SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider each of the following risk factors, uncertainties, and all other information described in this Letter of Offer, in conjunction with ‘Industry Overview’, ‘Business Overview’, ‘Financial Statements’, ‘Management’s Discussion and Analysis of Financial Condition and Results of Operations’, and ‘Key Industry Regulations and Policies’ beginning on pages 58, 67, 84, 122, and 144 respectively in this Letter of Offer, before making an investment in our Equity Shares.

The risks described in this section are those that we consider to be the most significant and material to our business, financial condition, results of operations, and cash flows as of the date of this Letter of Offer. We have described the risks and uncertainties that we currently believe to be material, but the risks set out in this section may not be exhaustive, and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future. If any or some combination of the following risks, or other risks that are not currently known or believed to be adverse, occur, our business, financial condition, and results of operations could suffer, and the trading price and the value of your investment in, our Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision with respect to this Issue, you must rely on your examination of our Company and the terms of this Issue, including the merits and risks involved. You should consult your tax, financial, and legal advisors about the consequences of an investment in our Equity Shares and its impact on you.

In making an investment decision, prospective investors must rely on their own examinations of us and the terms of the Offer, including the merits and risks involved. Prospective investors should consult their tax, financial and legal advisors about the consequences they could encounter in investing in the Equity Shares.

This Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from such forward-looking statements because of certain factors, including the considerations described below and elsewhere in this Letter of Offer.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context otherwise requires, in this section, reference to ‘we’, ‘us’, and ‘our’ refers to our Company.

INTERNAL RISK FACTOR

- 1. The Registered Office of our Company is located/ carried on land parcels that are not owned by us and are held by us on a leasehold/ rental basis. In the event we lose or are unable to renew such leasehold rights, our business, results of operations, financial condition and cash flows may be adversely affected.**

As of the date of this Letter of Offer, our Registered Office of our Company is held on a leasehold/Rental basis. Set out in the table below are details of the address of our Registered Office, taken on lease/Rental:

Sr. No.	Particulars of Property	Address	Lessee	Lessor	Rental (₹ in Lakhs)	Validity of Agreement
1	Registered Office of our company	A-207, Infinity Tower, Corporate Road, Prahalad Nagar, Satellite, Jodhpur Char Rasta, Ahmedabad, Ahmadabad City, Gujarat, India, 380015	Franklin Industries Limited	Thakkar Ranjanbhai Pravinbhai	₹0.23 Lakhs p.m.	11 months and 29 days beginning from 15 th Jan, 2025, further extended with mutual consent

We cannot assure you that we will be able to renew our leases on commercially acceptable terms, or at all. In the event that we are required to vacate the aforesaid leased premises, we would be required to make alternative arrangements and we cannot assure that the new arrangements will be on commercially acceptable terms. Further, since the registered office of our Company is taken on lease, any negative set-back could materially adversely affect our business, results of operations, financial condition, cash flows and prospects. If we are required to relocate our business operations, we may suffer a disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, results of operations, financial condition and cash flows.

2. ***Our insurance coverage does not adequately protect us against losses (including damages or loss caused to the Products), and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.***

Our insurance policies, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption, losses in transit, natural disasters etc. because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

3. ***We do not maintain long-term contracts with our third-party suppliers, and our business may be adversely affected by a shortfall in supply, or increase in price of materials.***

Our company is engaged into the business of trading of agricultural commodities, for further details, see chapter “Our Business” page 67 of this letter of offer. We do not have any long-term supply contracts with any of our specific suppliers with respect to our material requirements and typically place orders with them in advance of our anticipated requirements. All our products manufactured by third party manufacturers and we don’t have any control on the manufacturing process and quality and hygiene. So, the products sold by us may be subject to deficiencies and inferior quality. Due to absence of any long-term supply contracts we have to purchase the products at the prevailing pricing which may be affected by price rise of raw materials, labour costs, transportation costs and manufacturing expenses which are passed on to us by way of increased prices. Due to this our margins may be affected adversely. Any significant change in the cost structure or disruption in supply may affect the pricing and supply of products. If we are not able to increase our product prices to offset increased material costs, or if unit volume sales are significantly reduced, it could have an adverse impact on our profitability. This may adversely affect our business and financial performance.

4. ***Our Company has not entered into any long-term contracts with our distributors/customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability.***

We have not entered into any fixed contracts with our distributors/customers and we cater to them on an order-by-order basis. As a result, our distributors/customers can terminate their relationships with us without any prior notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company’s distributors/customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company’s distributors/customers are dependent on factors such as the customer satisfaction, quality consistency, fluctuation in demand for our Company’s products and customer’s inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products, and personal interaction by the top management with the distributors/customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

5. ***Franklin Industries Limited's agricultural commodity trading business is subject to several risks associated with its supply chain. The company sources various agricultural commodities such as wheat, rice, maize, vegetables and fruits and other agricultural products from different regions, and any disruption in the supply chain could have a significant impact on its operations and financial performance.***

One of the most significant risks that the company faces is supply shortages. Agricultural commodities are subject to various environmental and biological factors that can significantly affect their production. Adverse weather conditions, pest infestations, and other factors can lead to a shortage of supply, thereby driving up prices and affecting the company's profitability. The transportation of agricultural commodities involves various logistical challenges, including delays, theft, and damage during transit. Any disruption in the transportation of commodities can result in delays and increase transportation costs, leading to lower margins for the company. Price fluctuations are also a significant risk for the company's agricultural commodity trading business. The prices of agricultural commodities are subject to various factors such as weather conditions, global demand, and government policies. These factors can result in significant price volatility, and any adverse price movement can have a negative impact on the company's financial performance. To mitigate these risks, the company needs to implement robust supply chain management systems. This includes maintaining a diversified supplier base, ensuring adequate storage and transportation facilities, and hedging against price volatility. Moreover, the company needs to establish strong relationships with its suppliers and maintain transparency in its procurement processes. Any disruption in the supply chain of Franklin Industries Limited could have a significant impact on the company's operations and financial performance. The company needs to remain vigilant and proactive in managing its supply chain to mitigate these risks effectively.

6. ***The agricultural commodity trading business is highly seasonal and such seasonality may affect our operating results and cash flow of our Company.***

Our business is seasonal in nature. Both raw material supplies and sales are seasonal, as our business is influenced by the traditional crop seasons in India. In India, majority of the farmers depend on monsoon for cultivation. Rainfall usually occurs during Kharif season and hence, the timing and seasonality of rainfall has an impact on the trading business of our Company. Thus, we are subject to seasonal factors, which make our operational revenue and operational results very unpredictable.

7. ***We have warehouse and we don't not own any cold storage facility to store our products instead we rely on the cold storage facilities available with the supplier. Damage to seeds and agricultural produce due to the unavailability of adequate warehouses at the right time may adversely affect our business, financial condition and results of operations.***

We do not own cold storage facilities and we have warehouse in which we can store our stock in trade (i.e. Rice, Wheat, Onion, Maize, Pulses etc), therefore for certain products we rely on the storage facilities available with the suppliers and ship directly from the location of supplier to the location of recipient on bill to ship to business model. Since the company does not hold on to its most of inventory for a longer period of time due to the nature of the products so our business is on "Bill to Ship To" model.

8. ***Major portion of our revenue is derived from a limited number of customers. Any failure to retain one or more of our customers or any disruption of sale of our product will have an adverse effect on our financial performance and results of operations.***

We are significantly dependent on certain key customers for a significant portion of our sales, the loss of any one of our key customers for any reason could have an adverse effect on our business, results of operations and financial condition. While we strive to maintain good relations with our key customers, there is no assurance that our key customers will continue to place similar orders with us in the future. In addition to these external factors, these key

customers may also set off any payment obligations, require indemnification for themselves or their affiliates, replace us with our competitors, or replace their existing products with alternative products which we do not supply. Therefore, there can be no assurance that we will not lose all or a portion of sales to these key customers, or that we will be able to offset any reduction of prices to these customers with reductions in our costs or by obtaining new customers. We may continue to remain dependent upon our key customers for a substantial portion of our revenues. Further, the deterioration of the financial condition or business prospects of these customers could reduce their requirement for our products and result in a significant decrease in the revenues we derive from these customers. In the event of our failure to retain one or more of our key customers, it will have an adverse effect on our financial performance and result of operations.

9. *We are heavily dependent on certain suppliers and customers for procurement and sale of our traded goods. Any disruption in supply or offtake from such entities may affect our business operations.*

Our top five customers contributed 38.49% of our sales for the Nine months ended on 31st December 2024. Whereas our top 5 suppliers contributed 32.95% of our total purchase for the Nine months ended on 31st December 2024. Any disruption of supply of raw materials from our top 5 suppliers or loss of any of our top 5 customers will adversely affect our operations and financial position. We do not manufacture the products we sell. We procure our traded goods from various suppliers. We believe that the quality of products supplied, the transparent pricing, locational advantage, etc. are some of the major reasons, our Company prefers to procure our traded goods from these key suppliers. However, we have not entered into any formal agreement with these key suppliers. Also, the fact that we are so heavily dependent on these suppliers, exposes us indirectly to the risks that these suppliers face. Any failure of the suppliers to deliver these traded goods in the necessary quantities or to adhere to delivery schedules or specified quality standards and specifications would adversely affect our business operations and our ability to deliver orders on time and at the desired level of quality. Further any deterioration in the financial condition or business prospects of these suppliers could reduce their ability to meet our requirements and which may result in delay of supply of our products. As a result, we may lose customers and incur liabilities for failure to execute orders, which could have a material adverse effect on our business, financial condition and results of operations and accordingly result in a significant decrease in our revenues.

10. *Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.*

The operations of the Company are carried in the state of Gujarat. Due to the geographical concentration of our major clients, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations. In addition, we generate major domestic sales through our customers situated in Gujarat. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and result of operations. Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management

believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

11. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

12. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

We are exposed to counterparty credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of operations and cash flows.

13. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realisation of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offer their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition. We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

14. Delays or defaults in client payments could affect our operations.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of

products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

- 15. Franklin Industries Limited must ensure the quality, safety, and compliance of the agricultural products it trades. Any failure to meet quality standards, comply with food safety regulations, or address sanitary and phytosanitary requirements can result in reputational damage, legal liabilities, or loss of customers.***

Quality control is of utmost importance in the agriculture trading business to deliver products that meet the expected standards and specifications. We implement stringent quality control measures throughout the supply chain, including rigorous inspection and testing of agricultural products. This ensures that the products meet the required quality parameters, such as freshness, nutritional value, and absence of contaminants or adulteration. Failure to maintain adequate quality control can result in customer dissatisfaction, damaged reputation, and potential legal actions. Compliance with food safety regulations is essential to protect consumers from health risks associated with contaminated or unsafe agricultural products. Franklin Industries Limited must adhere to local and international food safety standards, including proper handling, storage, and transportation practices. This includes ensuring that the products are free from harmful substances, properly labelled, and traceable throughout the supply chain. Non-compliance with food safety regulations can lead to product recalls, legal penalties, and loss of consumer trust. Similarly, sanitary and phytosanitary requirements refer to the measures in place to protect plant and animal health. Franklin Industries Limited must comply with these requirements, which may include certifications, inspections, and quarantine procedures. Failure to meet these requirements can result in the rejection of agricultural products at the suppliers godown. It is crucial for the company to stay updated with the evolving sanitary and phytosanitary regulations in different locations and ensure compliance to avoid disruptions to its trading activities.

- 16. After the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.***

The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 17. We have entered into and will continue to enter into related party transactions. We cannot assure you that such transactions will not have an adverse impact on our business, financial condition, cash flows and results of operations.***

We have entered into various related party transactions in the past. For further details of the related party transactions, see “Financial Statements” on page 84. While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. It is possible that we may enter into related party transactions in the future. We cannot assure you that such future transactions, individually or in the aggregate, will not have an adverse effect on our business, financial condition, cash flows and results of operations or that we could not have achieved more favorable terms if such future transactions had not been entered into with related parties. Further, any future transactions with our related parties could potentially involve conflicts of interest which may be detrimental to our Company.

- 18. *If we are unable to protect our intellectual property, or if we inadvertently infringe the intellectual property rights of others, our business, financial condition, cash flows and results of operations may be adversely affected.***

The trademark Franklin Industries, which we are using for our business, vide application number 6315463 under class 31 is Registered. The current status of Trademark is "Registered". We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. For further details on above and other trademarks, please refer to chapter titled "Business Overview" beginning on page 67 of this letter of offer.

- 19. *We require various statutory and regulatory permits and approvals in the ordinary course of our business, and our failure to obtain, renew or maintain them in a timely manner may adversely affect our operations.***

The agriculture sector where we intend to increase our operations are regulated by laws, rules and regulations issued by various regulatory authorities. These laws, rules and regulations have changed significantly over the years, and there can be no assurance that any future changes to such regulations will not adversely affect our business prospects, results of operations or financial condition.

We acknowledge the intricate and evolving nature of regulatory standards in the food industry, and there exists a possibility that our application may not meet the stringent criteria set by authorities. The adverse consequences of non-approval include financial losses, damage to our reputation, and disruption of business activities. While we are committed to addressing any deficiencies and collaborating with regulatory bodies, the uncertainty inherent in the approval process underscores the importance of investors recognizing the inherent risks associated with the regulatory landscape governing our food license application.

- 20. *Any losses in the future may have a significant adverse impact on our financial condition and may lead to further erosion of our net worth.***

Our company has incurred losses may incur losses in the future. There can be no assurance that the company will not incur losses in any future periods, or that there will not be any other adverse effect on our financial condition. Given the industry we are functioning in where there are chances of bad debts and deterioration of our products due to fluctuation in demand and supply.

- 21. *We are highly dependent on our management team and key personnel and the loss of any key team member may adversely affect our business performance.***

Our management team, and key personnel have been instrumental in the growth and development of our Company. Our management team comprises our Managing Director and Chief Financial Officer Maheshkumar Jethabhai Patel. In particular, the active involvement of our management team and key personnel in our operations, including through strategy, direction, and relationships have been integral to our development and business. The loss of any of these persons would have a material adverse effect on our operations. Our businesses are dependent upon a core and senior management team which oversees the day-to-day operations, strategy and growth of our business. Our success is largely dependent on our management team which ensures the implementation of our strategy. If one or more members of our key management team were unable or unwilling to continue in their present positions, such persons would be difficult to replace and our business, results of operations, financial condition, cash flows and prospects could be adversely affected. Our future success, amongst other factors, will depend on our ability to continue to attract and retain qualified personnel, particularly persons with critical expertise, know-how and skills that are capable of helping us to strategize, and develop our business and various business vertical products. Our failure to successfully manage our personnel needs could materially and adversely affect our business,

results of operations, financial condition and cash flows. Moreover, if any of our key professional employees were to join an existing competitor or form a competing company or otherwise leave, it could lead to setbacks in the implementation of our plans and strategy. Our failure to successfully manage our employees' needs could materially adversely affect our business, results of operations, financial condition, cash flows and prospects. If we are not able to address these risks, our business, results of operations, financial condition and cash flows could be adversely affected.

24. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than Rs. 100,00,00,000 (Rupees One Hundred Crores) there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

25. *Our business is subject to various laws and regulations which are constantly evolving. If we or our third-party network partners are deemed to be not in compliance with any of these laws and regulations, our business, reputation, financial condition, cash flows and results of operations may be materially and adversely impacted*

Our business is subject to regulation by the relevant governmental authorities, including the Food Safety and Standards Authority of India, the Ministry of Consumer Affairs, Food and Public Distribution and the Commissioner of Customs. ISSUE SPECIFIC FACTORS

26. *Our Company will not distribute the Offer Documents to certain overseas shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Offer Documents to such shareholders who have provided an address in India for the service of documents or who are in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Offer Documents will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any

address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act and may subject us to fines or penalties.

27. *There is no public market for the Rights Equity Shares or Equity Shares outside India.*

After this Issue, there will continue to be no public market for our Equity Shares in the United States or any country other than India. In addition, the holders of the partly paid-up Rights Equity Shares will not be able to trade in these Equity Shares till they are credited to the holders' account as fully paid-up, and thereafter there will also be no public market for the Rights Equity Shares outside of India. We cannot assure you that the face value of the Rights Equity Shares will correspond to the price at which the Rights Equity Shares will trade subsequent to this Issue. This may also affect the liquidity of our Rights Equity Shares and Equity Shares and restrict your ability to sell them.

28. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for dilution of your percentage ownership of the equity share capital of our Company that may be caused because of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation (the last day for which is Monday, 23rd June, 2025), such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

32. *Our ability to pay dividends in the future will depend on our future earnings, cash flows, working capital requirements, capital expenditures and financial condition. Investors of Rights Equity Shares are only entitled to dividend in proportion to the amount paid up and the voting rights (exercisable on a poll by investors) shall also be proportional to such investor's share of the paid-up Equity Share capital of our Company.*

The amount of our future dividend payments, if any, will depend on various factors such as our future earnings, cash flows, financial condition, working capital requirements, and capital expenditures and in accordance with applicable laws. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on the Equity Shares. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders. The amounts paid as dividends in the past are not necessarily indicative of our Company's dividend policy or the dividend amounts, if any, in the future. There is no guarantee that any dividends will be declared or paid or that the amount thereof will not be decreased in the future.

Further, with respect to the present Issue, investors are only entitled to dividend in proportion to the amount paid-up and the voting rights (exercisable on a poll by investors) shall also be proportional to such investor's share of the paid-up Equity Share capital of our Company.

33. *You may be subject to Indian taxes arising out of capital gains on the sale of the Rights Equity Shares and Rights Entitlement.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realised on the sale of listed equity shares on the Stock Exchanges held for more than 12 (Twelve) months immediately preceding the date of transfer will be subject to long term capital

gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax, on the sale of any Equity Shares held for more than 12 (Twelve) months immediately preceding the date of transfer. Securities Transaction Tax will be levied on the seller and/or the purchaser of the Equity Shares and collected by the domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 (Twelve) months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as Securities Transaction Tax.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument, if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. No dividend distribution tax is required to be paid in respect of dividends declared, distributed, or paid by a domestic company after March 31, 2020, and, accordingly, such dividends would not be exempt in the hands of the Shareholders, both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

Similarly, any business income realised from the transfer of equity shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as Section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹1.00 Lakh (Rupees One Lakh), subject to certain exceptions in case of resident individuals and Hindu Undivided Families.

Further, the Finance Act, 2019 made various amendments in the taxation laws and clarified that, in the absence of a specific provision under an agreement, the buyer will be liable to pay stamp duty in case of sale of securities through the Stock Exchanges, while the transferor will be liable to pay stamp duty in other cases of transfer for consideration through a depository. The stamp duty for transfer of securities other than debentures, on a delivery basis, is specified at 0.015% (Zero Point Zero One Five Percent) and on a non-delivery basis is specified at 0.003% (Zero Point Zero Zero Three Percent) of the consideration amount. These amendments came into effect from July 1, 2020.

34. You may not receive the Equity Shares that you subscribe in the Issue until 15 (Fifteen) days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 (Fifteen) days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time, subjecting you to market risk for such period.

35. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political, or

economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Rights Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares.

The Applicants shall not have the right to withdraw their Applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Rights Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

36. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any Company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

37. *There is no guarantee that our Right Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.*

In accordance with applicable laws and regulations and the requirements of the BSE Limited, in principle and final approvals for listing and trading of the Rights Equity Shares issued pursuant to this Issue will not be applied for or granted until after the Rights Equity Shares have been issued and allotted. Approval for listing and trading will require all the relevant documents authorising the issuance of Rights Equity Shares to be submitted. Accordingly, there could be a delay in listing the Rights Equity Shares on the BSE Limited. If there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Issue Closing Date. In any such event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted. For further information on issue procedure, please refer to the section titled '*Terms of the Issue*' beginning on page 153 of this Letter of Offer.

38. *No market for the Right Entitlements may develop and the price of the Right Entitlements may be volatile.*

No assurance can be given that an active trading market for the Rights Entitlements will develop on the Stock Exchanges during the Renunciation Period or that there will be sufficient liquidity in Rights Entitlements trading during this period. The trading price of the Rights Entitlements will not only depend on supply and demand for the Rights Entitlements, which may be affected by factors unrelated to the trading in the Equity Shares, but also on the quoted price of the Equity Shares, amongst others. Factors affecting the volatility of the price of the Equity Shares, as described herein, may magnify the volatility of the trading price of the Rights Entitlements, and a decline in the price of the Equity Shares will have an adverse impact on the trading price of the Rights Entitlements. Since the trading of the Rights Equity Shares will be on a separate segment compared to the Equity Shares on the floor of the Stock Exchanges, the trading of Rights Equity

Shares may not track the trading of Equity Shares. The trading price of the Rights Entitlements may be subject to greater price fluctuations than that of the Equity Shares.

We will not distribute the Issue Materials to overseas Shareholders who have not provided an address in India for service of documents. We will dispatch the Issue Materials to the shareholders who have provided an address in India for service of documents. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdiction where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act and may subject us to fines or penalties.

39. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

40. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a Company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian Company than as shareholder of a corporation in another jurisdiction.

41. SEBI operates an index-based market-wide circuit breaker. Any operation of a circuit breaker may adversely affect a shareholder's ability to sell, or the price at which it can sell, our Equity Shares at a particular point in time.

We are subject to an index-based market-wide circuit breaker generally imposed by SEBI on Indian stock exchanges. This may be triggered by an extremely high degree of volatility in the market activity (among other things). Due to the existence of this circuit breaker, there can be no assurance that shareholders will be able to sell our Equity Shares at their preferred price or at all at any particular point in time.

42. Investors in the Rights Equity Shares may not be able to enforce a judgment of a foreign court against us or our management, except by way of a suit in India on such judgment.

We are a limited liability company incorporated under the laws of India and majority of our directors and all executive officers are residents of India. It may be difficult for the investors to affect service of process upon us or such persons outside India or to enforce judgments obtained in courts outside India.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters

with only a limited number of jurisdictions, which includes the United Kingdom, Singapore, Hong Kong, and the United Arab Emirates. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908. Judgments or decrees from jurisdictions, which do not have reciprocal recognition with India, cannot be executed in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us or our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within 3 (Three) years of obtaining such final judgment in the same manner as any other suit filed to enforce a civil liability in India. If, and to the extent that, an Indian court were of the opinion that fairness and good faith so required, it would, under current practice, give binding effect to the final judgment that had been rendered in the non-reciprocating territory, unless such a judgment contravenes principles of public policy in India. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with Indian practice. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the RBI to repatriate any amount recovered pursuant to the execution of such a judgment.

EXTERNAL RISK FACTORS:

- 43. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ('IFRS'), which investors may be more familiar with and consider material to their assessment of our financial condition.***

The Financial Statements of our Company for the Financial Year ending March 31, 2024, March 31, 2023 and unaudited limited review for the Nine months ended on December 31, 2024 have been prepared in accordance with the Ind AS, the Companies Act, 2013.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI (ICDR) Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

- 44. *Political, economic, or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition, and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance. We are dependent on domestic, regional, and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional, and global economies. Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, and volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation

policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

45. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;
- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- Political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India.

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

46. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects, and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. The Government of India has issued a notification dated December 29, 2016, notifying Income Computation and Disclosure Standards (hereinafter referred to as 'ICDS'), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition. The General Anti Avoidance Rules (hereinafter referred to as 'GAAR') have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us. A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may

also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

47. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition. The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance, and the trading price of the EquityShares.

48. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated

economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

49. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition. Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

51. *We are subject to regulatory, economic, social, and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability, and other political and economic developments affecting India.

52. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

Macro Overview Of Global GDP

Global growth is projected at 3.3 percent both in 2025 and 2026, below the historical (2000–19) average of 3.7 percent. The forecast for 2025 is broadly unchanged from that in the October 2024 World Economic Outlook (WEO), primarily on account of an upward revision in the United States offsetting downward revisions in other major economies. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies.

Medium-term risks to the baseline are tilted to the downside, while the near-term outlook is characterized by divergent risks. Upside risks could lift already-robust growth in the United States in the short run, whereas risks in other countries are on the downside amid elevated policy uncertainty. Policy-generated disruptions to the ongoing disinflation process could interrupt the pivot to easing monetary policy, with implications for fiscal sustainability and financial stability. Managing these risks requires a keen policy focus on balancing trade-offs between inflation and real activity, rebuilding buffers, and lifting medium-term growth prospects through stepped-up structural reforms as well as stronger multilateral rules and cooperation.

Outlook on Advanced Economies

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent. Among advanced economies, growth forecast revisions go in different directions. In the United States, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026. In the euro area, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat. In other advanced economies, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.

Outlook on Emerging Economies

In emerging market and developing economies, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for China is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In India, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential. In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and the Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

Macroeconomic Overview of India

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for Q2 FY25 is estimated at Rs. 76.60 lakh crore (US\$ 886.16 billion) with growth rate of 8.0%, compared to Rs. 70.90 lakh crore (US\$ 820.22 billion) for Q2 FY24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-December 2024, India's exports stood at Rs. 27.56 lakh crore (US\$ 318.96 billion), with Engineering Goods (27.32%), Petroleum Products (14.59%) and Electronic Goods (8.19%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback. India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative. India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Real GDP for Q2 of FY25 is estimated at Rs. 44.10 lakh crores (US\$ 509.36 billion) with growth rate of 5.4%, compared to Rs. 41.86 lakh crore (US\$ 484.27 billion) for Q2 of 2023-24. The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8- 8.5% GDP growth between same time periods. India's Current Account Deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at Rs. 96,790 crore (US\$ 11.2 billion) for Q2 of FY25 from Rs. 97,655 crore (US\$ 11.3 billion) in Q2 of FY24 or 1.3% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030. Overview of Agriculture Commodity Trading Industry

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. India's agricultural and processed food products exports stood at US\$ 43.37 billion in FY23 (April 2022-January 2023). As per Second Advance Estimates for 2022-23 (Kharif only), total foodgrain production in the country is estimated at 153.43 million tonnes. At current prices, agriculture and 60 allied sectors account for 18.3% of India's GDP (2022-23). As per the third Advance Estimates of National Income, 2021-22 released by the National Statistical Office (NSO), Ministry of Statistics & Programme Implementation, the agriculture and allied sectors contributed approximately 18.6 % of India's GVA at current prices during 2021-22. Between April 2000-December 2022, FDI in agriculture services stood at US\$ 4.43 billion

Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

Rice

Post's MY 21/22 (October-September) rice production estimate is raised to 129.5 MMT based on the estimated higher fall harvested production from the official third advance estimate. Increased government procurement and market prices support the higher official rice production estimates.

Government Procurement Heading to New Record: India's MY 21/22 government rice MSP procurement through May 19, 2022, is estimated at 53.2 MMT compared to 50.9 MMT in May 2021. Higher procurement numbers are coming out of the central/peninsular states of Chhattisgarh, Madhya Pradesh, Telangana, and Tamil Nadu. With additional procurement of summer planted rice likely to continue in the eastern and southern states, government rice procurement in MY 21/22 is likely to reach 62 MMT, about 2 MMT higher from last year's record 60.1 MMT.

India's MY 21/22 consumption estimate is raised to 109.5 MMT on higher use of government rice in May-September 2022 under the PMGKY and other food security programs (~6 MMT per month). Average monthly offtake of rice under food security programs in the first half of MY 21/22 is 4.65 MMT/month. Increased allocations of rice will drive MY 21/22 consumption to 109.5 MMT. The MY 22/23 consumption forecast stays unchanged at 107 MMT. Indian rice exports have been robust since the beginning of calendar year (CY) 2020 (January-December) owing to strong demand and competitive prices of Indian non-basmati rice shipped to traditional markets. Preliminary official trade statistics indicate that rice exports during the first quarter of CY 2022 (TY 2021/2022) are at 5.9 MMT compared to 6.1 MMT seen last year. Sources report stronger export offtake of wheat during March/April slowing down rice exports due to port congestion. Rice exports will recover in the coming months as Indian rice remains more price competitive compared to other origins. Post continues to estimate MY 21/22 rice exports unchanged at 21 MMT, and MY 22/23 exports at 22 MMT on forecast MY 22/23 domestic supplies.

Oilseeds

India is the 4th largest oilseeds producer in the world. It has 20.8% of the total area under cultivation globally, accounting for 10% of global production. The country produces groundnut, soybean, sunflower, sesamum, niger seed, mustard and safflower oilseeds.

Nearly 72% of the oilseed area is restricted to rainfed farming done by small farmers which led to poor productivity. However, a breakthrough was realized in oilseed production by introducing the latest crop production technologies. Consequently, the oilseed production grew to 365.65 lakh tonnes in 2020-21 from 108.3 lakh tonnes in 1985-86.

The production of oilseeds in India has been growing for the last five years. In 2020-21, the production of the country was 365.65 lakh tonnes which was a 10% increase from that of the previous year. From the years 2015-16 to 2021-22, the compound annual growth rate (CAGR) of production was 7.3%. This was achieved due to the implementation of various programs like special programmes on mustard & rapeseed during Rabi and cluster demonstrations of improved technology by the Government of India.

The largest oilseed-producing states in India include Andhra Pradesh, Gujarat, Haryana, Karnataka, Madhya Pradesh, Maharashtra, Rajasthan, Tamil Nadu, Uttar Pradesh, and West Bengal. Out of these states, Rajasthan, Gujarat, Madhya Pradesh and Maharashtra are the top producers with a share of about 20%, 20%, 19% and 16% of the total production, respectively.

India is one of the largest oilseed product exporters. The country exports soybeans, mustard seeds, groundnuts, sesame seeds, niger seeds, cotton seeds, castor seeds and sunflower & safflower seeds. In 2021, India exported mustard seeds worth US\$ 28.2 million. The total quantity exported during the same period was about 31.5 million kg. India is among the top exporter of mustard oilseeds, meals and flour and in 2019, it was the fourth-largest mustard seed exporting country. In FY22 India exported US\$ 1.01 billion (Rs. 8,310 crore) worth of Oilseeds. In February 2023 (Provisional), India exported US\$ 106.59 million worth of Oilseeds, an increase of 20.49% year-on-year (YoY).

Road Ahead

The agriculture sector in India is expected to generate better momentum in the next few years due to increased investment in agricultural infrastructure such as irrigation facilities, warehousing, and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to the concerted effort of scientists to get early maturing varieties of pulses and the increase in minimum support price. Through the Ministry of Food Processing Industries (MoFPI), the Government of India is taking all necessary steps to boost investments in the food processing industry in India. Government of India has continued the umbrella PMKSY scheme with an allocation of Rs. 4,600 crore (US\$ 559.4 million) till March 2026.

INDIAN GEMS & JEWELLERY INDUSTRY

INTRODUCTION

As of March 2024, India's gold and diamond trade contributed ~7% to India's Gross Domestic Product (GDP) and 15.7% to India's merchandise exports. • The Gems and jewellery sector in India provides employment to ~5 million individuals.

The Government has undertaken various measures recently to promote investment and upgrade technology and skills to promote 'Brand India' in the international market. The Government has permitted 100% FDI in the sector under the automatic route, wherein the foreign investor or the Indian company do not require any prior approval from the Reserve Bank or the Government of India. The Indian Government also signed a Comprehensive Economic Partnership Agreement (CEPA) with the United Arab Emirates (UAE) in March 2024, this will allow the Indian Gems and Jewellery industry to further boost exports. CEPA will provide the industry with duty-free access to the UAE market. India's Gems Jewellery Export Promotion Council (GJEPC) aims to triple its exports to the UAE post the CEPA.

MARKET SIZE

India's gems and jewellery market size was at US\$ 78.50 billion in FY21. Growth in exports is mainly due to revived import demand in the export market of the US and the fulfilment of orders received by numerous Indian exhibitors during the Virtual Buyer-Seller Meets (VBSMs) conducted by GJEPC.

In FY24, India's gems and jewellery exports were at US\$ 22.27 billion, a 14.94% decline compared to the previous year's period. Exports of gems & jewellery stood at US\$ 2.54 billion in September 2024.

Road Ahead

In the coming years, growth in the gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Also, the relaxation of restrictions on gold import is likely to provide a fillip to the industry.

The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. India has 450 organised jewellery manufacturers, importers & exporters and is the hub for jewellery manufacturing. These players have benefited greatly due to the increasing liberal policies by the government. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry. India's gems and jewellery industry is expected to reach US\$ 100 billion by 2027.

Information other than the financial statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the standalone financial statements and our auditor's report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those charged with governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting

principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management and board of directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to Standalone Financial statement in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial statements, including the disclosures, and whether the Standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Financial Statements may be influenced.

We consider quantitative materiality and qualitative factors (i) in planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Standalone Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to Standalone Financial Statements and their operating effectiveness.

Our audit of internal financial controls with reference to Standalone Financial Statements included obtaining an understanding of internal financial controls with reference to Standalone Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to Standalone Financial Statements.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control with reference to Standalone Financial Statement is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls with reference to Standalone Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Standalone Financial Statements to future periods are subject to the risk that the internal financial control with reference to Standalone Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls with reference to Standalone Financial Statements and such internal financial controls with reference to Standalone Financial Statements were operating effectively as at 31st March, 2024, based on the criteria for internal financial control with reference to Standalone Financial Statements established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and relevant amendment rules issued thereafter.

The Company has consistently applied accounting policies to all years. Comparative Financial information has been re-grouped, wherever necessary, to correspond to the figures of the current year.

(ii) Basis of preparation and presentation

The standalone financial statements have been prepared on accrual basis under the historical cost convention except for the certain financial instruments that are measured at fair values as required by relevant Ind AS:

a) certain financial assets and liabilities (including derivative instruments)

b) defined employee benefit plans - plan assets are measured at fair value Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

(iii) Use of estimates and judgement:

The preparation of standalone financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets and liabilities, revenues and expenses and disclosure of contingent liabilities. Such estimates and assumptions are based on management's evaluation of relevant facts and circumstances as on the date of standalone financial statements. The actual outcome may diverge from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Useful lives of property, plant and equipment:

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

Fair value of financial assets and liabilities and investments:

The Company measures certain financial assets and liabilities on a fair value basis at each balance sheet date or at the time they are assessed for impairment. Fair value measurements that are based on significant unobservable inputs (Level 3) requires estimates of operating margin, discount rate, future growth rate, terminal values, etc. based on management's best estimate about future developments.

Sale of goods: Revenue from the sale of products is recognized at the point in time when control is transferred to the customer. Revenue is measured based on the transaction price, which is the consideration, net of customer incentives, discounts, variable considerations, payments made to customers, other similar charges, as specified in the contract with the customer. Additionally, revenue excludes taxes collected from customers, which are subsequently remitted to governmental authorities.

Interest Income: Interest income received on the Loans and Advances are recorded as per the accrual Principle of Accounting.

(vi) **Taxation:**

Income tax expense represents the sum of the tax currently payable and deferred tax.

a) Current tax: Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

b) Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

c) Deferred tax: Deferred tax is recognized using the balance sheet approach. Deferred tax assets and liabilities are recognized on temporary differences between the carrying amounts of assets and liabilities in the standalone financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be utilized.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

(vii) Property, Plant and Equipment:

Property, plant and equipment are carried at cost less accumulated depreciation and impairment losses, if any. The cost of property, plant and equipment comprises its purchase price/acquisition cost, net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying property, plant and equipment up to the date the asset is ready for its intended use.

The estimated useful life of the tangible assets and the useful life are reviewed at the end of each financial year and the depreciation period is revised to reflect the changed pattern, if any. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from continued use of the asset. Unfixed gold is valued at the gold prices prevailing on the period closing date. Cost comprises all costs of purchase including duties and taxes (other than those subsequently recoverable by the Company), freight inwards and other expenditure directly attributable to acquisition. Work-in-progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

(ix) Provisions and contingencies:

Provisions: A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of time value of money is material).

Contingent liabilities: Contingent liability is a liability that may occur depending on the outcome of an uncertain future event. The management of the company is aware of having an outstanding demand amounting to Rs. 1,788.27 Lakhs towards Income Tax Department. (xv) Fair Value:

The Company measures certain financial instruments at fair value at each balance sheet date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- A. In the principal market for the asset or liability, or

- B. In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as under, based on the lowest level input that is significant to the fair value measurement as a whole:

A. Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

B. Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

C. Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarizes the accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

The FSS Act was enacted on August 23, 2006 with a view to consolidate the laws relating to food and to establish the Food Safety and Standards Authority of India ("FSSAI"), for laying down science-based standards for articles of food and to regulate their manufacture, storage, distribution, sale and import, to ensure availability of safe and wholesome food for human consumption and for matters connected therewith or incidental thereto. The FSS Act, among other things, also sets out requirements for licensing and registration of food businesses, general principles of food safety, and responsibilities of the food business operator and liability of manufacturers and sellers, and adjudication by Food Safety Appellate Tribunal.

For enforcement, under the FSS Act the 'commissioner of food safety', 'food safety officer' and 'food analyst' have been granted with detailed powers of seizure, sampling, taking extracts and analysis. Penalties are levied for various defaults such as for selling food not of the nature or substance or quality demanded, sub-standard food, misbranded food, misleading advertisement, food containing extraneous matter, for failure to comply with the directions of Food Safety officer, for unhygienic or unsanitary processing or manufacturing of food, for possessing adulterant. Apart from the penalties, there are punishments prescribed for selling, storing, distributing or importing unsafe food, for interfering with seized items, for providing false information, for obstructing or impersonating a Food Safety officer, for carrying out a business without a licence and for other subsequent offences.

The FSS Act also contains the provision for offences by the companies. Further, the Food Safety and Standards Rules, 2011 ("FSSR") which have been operative since August 5, 2011, provide, among other things, the qualifications mandatory for the posts of the 'commissioner of food safety', 'food safety officer' and 'food analyst', and the procedure for taking extracts of documents, sampling and analysis.

In order to address certain specific aspects of the FSS act, the FSSAI has framed several regulations such as the following:

- a) *Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011;*
- b) *Food Safety and Standards (Packaging and Labelling) Regulations, 2011;*

- c) *Food Safety and Standards (Food Product Standards and Food Additives) Regulations, 2011;*
- d) *Food Safety and Standards (Prohibition and Restriction on Sales) Regulations, 2011;*
- e) *Food Safety and Standards (Contaminates, Toxins and Residues) Regulations, 2011;*
- f) *Food Safety and Standards (Laboratory and Sampling Analysis) Regulations, 2011; and*
- g) *Food Safety and Standards (Health Supplements, Nutraceuticals, Food for Special Dietary Usage;*
- h) *Food for Special Medical Purpose, Functional and Novel Food) Regulations, 2016.*

The FSS Act also covers under its ambit foods for special dietary uses or functional foods or nutraceuticals or health supplements which is defined to mean as dietary substances which can be used by human beings to supplement their diet by increasing their total dietary intake. It also lists out certain ingredients that cannot be found in such nutraceuticals or health supplements and lays down that to be categorized as nutraceuticals or health supplements, the substance should not be represented as a conventional food. To further regulate nutraceuticals, the Food Safety and Standards (Health Supplements, Nutraceuticals, Food for Special Dietary Usage, Food for Special Medical Purpose, Functional and Novel Food) Regulations, 2016 (the “Nutraceutical Regulations”) have been brought into force on January 1, 2018. The Nutraceutical Regulations also lay down that the health claims in respect of an article of food shall be commensurate with the adequate level of documentation and valid proof made available for review by the Food Authority when called for. The Nutraceutical Regulations lays down the ways in which companies producing these kinds of food should label their packages and the kind of material that are prohibited from being used in their production. Import of foods, including Health Supplements and Nutraceuticals are subject to the FSS (Import) Regulations 2017. No person shall import any article of food without an import license from the Central Licensing Authority in accordance with the provisions of the Food Safety and Standards (Licensing and Registration of Food Business).

The FSSAI has also issued a special guidance note on Food for Special Medical Purposes (FSMP). As per this guidance note an FSMP is a food which is intended to provide nutritional support to persons who suffer from specific disease, disorder or medical condition. FSMP’s are to be used only under the guidance of medical advice and the same disclaimer should also be printed clearly on its package. The guidance note also provides a clear distinguish between the various categories of products covered under the Nutraceutical regulations.

Further, FSSAI has issued guidance note on ‘Food Hygiene and Safety Guidelines for Food Businesses during Coronavirus Disease (COVID-19) Pandemic’ (“Guidance Note”) with an intent to provide guidance to food businesses, including their personnel involved in handling of food and other employees to prevent spread of COVID-19 in the work environment and any incidental contamination of food/food packages. Additionally, it also provides guidance in relation to operative mechanism such as establishment of an in-house emergency response team in large food businesses to deal with suspected infections effectively. It mandates that employers should have a COVID-19 Screening Protocol in place to screen all personnel entering the premise. All the employees or visitors should be screened at entry point for the symptoms of COVID- 19 such as, among others, temperature (using non-contact type thermometer), cough and cold. The entrance shall mandatorily have measures installed for hand hygiene. Employees and food handlers should be encouraged to self-declare any symptoms of any respiratory illness before visiting the premises. To spread awareness and contain the spread of the disease, employers should employ and ensure compliance with numerous measures such as, among others, display of posters/standees/audio visuals on preventive measures for COVID-19, frequent usage of alcohol-based sanitisers, avoidance of close contact with symptomatic personnel, usage of face masks, and frequent cleaning and disinfection. Food businesses shall ensure that food handlers involved in food packaging should maintain a high level of personal hygiene and social distancing. All measures shall be adopted to ensure that food packaging is kept clean and away from sources of contamination. The Schedule enumerates multiple compulsory measures to be adopted by food business operators in the interest of human nutrition, safety and hygiene. The Schedule mandates that the premises shall be clean, adequately lighted and ventilated, and sufficient free space for movement shall be made available. In relation to packaging of the products, it requires that the confectionary products should be wrapped/packaged only after proper cooling. No vessel, container or other equipment, the use of which is likely to cause metallic contamination injurious to health shall be employed in the preparation, packing or storage of food. The

finished products should be refrigerated with proper labels indicating date of expiry. In relation to personal hygiene –all employees should wash their hands properly and they should be made aware of measures to avoid cross-contamination. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the 'automatic route', where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the 'government route', where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise way such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (**'FDI Circular 2020'**), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that:

1. The activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI (SAST) Regulations;
2. The non- resident shareholding is within the sectoral limits under the FDI Policy; and
3. The pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e., any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid to make any investment in the Issue.

The Company will not be responsible for any allotments made by relying on such approvals. Please also note that pursuant to Circular no. 14 dated December 16, 2003, issued by RBI, Overseas Corporate Bodies have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable

laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
