The company needed a robust, cost-efficient infrastructure to reliably and securely connect a rapidly growing network of smart-connected thermostats and other IoT devices.

The Solution - Built for availability, security, and optimization

CT helped EnerAllies to move from a proprietary IoT system and infrastructure to a cloud platform. The solution also makes use of the advanced Machine Learning tool sets, which enables the application of algorithms and deep learning from pattern detection. Using the AI and ML solutions, CT developed a self-learning diagnostic platform that monitors on-premise equipment so customers can be notified of impending issues.

The system built by CT includes comprehensive security capabilities, including end-to-end encryption and multilevel security for cloud services.

“By using CT as our trusted strategic services partner, we are confident that we can give our clients a high-performance, secure, and reliable solution that can scale when they need it. By utilizing CT’s Cloud, IoT and ML resources we are able to accelerate time to market for enhancing our automation and predictive capabilities”, said Rob Keil, CEO and Co-founder of EnerAllies.

“EnerAllies’ use of advanced analytics powered by Machine Learning provides customers with an early warning of equipment failure so they can avoid catastrophic outages and reduce repair costs,” said Nitin Tyagi, Vice President - Enterprise Solutions at CT.

“EnerAllies is a leader in the transformation to smart, automated facilities for multi-site, small-box enterprises – an under-served market with a \$10B+ global market opportunity. It is performing extremely well and is on its path to transform the energy sector. We continue to partner with EnerAllies and remain committed to work with them towards achieving their technological and strategic roadmap,” said Aashish Kalra, Chairman of CT.

About Cambridge Technology

[Cambridge Technology \(CT\)](#) is a leading global technology company transforming organizations into “AI-first” leaders. CT is enabling its customers to create AI solutions that transform their businesses; by helping solve the world’s complex and most interesting business challenges with AI. CT gives organizations unparalleled access to cutting-edge technology by bringing together the best-in-industry using its years of expertise in building solutions for some of the world’s largest and most innovative enterprises; leveraging Big Data, Cloud & Machine Learning experience. CT’s products and services address all the transformational AI needs of an organization — from strategic workshops to implementation of transformative business solutions through its AI as a Service (AIaaS). CT’s expertise across multiple domains makes it the preferred choice for organizations seeking an AI Partner to innovate and leapfrog the market. CT is assessed at Maturity Level 5 for CMMI v1.3 with ISO 27001:2013 certification.
