## Atam Valves Limited Nears Final Stage of American Petroleum Institute (API) Certification

*Successful completion of Q1 audit marks critical milestone toward global-grade manufacturing readiness*

**Jalandhar, 4<sup>th</sup> December 2025:** Atam Valves Limited (NSE:ATAM) announced that it has successfully cleared the first Audit Stage (Q1 Certification) conducted by the American Petroleum Institute (API), a globally recognized benchmark for quality and manufacturing excellence in the oil, gas, and process industries.

Following the **successful recommendation** by the API auditors, the Company is now in the final stage of addressing a few procedural observations raised during the audit. This process is expected to conclude **within the next 6-8 weeks**, after which the formal API certification is anticipated by **February 2026**.

**Speaking on the development, Mr. Amit Jain, Managing Director at Atam Valves Ltd, commented,** “The journey toward API certification has tested our patience and perseverance in every sense. The auditor’s clear recommendation in favour of Atam has been a big turning point for us. All prior areas of concern have now been fully addressed, leaving only a straightforward, time-bound process of final documentation and closure. For us, last two years have been a period of introspection, learning, and strengthening our foundations. Each audit round, every observation, and every document trail has made us sharper, more disciplined, and ready for the global stage. Today, to have our auditor recommend Atam for certification feels like a strong vindication of all that hard work. There is no denying that the journey has taken significantly longer than we, and our investors, had originally anticipated. The delay has been substantial, and we fully understand the disappointment it has caused. Yet, this very process has fortified our systems, discipline, and global readiness. With the final audit phase set to conclude positively, our focus shifts decisively from uncertainty to execution.”

“Commercially, API certification will unlock tangible revenue streams as we onboard qualified customers and projects,” Mr. Jain continued. “We will start getting meaningful traction from API-related business by the end of FY27, coinciding with capacity ramp-up and trials converting to orders. Coupled with our planned expansion into larger valves up to 72 inches, Atam is now positioned to capture high-value opportunities in oil & gas, petrochemicals, and infrastructure with clarity, conviction, and the knowledge that the most challenging phase is firmly behind us.”

Valves, Fittings & Boiler Mountings

In parallel, Atam Valves has been preparing for the next phase of production expansion. The company has identified and planned new machinery capable of manufacturing large-radius industrial valves up to 72 inches, compared to the current 12-inch capacity, with readiness to serve more complex, high-pressure sectors including oil & gas, petrochemicals, and large-scale infrastructure.

**About Atam Valves Limited:**

Atam Valves Limited, established in 1985, is a leading manufacturer of industrial and plumbing valves and fittings, catering to various industries such as oil and gas, chemicals, and HVAC. The company produces a wide range of valves, including Gate, Globe, and Ball, designed to withstand extreme temperatures (-192°C to 550°C) and high pressures (up to 10,000 psi). With a dedicated team of 500 and three specialized foundry shops, Atam Valves efficiently manages large and custom orders. Focused on innovation and quality, the company was listed on the BSE SME platform in October 2020 and migrated to the Mainboard of BSE and NSE in May 2023.
