Sub: - Submission of the Newspapers Clippings

Dear Sirs,

Pursuant to Regulation 47 and 52(8) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, we are pleased to inform that the Financial Results (Standalone & Consolidated) of the Company for the quarter and nine months ended December 31, 2025 as approved in the Board Meeting held on February 05, 2026 duly published on February 06, 2026 in "Economic Times" (English) and "Navbharat Times" (Hindi) newspapers.

The newspapers clippings are enclosed for your reference and record please.

Thanking you,

Yours faithfully

Uno Minda Limited

Tarun Kumar Srivastava

Voluntary Disclosures

► From Page 1

First, when an individual, pulled up for escaping tax on unexplained income, challenges the I-T department, he would have to bear a burden as high as 99%—80% tax, 25% surcharge, 4% cess, and 200% penalty (on 30%). Second, a person who chooses not to contest the decision in the appellate bodies and courts, would be spared from the 200% penalty but must pay an additional tax of 200%. Here, the outgo adds up to 75%, as against 84% he has to cough up now (The 84% rate includes 75% for voluntary declaration and the current penalty of 10% on 60%). Interestingly however, an assessee can avoid even the lower rate of 75%, and even pay by paying just 38% tax if he voluntarily reports the income before the department gets a whiff of it and acts.

According to senior chartered accountant Pradip N Kapasi, a taxpayer may exploit the right to voluntarily include the undisclosed income of the specified kinds while filling the return of income for FY 2025-26 onwards by paying

taxes at 38% thereon before the year-end u/s 156 of the IT Act. "Due to the proposed amendment, the tax otherwise payable is 78% of such income. However, such a position should be taken by only those who are not searched and are absolutely sure that the undisclosed amount is not categorised in any way as 'proceeds of crime', 'benami property', and the income pertains to the tax year for which return is filed," he said. Thus, someone regularising unexplained income by paying 38% must remember that a POC could trigger invocation of harsh laws and enforcement actions taken to curb money laundering, benami deals, and black money.

HUGE TO COME CLEAN?

"The proposed change may be designed to nudge taxpayers to either voluntarily offer such unexplained amounts, in which case no penalty would arise and the overall incidence will remain at 38%, or to opt for payment of an additional tax of 120% to bring the matter to closure," said the assessor. It is detected by the assessor.

sing officer during assessment proceedings," said Harshal Bhutia, partner at the CA firm T R Bhutia & Co.

The existing provisions permitting voluntary declaration of income relating to unexplained credits, investments, assets, expenditure, and amounts borrowed or repaid through IPOs found few takers due to the high tax of 78%, said Ashish Karundia, founder of the CA firm Ashish Karundia & Co. Consequently, the task of spotting such income was left to tax officials, leading to prolonged assessments and multiple litigations. "While the budget proposal aims to encourage voluntary disclosure of unexplained income by levying tax at 38% with no penalty and granting immunity from prosecution (thereby facilitating early closure and reducing litigation and administrative burden), the relief is confined to the 17-Tax. Such disclosures may still have consequences under other legislations, including GST, depending on the nature and source of the income," said Karundia.

The entry barrier is very, very low and that's why you see a lot of Instagram sellers popping up," said Mohabadi. "People who understand the market, the customer, the insights, and build on it, become big." Anvrit R Jain, founder of Dhora, said, "While the platform has enabled rapid brand creation and organic scale, it has also opened the door to China-sourced goods offered by discount-heavy players, leading to commodification, copies and even fraud." The result is near-identical products, with consumers increasingly struggling to tell one brand from another, making price and posting frequency often matter more than originality. "Even if you decide tomorrow, you can source, launch a brand and start selling instantly online," said Isha Bhatia, cofounder, Hannan. The popular brands are trying hard to stand out from competitors. "What separates winners from the rest is execution," said Vidhush Jain, founder of Atrangi, which started as an Instagram store in 2018. "Consistent posting, sharp merchandising, frequent catalogue refreshes and well-packaged offers have become central to growth."

Compliance with US Standards

► From Page 1

Sinha also highlighted that capturing this opportunity will require certifications, compliance with stringent US standards, and stronger after-sales and local partnerships.

In FY25, India exported solar modules worth \$1.2 billion, of which the US accounted for 91%. Similarly, solar cell exports to the US accounted for around 93% of the total \$3.8 billion. "It significantly enhances the competitiveness of Indian-made solar cells and modules. This improvement will make projects more profitable for US developers and create a substantial new demand for high-efficiency made-in-India products in the coming years," said Satevik Green Energy CEO Prashant Mathur.

Vikram Solar has earmarked \$4,571 crore of capital expenditure to install a 5-gigawatt-hour (GWh) BESS manufacturing facility in Tamil Nadu, to be commissioned by FY27. Waaree Energy, the country's largest solar module maker, is expanding into BESS, inverters and green hydrogen and investing nearly \$10,000 crore in a 20-GWh BESS facility by FY28. Satevik Green Energy also plans to foray into BESS, transformers and cables as part of its strategy to fully integrated clean energy solutions provider.

The diversified product portfolio is likely to help them tap export opportunities in the US market.

AMERICAN SCOPE

The North American BESS market is projected to rise to \$49.3 billion by 2031 from an expected \$24 billion in 2024, at a compound annual growth rate (CAGR) of 15.5%, according to Mordor Intelligence.

► From Page 1

Experts attribute this to low barriers to entry into the segment.

"Reels is now the launchpad for fashion trends in India, with engagement on fashion and style content 40% higher on Reels than other platforms," said Meghna Apparao, director—e-commerce and retail, Meta (India). "To address these evolving behaviours, we launched omnichannel ads last year, enabling advertisers to highlight nearby store locations to people most likely to shop in person." For many Gen Z shoppers in their early 20s, shopping via a social media ad while scrolling through the feed feels most natural, with impulse purchases offering both retail therapy and instant gratification. "Things like make-up, fashion jewellery or reasonably priced apparel are impulse purchase items. While the user is just scrolling on Instagram and likes a post, they immediately visit the website and place the order since the barrier is low," said Pallavi Mohadikar, chief executive, Palmona. The jewellery brand, which retails 17- and 18-carat gold-plated items, records about 60-70% of its traffic from paid marketing campaigns on Instagram.

"Brands know that the open rate on Instagram is higher compared to any other shopping app on a user's phone," said Renu Bisht, founder of direct-to-consumer brand consulting firm Consume. "When brands look at advertising on Meta, they think of Instagram as the pri-

► From Page 1

"These reforms aim to take India's startup journey into its next phase of growth & further strengthen the country's position as a global innovation hub," Goyal said in a post on X.

The government, however, has also imposed certain restrictions to ensure benefits of a recognised startup flow to genuine entities.

"The government of India has now notified a revised framework and eligibility criteria for recognising entities as startups, with the objective of strengthening the country's innovation ecosystem," the department said, adding that the changes are aimed at supporting deep-tech startups, long-term R&D-driven enterprises and innovation-led cooperatives. India has recognised more than 200,000 startups since the programme's launch in 2016, making it one of the world's largest startup ecosystems. Recognised firms are eligible for benefits including access to government funding schemes, tax exemptions and regulatory relief.

The overhaul reflects a shift in India's startup landscape toward longer innovation cycles, higher capital intensity and delayed commercialisation, particularly in deep tech, manufacturing and R&D-heavy sectors, the department said, noting that many such firms outgrow existing thresholds while still in development.

The formal recognition of deep tech startups signals a strategic shift, said Sandeep Jhunjhunwala, M&A tax partner at Nangia Global Advisors. "The inclusion of the deep startups category showcases that India is prioritising deep tech to move from a nation of technology adoption to one of technology innova-

tion," he said. While the list of non-permissible asset investments for startups remains largely unchanged, the notification introduces a new restriction covering "any asset or activity of a speculative or non-productive nature, as may be notified by the government." Jhunjhunwala said.

Despite the ecosystem crossing 200,000 DPIIT-recognised startups, only about 2% currently receive income tax exemptions under Section 80-IAC, he said.

The revised framework also brings multi-state and state-registered cooperative societies within the definition of eligible startups, a move the government said could help drive innovation in agriculture, rural development and allied sectors. The changes follow consultations with industry stakeholders and multiple ministries, and are intended to reinforce India's ambition to position itself as a global hub for high-tech innovation and knowledge-intensive entrepreneurship, the department said. Any entity formed by splitting up or reconstruction of an existing business shall not be considered as a startup. As per the notification, a deep tech startup has to work on producing a solution based on new knowledge or advancement within a scientific or engineering discipline, which is yet to be developed or is in the process of being developed.

It must have a high percentage of expenditure on research and development as a percentage of revenues or funding and own or be in the process of creating a significant novel intellectual property.

Further, the deep tech startups, during the period of recognition, will be disallowed from investing in assets or activities other than that integral to its core business operations.

HP, Dell, Acer, Asus Eye Chinese Memory Chips Amid Crunch

PC makers HP, Dell, Acer and Asus are considering sourcing memory chips from Chinese chip-makers for the first time amid a global supply crunch that is threatening product launches and pushing up costs across the tech industry, Nikkei Asia reported on Thursday. Reuters could not

immediately verify the report. HP, Dell, Acer and Asus did not immediately respond to Reuters' request for comment. This comes at a time when global electronics supply chains are grappling with an acute shortage of memory chips. Reuters

Wall St Slips as Alphabet Capex Plan, Qualcomm Outlook Deepen Tech Stock Rout

Reuters

New York: The S&P 500 dropped to an over two-week low and the Nasdaq sank to its lowest level in more than two months on Thursday, as the AI theme came under renewed pressure after Alphabet's spending plans and Qualcomm's downbeat forecast rattled investors.

Shares of Alphabet fell 4.3% after the Google parent said it would double its capital expenditure this year, signalling another aggressive push to strengthen its position in the AI race.

Alibaba slid 8.2% after forecasting second-quarter revenue and profit below estimates. The pressure spread across tech mega-caps, with Microsoft and Tesla down 3.4% and 3.7%.

Big Tech is expected to collectively funnel more than \$500 billion into the buildout this year, reigniting questions about sky-high valuations and when returns will actually show up. Those worries sharpened after Microsoft's results, sending traders out of pricey tech and into cheaper pockets of the market.

The CBOR volatility index, Wall Street's "fear gauge," rose 3.8 points to 20.49, hitting an over-two-month high. Amazon, another "Magnificent 7" stock, dropped 4.3% ahead of results, due after the market close.

"The AI trade which was the accelerator last year is perhaps the extinguisher this year with people realizing that AI is going to help certain kinds of companies but it is also going to hurt, particularly software," said Melissa Brown, SimCorp's managing director of investment decision research. "Earnings were reported and not quite as good as investors had hoped for, that was a catalyst for a sell-off."

Software and data services stocks such as ServiceNow and

Salesforce were down 5% and 4% respectively.

The declines deepened an already bruising week for the group, as investors fret that rapidly improving AI tools could start eating into demand for traditional software, and squeezing growth expectations across the sector.

The S&P 500 software and services index slid 4.2%, chalking up a seventh straight session in the red and wiping out about \$830 billion in market value since January 28.

Amid risk-off sentiment, silver and the white metal plunging almost 13%, after rebounding in the last couple of days from a sharp drop. Bitcoin fell below the \$70,000 mark.

As traders dialed back exposure to pricey AI stocks, the market's rotation into cheaper, overlooked corners kept gathering steam. The S&P 500 small-cap index, the S&P 500 value index and the S&P 400 mid-cap index were all on track for weekly gains, even as the S&P 500 was starting at a drop of more than 2%.

At 11:07 a.m. ET, the Dow Jones Industrial Average fell for example, to 20,490.60, or 1.30%, to 48,866.74, the S&P 500 lost 95.74 points, or 1.80%, to 6,788.87 and the Nasdaq Composite lost 401.99 points, or 1.76%, to 22,500.42. Consumer staples, a defensive sector, was the only one of the index's 11 sectors trading in the green.

Projects Worth ₹31k crore to be Funded Via Green Bond Proceeds

Banikankar Pattanayak

New Delhi: The government has lined up projects worth almost ₹31,000 crore that will be funded mainly through its green bond proceeds. The projects are worth almost a third higher than the revised estimate for the current fiscal, signalling heightened focus on sustainable financing, a senior finance ministry official said.

The Centre will decide the precise amount of the sovereign green bond float in FY27 in March when it finalises its borrowing plan for the next fiscal, but usually the project pipeline is ready for such funding well before. However, the funding requirement for the committed projects influences the size of the bond issue.

The government finances these projects through its general resources mop-up by green bond proceeds till short.

The government has already raised ₹15,000 crore via green bonds this fiscal year.

New and renewable energy projects worth ₹12,700 crore have been identified for green financing in FY27, more than four times of ₹3,250 crore this fiscal.

Railways remain the top contender for such funds, as it has identified projects worth ₹5,900 crore for green financing.

The projects, identified by relevant departments and ministries, are assessed by a team led by the chief economic adviser before approval for green financing.

FOCUS: BUDGET 2026

What Changed? What Matters?

HEALTH AWARENESS INITIATIVE

Major healthcare boost for Assam

CM Himanta Biswa Sarma leads Assam's leap to AI-driven hospitals, anchors Lord's Mark Industries as strategic partner

Assam CM Himanta Biswa Sarma and Manav Teli, Executive Director, Lord's Mark Industries Ltd., at Gauhati Medical College and Hospital (GMCCH)

In a landmark step towards redefining India's public healthcare infrastructure, Lord's Mark Industries Ltd. announced the successful installation of the world's first AI-based, contactless remote patient monitoring system at Gauhati Medical College and Hospital (GMCCH). The advanced system has been deployed in a top-down ICU ward as part of the newly inaugurated medical college complex.

The facility was formally inaugurated by the Hon'ble Chief Minister of Assam, Himanta Biswa Sarma, marking a defining moment in the state's healthcare journey and positioning Assam at the forefront of AI-enabled clinical care in India.

The initiative reflects the proactive leadership of the Hon'ble Chief Minister, who has taken a clear and deliberate step to elevate Assam's public healthcare infrastructure to world-class standards. By championing the adoption of advanced AI-driven clinical technologies in partnership with Lord's Mark Industries Ltd., the state is ensuring that its citizens gain access to more accurate diagnostics, faster clinical guidance, and globally benchmarked standards of care, setting Assam apart as a national leader in future-ready healthcare delivery.

With this deployment, Assam becomes India's first state to operationalise an AI-driven hospital model within the public healthcare system, leveraging continuous,

non-invasive patient monitoring to enable early risk detection, real-time clinical insights, and faster, more accurate medical decision-making. The system eliminates physical contact while tracking vital parameters round-the-clock, enhancing patient safety, infection control, and clinical efficiency, particularly in high-dependency care settings.

Commenting on the development, Dr. Sachindranand Upadhyay, Managing Director and CEO, Lord's Mark Industries Ltd., said, "India's healthcare system is at a pivotal inflection point where technology must move beyond pilot projects to become core clinical infrastructure. Our collaboration with the Government of Assam reflects a shift from reactive care to predictive,

AI-led healthcare delivery. By deploying the world's first contactless, AI-based remote patient monitoring system, we are enabling clinicians with continuous, real-time insights that support more accurate diagnosis, timely intervention, and improved patient outcomes. Assam's leadership in adopting this model sets a powerful national benchmark for scalable, future-ready public healthcare."

The initiative aligns with Assam's broader ambition to strengthen healthcare access and quality through advanced digital infrastructure, while also serving as a replicable blueprint for other states, central health institutions, and private hospital networks across India.

For Lord's Mark Industries Ltd., the deployment reinforces its strategic focus on building globally relevant, AI-enabled healthcare technologies that address real-world clinical challenges, while working closely with governments and institutions to modernise India's healthcare ecosystem.

As India accelerates toward technology-enabled public services, this milestone in Assam stands as a powerful signal of what is possible when policy vision, innovation, and execution come together—setting a new national benchmark for AI-led healthcare transformation.

TALKS RESUME AFTER PAUSE

India Charts New Trade Course as it Inks FTA Terms with GCC

Piyush Goyal during the signing of FTA terms between India and the GCC

Our Bureau
New Delhi: India and the so-called Gulf Cooperation Council (GCC) Thursday inked terms of reference for starting talks for a Free Trade Agreement (FTA). The 25 Asian bloc is the largest trading partner of India with bilateral goods trade of \$178.36 bn in FY25. Saudi Arabia, the UAE, Qatar, Kuwait, Oman and Bahrain are members of the GCC. The terms of reference (ToR) outline the scope and modalities of a proposed trade pact. Commerce and industry minister Piyush Goyal, who presided over the signing ceremony of the ToR with the GCC, said that the trade pact brings predictability to policy. It will benefit the petrochemical industry and create opportunities for the ICT industry.

It is most appropriate that we now enter into a much stronger and robust trading arrangement which will enable a greater free flow of goods, services, bring predictability and stability to policy help encourage a greater degree of investments," Goyal said. "The two trading partners have been trading amongst each other for over 5,000 years and about 10 million Indians are living and working in the GCC area."

Launch of FTA talks with the GCC would be a kind of resumption of the negotiations, as several rounds of negotiations were held in 2006 and 2006 between the two regions.

The third round did not happen as GCC deferred its negotiations with all countries and economic groups. Goyal said the agreement will also encourage the food and energy security of the two sides.

Indian Oil's Q3 Net Surges to ₹12,126 cr on Strong Margins

Our Bureau
New Delhi: Indian Oil Corp's net profit surged more than fourfold to ₹12,126 crore in the December quarter from ₹2,873 crore a year earlier, as lower crude oil prices and stable pump prices lifted fuel margins. Revenue from operations grew 107.23% to ₹78,769 crore during the quarter.

The nation's largest refiner and fossil fuel retailer reported a more than doubling of gross refining margin of \$8.41 per barrel for the April-December period, from \$5.59 per barrel a year ago. For the first half of FY26, GRM averaged \$8.32 per barrel.

Operating profit from petroleum products, which fell to ₹14,826 crore from ₹11,171 crore a year earlier, also saw a sharp rise. Overall, sales of petroleum products, valued at ₹73.38 billion in the quarter, saw a 1.7% increase. Its shares closed 1.7% higher at ₹255.50 apiece on the BSE Thursday.

while losses in the petrochemical business more than doubled to ₹38 crore from ₹15 crore. The company received ₹2,494 crore in compensation from the government for selling cooking gas below market rates, which supported quarterly revenues and profits.

Indian Oil's operating margin expanded sharply to 7.25% during the quarter from 1.49% a year earlier. Overall sales of petroleum products, valued at ₹73.38 billion in the quarter, saw a 1.7% increase. Its shares closed 1.7% higher at ₹255.50 apiece on the BSE Thursday.

Suzlon Q3 Profit Jumps 15% on Strong Tailwind

MORE DELIVERIES Earnings growth fuelled by co's highest-ever quarterly deliveries of 617 MW, an increase from 447 MW in Q3 FY25

Our Bureau
Mumbai: Renewable energy company Suzlon Energy on Thursday reported a 15% rise in fiscal third-quarter consolidated net profit at ₹45.20 crore compared to ₹38.32 crore a year earlier. Revenue from operations grew 42% to ₹4,228.30 crore in the three months ended December 31, from ₹2,968.81 crore in the year-ago period. The earnings growth was fuelled by the company's highest-ever quarterly deliveries of 617 MW, an increase from 447 MW delivered in Q3 FY25, according to regulatory filing.

"Our closing order book of 8.4 GW stands higher than the opening order book for the quarter, despite the highest-ever deliveries in 50 years," said JP Chaitanya, chief executive of Suzlon Energy.

The company's Ebitda surged 48% to ₹709 crore during the quarter under review, from ₹480 crore in the same quarter last year. Ebitda margin improved to 17.5% from 16.3% year-on-year. Suzlon Energy ended the quarter with net cash of ₹1,366 crore and a project development pipeline of over 25 GW and execution of 2.4 GW currently underway.

Girish Parth, vice-chairman, Suzlon Group, said the company has initiated Suzlon 2.0, a comprehensive business transformation strategy aimed at establishing itself as a full-stack clean energy solutions conglomerate.

He noted that this strategic shift has broadened the company's scope across wind, solar, storage, and emerging clean energy technologies.
