Kindly take the above on your records.

Thanking you,

Yours faithfully,
For **Himachal Futuristic Communications Limited**

(Manoj Baid)
Vice President (Corporate) &
Company Secretary

Encl.:a/a

Vanu is the only company that designs and optimizes products for the unique needs of rural markets and also runs rural networks using its own software radio technology. Vanu uses its first-hand experience as a mobile network operator to develop solutions that permit network operators to profitably deliver connectivity to people in the world's most remote areas.

We believe connectivity is essential for communities because, in today's world if you are not connected, you will be left behind. Vanu is committed to ensuring no community is left behind.

About Vanu (www.vanu.com):

Vanu provides products and services that make it possible for network operators to profitably deliver connectivity to the world's unconnected, underserved rural markets. Vanu's solutions combine technology and business model innovation to reduce the total cost of ownership of wireless networks. Today over one billion people in the world lack cellular coverage and half the world does not access the internet. This adversely affects the health, safety, education and well-being of hundreds of thousands of rural communities. By enabling network operators to profit from serving these markets, we can improve the lives of billions of people.

About Himachal Futuristic Communications Ltd (www.hfcl.com):

HFCL is a leading telecom infrastructure developer, system integrator and manufacturer of high-end telecom equipment and optical fiber cables, having its manufacturing facilities at Solan, Goa and Chennai.

HFCL provides single window solution for telecom and OFC projects; offering design, equipment supply, installation, system integration, operation and maintenance services. As a solutions expert in telecommunication and related infrastructure domain, the Company is now leveraging its inherent strengths in addressing complex needs of emerging sectors, such as Defence, Homeland Security, Railway Communication and Signaling and also Smart City Projects.
