HAESL selects HCLTech to transform aviation maintenance operations

HONG KONG and NOIDA, India, Feb 04, 2026 — [HCLTech](#), a leading global technology company, today announced that it has been selected by Hong Kong Aero Engine Services Limited ([HAESL](#)) to transform its maintenance, repair and overhaul (MRO) operations. HCLTech will deploy its [iMRO/4 asset management solution](#), integrated with SAP S/4HANA, as HAESL's Maintenance Execution System (MES) in Hong Kong.

This collaboration will streamline HAESL's maintenance, repair and overhaul (MRO) processes, leading to increased efficiency and scalability. It will also enable real-time data visibility, allowing for faster decision-making, while enhancing resource utilization and ensuring compliance with global standards.

"Our customers depend on transparent progress and consistent quality during every shop visit. By integrating iMRO/4 with SAP S/4HANA, we will enhance end-to-end traceability and provide a single view of the workflow from induction to release. This reduces barriers and improves execution efficiency. Partnering with HCLTech marks a significant step in our transformation, creating a scalable digital foundation that supports operational excellence and long-term growth," said Ravinder Bedi, General Manager of Finance & Administration, overseeing the CFO functions including IT, HAESL.

"Our partnership with HAESL sets a new benchmark for digital excellence in aviation," said Sandeep Sarkar, Senior Vice President, ASEAN, HCLTech. "By combining HCLTech's aviation industry expertise with HAESL's world-class maintenance capabilities, we are transforming its engine MRO operations for real-time visibility and greater efficiency."

HCLTech's iMRO/4 integrates maintenance with enterprise processes like finance and material planning, reducing turnaround times and costs while ensuring compliance. For more information on HCLTech iMRO/4, visit: <https://www.hcltech.com/sap-enterprise-asset-management-imro>

About HCLTech

[HCLTech](#) is a global technology company, home to more than 226,300 people across 60 countries, delivering industry-leading capabilities centered around AI, digital, engineering, cloud and software, powered by a broad portfolio of technology services and products.
