansion.
- CV subsidiary, Volvo Eicher Commercial Vehicles (VECV), will benefit from the commencement of the Medium Duty Engine Project (MDEP) and ramp-up in HCVs.

13 February 2013

Key investments risks

- Sustained weakness in the CV Industry
- Increasing competition in the CV industry could impact ramp-up of HCV segment.

Recent developments

- Has recently launched Thunderbird motorcycle model. Royal Enfield continues to enjoy 6-8months waiting period despite sharp increase in supplies.

Valuation and view

- The stock trades at 22.2x/15.3x/11.3x CY13E/CY14E/CY15E EPS of INR120/174.8/236.2 respectively.
- Maintain **Buy** with a two-year target price of INR3,820 (CY15E SOTP).

Sector view

- Demand drivers for Royal Enfield are in place, driven by increasing trend of lifestyle biking and minimal competition.
- The Indian CV industry is likely to evolve giving new players opportunity to challenge the incumbents. VECV is better placed among new entrants, given the marriage of Volvo's technological strength with Eicher's local market expertise.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report. The research analysts, strategists, or research associates principally responsible for preparation of MOST research receive compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors and firm revenues.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOST & its group companies to registration or licensing requirements within such jurisdictions.

For U.K.

This report is intended for distribution only to persons having professional experience in matters relating to investments as described in Article 19 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (referred to as "investment professionals"). This document must not be acted on or relied on by persons who are not investment professionals. Any investment or investment activity to which this document relates is only available to investment professionals and will be engaged in only with such persons.

For U.S.

Motilal Oswal Securities Limited (MOSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOSL, including the products and services described herein are not available to or intended for U.S. persons.

This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.
