Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles.

"These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said. India has already issued a formal notice at the World Trade Organization (WTO) signalling its intention to impose retaliatory tariffs on US goods in response to the earlier steel tariffs. "With Trump now doubling the tariffs, it remains to be seen whether India will carry out the retaliation by increasing tariffs on certain US exports within a month," Srivastava said. Canada's Chamber of Commerce quickly denounced the tariff hike as "antithetical to North American economic security". "Unwinding the efficient, competitive and reliable cross-border supply chains like

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy. Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Pride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years.

The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD. Traxn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Ek Saath—The Earth Foundation (2020), founded by Pragma Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife. The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neerja Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said.

Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

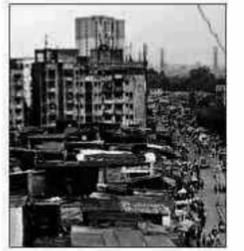

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Niranjan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skilling, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations — Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils — palm, soybean and sunflower consumption of around 25 million tonne (MT).

consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds — soybean and groundnut aimed at boosting output. "Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November – April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy.

Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Ride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxcn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife.

The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neeraj Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said.

Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Nirajan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

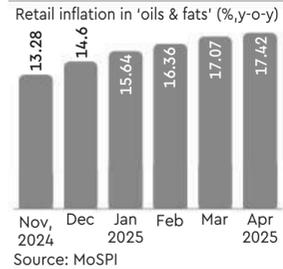

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skillings, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SHARP RISE

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations—Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils—palm, soybean and sunflower consumption of around 25 million tonnes (MT).

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November to April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

consumers," Sudhakar Desai, president, IVPA said. With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production. However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds—soybean and groundnut aimed at boosting output. "Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November to April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy.

Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Pride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piralal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife. The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neerja Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said.

Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

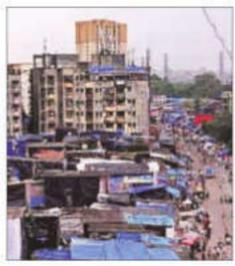

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Niranjan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

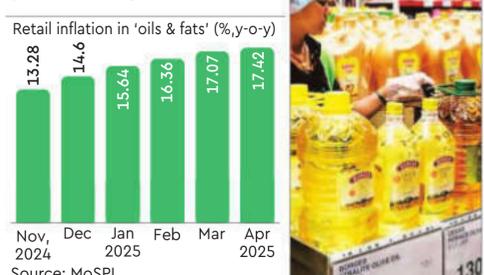

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skilling, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SHARP RISE

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations—Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils—palm, soybean and sunflower consumption of around 25 million tonnes (MT).

consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds—soybean and groundnut aimed at boosting output.

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November–April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Institute (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy.

Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Ride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxcn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife.

The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neeraj Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said.

Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Nirajan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skill, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SHARP RISE

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations — Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils — palm, soybean and sunflower consumption of around 25 million tonnes (MT).

consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds — soybean and groundnut aimed at boosting output.

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November - April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures. The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off. Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy. Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

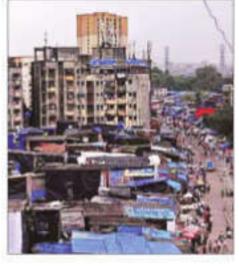

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore. Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Ride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD. Traxcn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic. Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife. The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neeraj Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change. Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation. Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Nirajan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document. Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said. India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal. "Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said. Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered. "I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said. "There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?" Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period. The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024. Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth. Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%. FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases. In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skilling, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations — Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils — palm, soybean and sunflower consumption of around 25 million tonnes (MT). "This move will not just strengthen the domestic refining capacities of Indian refiners but also ensure fair price to oilseed farmers and a fair price to the consumers," Sudhakar Desai, president, IVPA said. With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production. However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds — soybean and groundnut aimed at boosting output. "Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November – April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said. India has already issued a formal notice at the World Trade Organization (WTO) signalling its intention to impose retaliatory tariffs on US goods in response to the earlier steel tariffs. "With Trump now doubling the tariffs, it remains to be seen whether India will carry out the retaliation by increasing tariffs on certain US exports within a month," Srivastava said. Canada's Chamber of Commerce quickly denounced the tariff hike as "antithetical to North American economic security". "Unwinding the efficient, competitive and reliable cross-border supply chains like

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures. The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off. Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy. Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore. Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Ride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD. Traxcn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic. Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife. The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Nirajan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document. Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said. India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal. "Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said. Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period. The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024. Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth. Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%. FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases. In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Cut in import duty on crude cooking oil to boost local processing

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations — Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils — palm, soybean and sunflower consumption of around 25 million tonne (MT). "This move will not just strengthen the domestic refining capacities of Indian refiners but also ensure fair price to oilseed farmers and a fair price to the consumers," Sudhakar Desai, president, IVPA said. With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production. However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds — soybean and groundnut aimed at boosting output. "Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November – April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Institute (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy.

Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Ride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxcn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife.

The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neeraj Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said.

Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Nirajan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

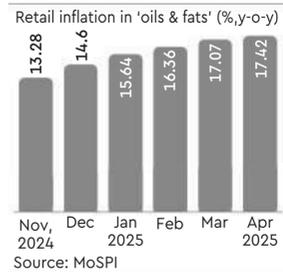

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skill, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SHARP RISE

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations—Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils—palm, soybean and sunflower consumption of around 25 million tonnes (MT).

consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds—soybean and groundnut aimed at boosting output.

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November to April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said.

In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

India has already issued a formal notice at the World Trade Organization (WTO) signalling its intention to impose retaliatory tariffs on US goods in response to the earlier steel tariffs. "With Trump now doubling the tariffs, it remains to be seen whether India will carry out the retaliation by increasing tariffs on certain US exports within a month," Srivastava said. Canada's Chamber of Commerce quickly denounced the tariff hike as "antithetical to North American economic security". "Unwinding the efficient, competitive and reliable cross-border supply chains like

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy.

Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Pride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piremal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragma Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife.

The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neerja Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said. Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

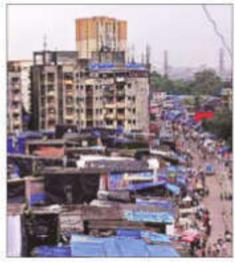

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Niranjan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skilling, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SHARP RISE

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations—Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils—palm, soybean and sunflower consumption of around 25 million tonne (MT).

consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds—soybean and groundnut aimed at boosting output.

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November - April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said.

In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

India has already issued a formal notice at the World Trade Organization (WTO) signalling its intention to impose retaliatory tariffs on US goods in response to the earlier steel tariffs. "With Trump now doubling the tariffs, it remains to be seen whether India will carry out the retaliation by increasing tariffs on certain US exports within a month," Srivastava said. Canada's Chamber of Commerce quickly denounced the tariff hike as "antithetical to North American economic security". "Unwinding the efficient, competitive and reliable cross-border supply chains like

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy.

Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Pride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piremal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife.

The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neerja Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said. Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Niranjan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skill, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SHARP RISE

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations—Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils—palm, soybean and sunflower consumption of around 25 million tonnes (MT).

consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds—soybean and groundnut aimed at boosting output.

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November–April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

"This move will not just strengthen the domestic refining capacities of Indian refiners but also ensure fair price to oilseed farmers and a fair price to the

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said. In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures. The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off. Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy. Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

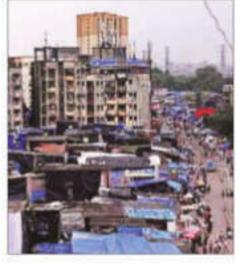

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore. Some of the niche areas where families are leveraging their personal and professional influence to drive impact include The Ride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD. Traxcn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic. Ek Saath—The Earth Foundation (2020), founded by Pragna Kapoor, drives environmental sustainability through awareness and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife. The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neerja Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change. Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation. Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Nirajan Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document. Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th", he said. India's Director General of Air Operations, Air Marshal AK Bharti, had told a press confer-

ence earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal. "Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said. Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered. "I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said. "There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added. "During this operation, I found

both sides displaying a lot of rationality in their thoughts as well as actions. So why should we assume that in the nuclear domain there will be irrationality on someone else's part?" Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period. The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024. Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-

on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth. Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%. FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases. In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skilling, and you lift the tempo and the spirit of the nation," she said. "If you lift everyone out of poverty, give

them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SANDIP DAS
New Delhi, May 31

consumers," Sudhakar Desai, president, IVPA said.

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations — Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 1.65% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils — palm, soybean and sunflower consumption of around 25 million tonne (MT).

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production. However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds — soybean and groundnut aimed at boosting output. "Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November – April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.

Steel tariffs to double: Trump

THE DOUBLING OF steel and aluminium levies intensifies Trump's global trade war and came just hours after he accused China of violating an agreement with the US to mutually roll back tariffs and trade restrictions for critical minerals. Think tank Global Trade Research Initiative (GTRI) said on Saturday the announcement to double tariffs on imported steel and aluminium will impact Indian exporters, as it would hurt their profitability. For India, the consequences are direct, GTRI said.

"In 2024-25, India exported \$4.56 billion worth of iron, steel, and aluminium products to the US, with key categories, including \$587.5 million in iron and steel, \$3.1 billion in articles of iron or steel, and \$860 million in aluminium and related articles. "These exports are now exposed to sharply higher US tariffs, threatening the profitability of Indian producers and exporters," GTRI founder Ajay Srivastava said.

India has already issued a formal notice at the World Trade Organization (WTO) signalling its intention to impose retaliatory tariffs on US goods in response to the earlier steel tariffs. "With Trump now doubling the tariffs, it remains to be seen whether India will carry out the retaliation by increasing tariffs on certain US exports within a month," Srivastava said. Canada's Chamber of Commerce quickly denounced the tariff hike as "antithetical to North American economic security." "Unwinding the efficient, competitive and reliable cross-border supply chains like

we have in steel and aluminium comes at a great cost to both countries," Candace Laing, president of the chamber, said in a statement. Australia's centre-left government also condemned the tariff increase as "unjustified and not the act of a friend". The European Commission said it "strongly" regrets an announced increase of US tariffs on steel imports and that the EU is prepared to impose countermeasures.

The US is the world's largest steel importer, excluding the EU, with a total of 26.2 million tonnes of imported steel in 2024. As a result, the new tariffs will likely increase steel prices across the board, hitting industry and consumers alike. Steel and aluminium tariffs were among the earliest put into effect by Trump when he returned to office in January. Tariffs of 25% on most steel and aluminium imported to the US went into effect in March, and he had briefly threatened a 50% levy on Canadian steel but later backed off.

Under the so-called Section 232 national security authority, import taxes include both raw metals and derivative products such as stainless steel sinks, gas ranges, AC evaporator coils, horseshoes, aluminium frying pans and steel door hinges.

Climate, gender push to philanthropy

"BUT TODAY'S GIVING landscape is being reshaped by families, where women, Inter-gen and Now-gen givers, along with an emerging cohort of professionals, are channelling funds into newer focus areas," added Nundy. Sectors like renewable energy, climate-smart agriculture, and inclusive disaster planning are other areas that urgently need support. "The 29% funding on climate action remains a drop in the ocean compared to the \$2.5 trillion needed by India by 2030 for mitigation and adaptation. In India alone, the social sector faces an annual funding gap of \$170 billion. Philanthropy must now move beyond grants, embracing catalytic tools like impact investing and blended finance," said Naina Subberwal Batra, CEO, AVPN, the largest network of social investors in Asia, comprising over 600 funders and resource providers across 33 markets. As per the India Philanthropy Report 2025, India's social sector funding has grown at a steady rate of about 13% over the past five years and is estimated to have reached about ₹25 lakh

crore (8.3% of GDP) in FY2024. Public spending grew about 13% annually over the past five years, reaching approximately ₹23 lakh crore (7.9% of GDP) in FY2024. By FY 2029, it is projected to increase to about ₹43 lakh crore (9.1% of GDP). Private spending rose 7% from FY 2023 to FY2024, reaching about ₹131,000 crore.

Some of the niche areas where families are leveraging their personal and professional influence to drive impact include the Pride Fund (2025), India's first dedicated LGBTQIA+ philanthropy fund supporting queer-led organisations, backed by the Keshav Suri Foundation (KSF) in Delhi, Godrej Industries Group (GIG) in Mumbai, and Radhika Piramal, executive director of VIP Industries, which has committed an annual ₹2 crore for the next three years. The Anita Dongre Foundation (2015) founded by fashion designer Anita Dongre promotes

sustainability, animal welfare and women's empowerment by supporting rural artisans, advocating for ethical fashion, and funding wildlife conservation through initiatives like REWILD.

Traxn data states the foundation generated a revenue of ₹30 lakh for FY2022. It also established a medical fund of ₹1.5 crore in 2020 to support the health needs of self-employed vendors and artisans during the Covid pandemic.

Ek Saath—The Earth Foundation (2020), founded by Pragma Kapoor, drives environmental sustainability through awareness

and action initiatives, including tree planting, plastic waste reduction, and steps to restore ecosystems and protect wildlife. The Heritage Project (2018) founded by Radha Goenka, director, RPG Foundation, uplifts communities and spaces around heritage sites, fostering awareness and preservation. The Aditya Birla Education Trust (ABET),

founded by chairperson Neerja Birla, joins as a core member of the Impact Action Council, a strategic collective of leading organisations and philanthropists under the Philanthropy Asia Alliance (PAA), to drive meaningful social change.

Among the top philanthropists, Azim Premji, the founder of Wipro, has donated approximately around ₹1.76 lakh crore to education, healthcare, ecology, and disaster response through the Azim Premji Foundation. Recently, Premji committed to giving ₹2,250 crore over three years to help more girls complete their college education. "The basic purpose is to allow girl children to complete their higher education," said Anurag Behar, CEO of Azim Premji Foundation.

Post-Covid, mental health emerges as a growing need within health. "Urgent crisis areas and natural disasters have immense power to galvanise philanthropic funding. Covid was a recent example of this," said Aakanksha Gulati, CEO, ACT Capital Foundation.

sectors like renewable energy, and inclusive disaster planning are some areas that need support

Chief of Defence Staff admits loss of aircraft

THE INTERVIEW WAS taken on the sidelines of the Shangri-La Dialogue security forum in Singapore. "So we rectified tactics and then went back on the 7th, 8th and 10th in large numbers to hit air bases deep inside Pakistan, penetrated all their air defences with impunity, carried out precision strikes." The Indian Air Force "flew all types of aircraft with all types of ordinances on the 10th," he said.

India's Director General of Air Operations, Air Marshal AK Bharti, had told a press conference earlier in the month that "losses are a part of combat" and that India had downed some Pakistani jets. Islamabad has denied it suffered any losses of planes but has acknowledged its air bases suffered some hits, although losses were minimal.

"Most of the strikes were delivered with pinpoint accuracy, some even to a metre," Chauhan said.

Chauhan, and Pakistan's Chairman of the Joint Chiefs of Staff, General Sahir Shamshad Mirza, have both said there was

no danger at any time during the conflict that nuclear weapons were considered.

"I think there's a lot of space before that nuclear threshold is crossed, a lot of signalling before that, I think nothing like that happened," Chauhan said.

"There's a lot of space for conventional operations which has been created, and this will be the new norm." "It's my personal view that the most rational people are people in uniform when conflict takes place," he added.

"During this operation, I found both sides displaying a lot of rationality in their thoughts as well as actions. Sowhy should we assume that in the nuclear domain there will be irrationality on someone else's part?"

Chauhan also said although Pakistan is closely allied with China, there was no sign of any actual help from Beijing. "While this was unfolding from (April) 22nd onwards, we didn't find any unusual activity in the operational or tactical depth of our northern borders, and things were generally all right."

Dharavi 2.0

THESE RANGE FROM large city parks to smaller community playgrounds, which will strengthen ecological resilience and enhance quality of life of residents. Niranj Hiranandani, founder and managing director of Hiranandani Group, told FE: "The plan will certainly improve the quality of life of Dharavi residents. The face of Mumbai will change." The plan also proposes a waterfront development and Dharavi promenade—a linear open space to make Mithi river's edge accessible. "The promenade shall be a place for people to come and enjoy walks along the Mithi river. This will potentially be the longest waterfront in the city after Marine Drive," said the plan document.

Sanjay Dutt, managing director and CEO, Tata Realty & Infrastructure, told FE: "The amenities will enhance the value for developers as they will be able to attract people relating to a better lifestyle. It will be the first planned township of over 300 acres in the city."

Also, a hospital network will be set up in Dharavi, besides polyclinics, first-aid centres and diagnostic facilities. Under the live-and-work concept, new structures will be designed to accommodate heavy industrial machinery and equipment wherever such need arises. Besides, all industrial and commercial units will be given a choice to lease out commercial spaces which the SPV (NMDPL) would build. The plan also proposes to set up places of worship for all religions and faiths.

May auto sales dip 4%

THE THREE-WHEELER SEGMENT posted marginal growth of less than 1%, with sales increasing to 99,700 units compared to 99,154 units in the year-ago period.

The electric vehicle (EV) segment maintained its YoY growth in May, recording a 16.12% increase in sales. A total of 1,63,341 EV units were sold in May 2025, compared to 1,40,666 units in May 2024.

Intensifying competition and the increased availability of products from legacy players boosted EV sales, particularly in the two-wheeler segment. In April, the auto industry posted a modest year-on-year (YoY) growth of 3% in overall retail sales, as per FADA. All categories, except commercial vehicles (CVs), registered positive growth.

Two-wheelers (2W) grew by 2.25%, three-wheelers (3W) by 24.5%, and passenger vehicles (PVs) by 1.5%, while CVs saw a decline of 1%.

FADA had earlier projected that two-wheeler sales would benefit from marriage season demand and post-harvest purchases.

In the PV segment, it expected sales to remain steady but subdued, as buyers await new model launches and face high financing costs.

Govt prioritising lower denomination notes: FM

"ONCE YOU HAVE wealth, you give dignity of labour, you provide for education, you provide for skillings, and you lift everyone out of poverty, give them employment, give them a certain standard of living and give them access to fundamental basic necessities, they are above where they were before, and the country's production levels also increase," she said.

Cut in import duty on crude cooking oil to boost local processing

SANDIP DAS
New Delhi, May 31

THE GOVERNMENT'S MOVE to cut basic custom duty on crude palm, soybean and sunflower oils to 10% from 20% will restrict import of refined oils and boost domestic processing, industry associations—Solvent Extractors Association of India (SEA) and Indian Vegetable Oil Producers' Association (IVPA) have stated. "This is a win-win situation for veg oil refiners as well as consumers, as local price will go down due to lower duty on crude oils," BV Mehta, executive director, SEA, said. Following the announcement of import duties on Friday, the effective import duty, including basic custom duty and cess, on these three oils is reduced to 16.5% from 27.5% earlier. Sources said the reduction in duty was because of a sharp rise in prices of edible oils in the recent months, while retail inflation in 'oils and fats' category was highest in the food basket at 17.42% in May. However, the basic custom duty on refined oils remains unchanged at 32.5%. India imports around 57% of its edible oils—palm, soybean and sunflower consumption of around 25 million tonne (MT).

"This move will not just strengthen the domestic refining capacities of Indian refiners but also ensure fair price to oilseed farmers and a fair price to the consumers," Sudhakar Desai, president, IVPA said.

With a sharp rise in imports of refined palm oil in the past six months, both industry associations have been urging the government to increase the duty difference between crude cooking oils and refined edible oils. Last September, the government had raised import duties on crude oils to 27.5% from 5.5%, while duties on refined edible oil rose to 35.75% from 13.75% aimed at boosting domestic production.

However, Soybean Processor Association of India (SOPA) has questioned the government's move to reduce import duties after significantly increasing the minimum support price of kharif oilseeds—soybean and groundnut aimed at boosting output.

"Duty reduction on edible oils is a step against local crushing and farmers. It helps the import lobby at the cost of industry, and will be a huge setback for the goal of self-sufficiency in edible oils," DN Pathak, executive director, SOPA, said. India imported 15.96 MT of edible oils during the 2023-24 oil year (November to October) valued at ₹1.32 lakh crore. In the first six months of the oil year (November—April), cooking oil imports declined by 8% to 6.5 MT on year, the SEA has stated. India imports crude palm oils from Malaysia and Indonesia while soybean and sunflower oils are imported by Argentina, Brazil, Russia and Ukraine.
