Detailed Rationale

Crisil Ratings has assigned its '**Crisil BBB/Stable**' rating to Rs.100 crore non convertible debentures of Finkurve Financial Services Ltd (FFSL) and reaffirmed its '**Crisil BBB/Stable**' rating on the existing long-term bank facilities and non convertible debentures.

The company, also known by its brand name -- Arvog -- was set up in 1984 as Sanjay Leasing Ltd. It received non-banking financial company (NBFC) license from the Reserve Bank of India (RBI) in 1998. FFSL was acquired by Mr. Ketan Kothari (current promoter) in 2010, who has more than two decades experience in the precious metals and finance industry. The promoter group held 56.3% stake in the company as on September 30, 2025. The company started offering retail loans in 2019 on pilot basis and gold loans from October 2020.

It is a part of the Augmont group, India's premier bullion trading entity. The Augmont group has a comprehensive gold ecosystem that spans from importing and refining raw gold into fine bars and distributing physical and digital gold to jewellers and retailers. The group comprises Augmont Enterprises Pvt Ltd, which specialises in business-to-business (B2B) bullion trading, and Augmont GoldTech Pvt Ltd, which serves as a direct-to-consumer brand offering a holistic range of products and services for all gold-related needs.

FFSL started offering personal loans and small and medium enterprises (SME) loans in fiscal 2020 through partnership with fintech companies. In fiscal 2021, the company partnered with Augmont GoldTech to offer retail gold loans till June 2024. From July 2024, gold loans are sourced and managed directly through FFSL's own branches, and the role of Augmont has been curtailed to technology and brand provider.

The company's assets under management (AUM) stood at Rs 671 crore as on September 30, 2025. Its portfolio comprised gold loans (91%), personal loans (7%) and SME loans (2%) as on September 30, 2025. Average ticket size for gold loans and retail loans was around Rs 1,33,000 and Rs 96,000, respectively, with average tenure of 10 months for gold loans and 31 days for retail loans in the first half of fiscal 2026.

The ratings continue to factor in the company's adequate capital position, supported by comfortable earnings profile, strong promoter profile and experienced management. Capitalisation was adequate, as reflected in network of Rs 329 crore and gearing of 1.1 times as on September 30, 2025. The steady state gearing is expected to remain below 3 times. In the first quarter of fiscal 2026, equity capital of Rs 111.5 crore was infused in the entity through preferential share issue by private placement, increasing the network from Rs 206 crore as on March 31, 2025 to Rs 329 crore as on September 30, 2025. Top management comprises experienced personnel, including Mr. Naveen Kottala (chief executive officer, effective November 18, 2025) and Mr. Aakash Jain (chief financial officer). These strengths are partially offset by small scale of operations, limited seasoning of portfolio and modest resource profile.

Analytical Approach

Crisil Ratings has considered the standalone business and financial risk profiles of FFSL.

Key Rating Drivers - Strengths

Adequate capitalisation supported by comfortable earnings profile

Capitalisation was adequate, as reflected in network of Rs 329 crore and gearing of 1.1 times as on September 30, 2025. The network increased from Rs 206 crore as on March 31, 2025 (gearing of 1.1 times) on account of equity infusion of Rs 111.5 crore during the quarter ended June 30, 2025. Apart from equity infusion by promoters, the capital position remains supported by steady accretion to reserves. Profit after tax (PAT) and return on managed assets (RoMA) were Rs 11 crore and 3.6% (annualised), respectively, for the first half of fiscal 2026, and Rs 17 crore and 4.5%, respectively, for fiscal 2025. As the company is in the growth phase, its operating expense remains elevated. FFSL had a network of 92 branches as on September 30, 2025, and plans to further increase the number of branches in the near-to-medium term. Ability to sustain profitability as the portfolio scales up will remain a key monitorable. Nevertheless, the company is expected to maintain steady state gearing below 3 times over the medium term and the capital position is expected to remain supported by strong promoter holding.

Strong promoter profile and experienced management

The company has an experienced board of directors and a management with senior-level experience in the financial services sector. It was acquired in 2010 by Mr. Ketan Kothari, who has experience of more than two decades in the precious metals and finance industry. He is the Joint National Secretary of Indian Bullion & Jewellers Association (IBJA). He is also a promoter in Augmont Enterprises Pvt Ltd and Augmont GoldTech Pvt Ltd.

The promoter group held 56.3% stake as on September 30, 2025. The top management includes experienced personnel, including Mr. Naveen Kottala, who has experience of over 15 years in the finance sector, and Mr. Aakash Jain, with experience of over a decade in finance. The management has developed good systems and processes in terms of sourcing, credit underwriting and client servicing and reporting.

Key Rating Drivers - Weaknesses

Small scale of operations and limited seasoning of portfolio

The company's AUM stood at Rs 671 crore (includes off book) as on September 30, 2025, which grew ~106% (annualised) from Rs 440 crore (includes off book) as on March 31, 2025. The growth during fiscal 2025 was ~69% (AUM of Rs 259 crore as on March 31, 2024). The disbursements have also witnessed growth to Rs 1,606 crore for fiscal 2025 from Rs 706 crore for fiscal 2024 (and Rs 1592 crore for the first half of fiscal 2026). Nevertheless, the scale of the operations remains small in relation to the overall industry size. The portfolio of the company comprised gold loans (91%), personal loans (7%) and SME loans (2%) as on September 30, 2025. The mix as of March 31, 2025 was 88%, 8% and 4%, respectively, and the portfolio has seen a shift with higher focus towards gold loans. The share of SME loans is expected to remain subdued, whereas the share of personal loans in the portfolio is expected to remain within 10% of the overall AUM over the medium term.

Gross non-performing assets and net non-performing assets were 1.1% and 0.9%, respectively, as on September 30, 2025, compared with 0.9% and 0.7%, respectively, in fiscal 2025 (2.0% and 1.5%, respectively, in fiscal 2024). Asset quality is also supported by around 94% of the company's loan book being secured. Given the company is in early stage of operations, there is limited seasoning in the portfolio. Therefore, the ability of the company to maintain portfolio quality amid growing scale of operations will be a key rating sensitivity factor.

Modest resource profile

FFSL has raised resources from 15+ lenders. The outstanding borrowings were Rs 375 crore as on September 30, 2025, and consisted of NCDs (21%), term loans (41%), cash credit/working capital demand loan (7%) and inter-corporate deposits (31%). While the company has increased focus on growing off balance sheet book via avenues like co-lending, the ability to grow on-book will be dependent on raising funds at competitive costs. Therefore, the ability of the company to diversify the resource profile and raise adequate funds at will remains a key monitorable.

Liquidity Adequate

The asset-liability management profile had positive cumulative gaps in all time buckets as on September 30, 2025. As on December 31, 2025, the company had cash and bank balance of Rs 81 crore which are sufficient to cover repayments of the next five months.

Outlook Stable

Crisil Ratings believes FFSL will continue to benefit from the extensive experience of the promoters and management and its adequate capitalisation.

Rating Sensitivity Factors

Upward factors

- Substantial scale up in operations while maintaining credit costs
- Significant increase in absolute earnings while maintaining RoMA above 3%
- Diversification of resource profile at optimal cost of funding

Downward factors

- Deterioration in asset quality, leading to negative impact on profitability
- Weakening of capital position, with increase in gearing to over 5 times.
