

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture, or by increasing the productivity of the land that is already being used.

Another way to meet this demand is to reduce the amount of food that is wasted. This can be done by improving the way that food is stored and distributed, or by changing the way that people eat.

There are many other ways to meet the world's growing demand for food and other resources. It is important that we find ways to do this in a sustainable way, so that we can meet the needs of the world's population for many years to come.

One of the most important ways to do this is to protect the environment. This means taking steps to reduce the amount of pollution that we produce, and to conserve the natural resources that we need.

Another important way to do this is to improve the way that we use energy. This means finding ways to use less energy, and to use energy that is cleaner and more sustainable.

There are many other things that we can do to protect the environment and to conserve the natural resources that we need. It is important that we all do our part to make sure that we can meet the needs of the world's population for many years to come.

One of the most important things that we can do is to educate the public about the importance of the environment and the need to conserve the natural resources that we need.

Another important thing that we can do is to support the work of the environmental organizations that are working to protect the environment and to conserve the natural resources that we need.

There are many other things that we can do to protect the environment and to conserve the natural resources that we need. It is important that we all do our part to make sure that we can meet the needs of the world's population for many years to come.

One of the most important things that we can do is to reduce the amount of waste that we produce. This can be done by recycling, or by using less of the things that we need.

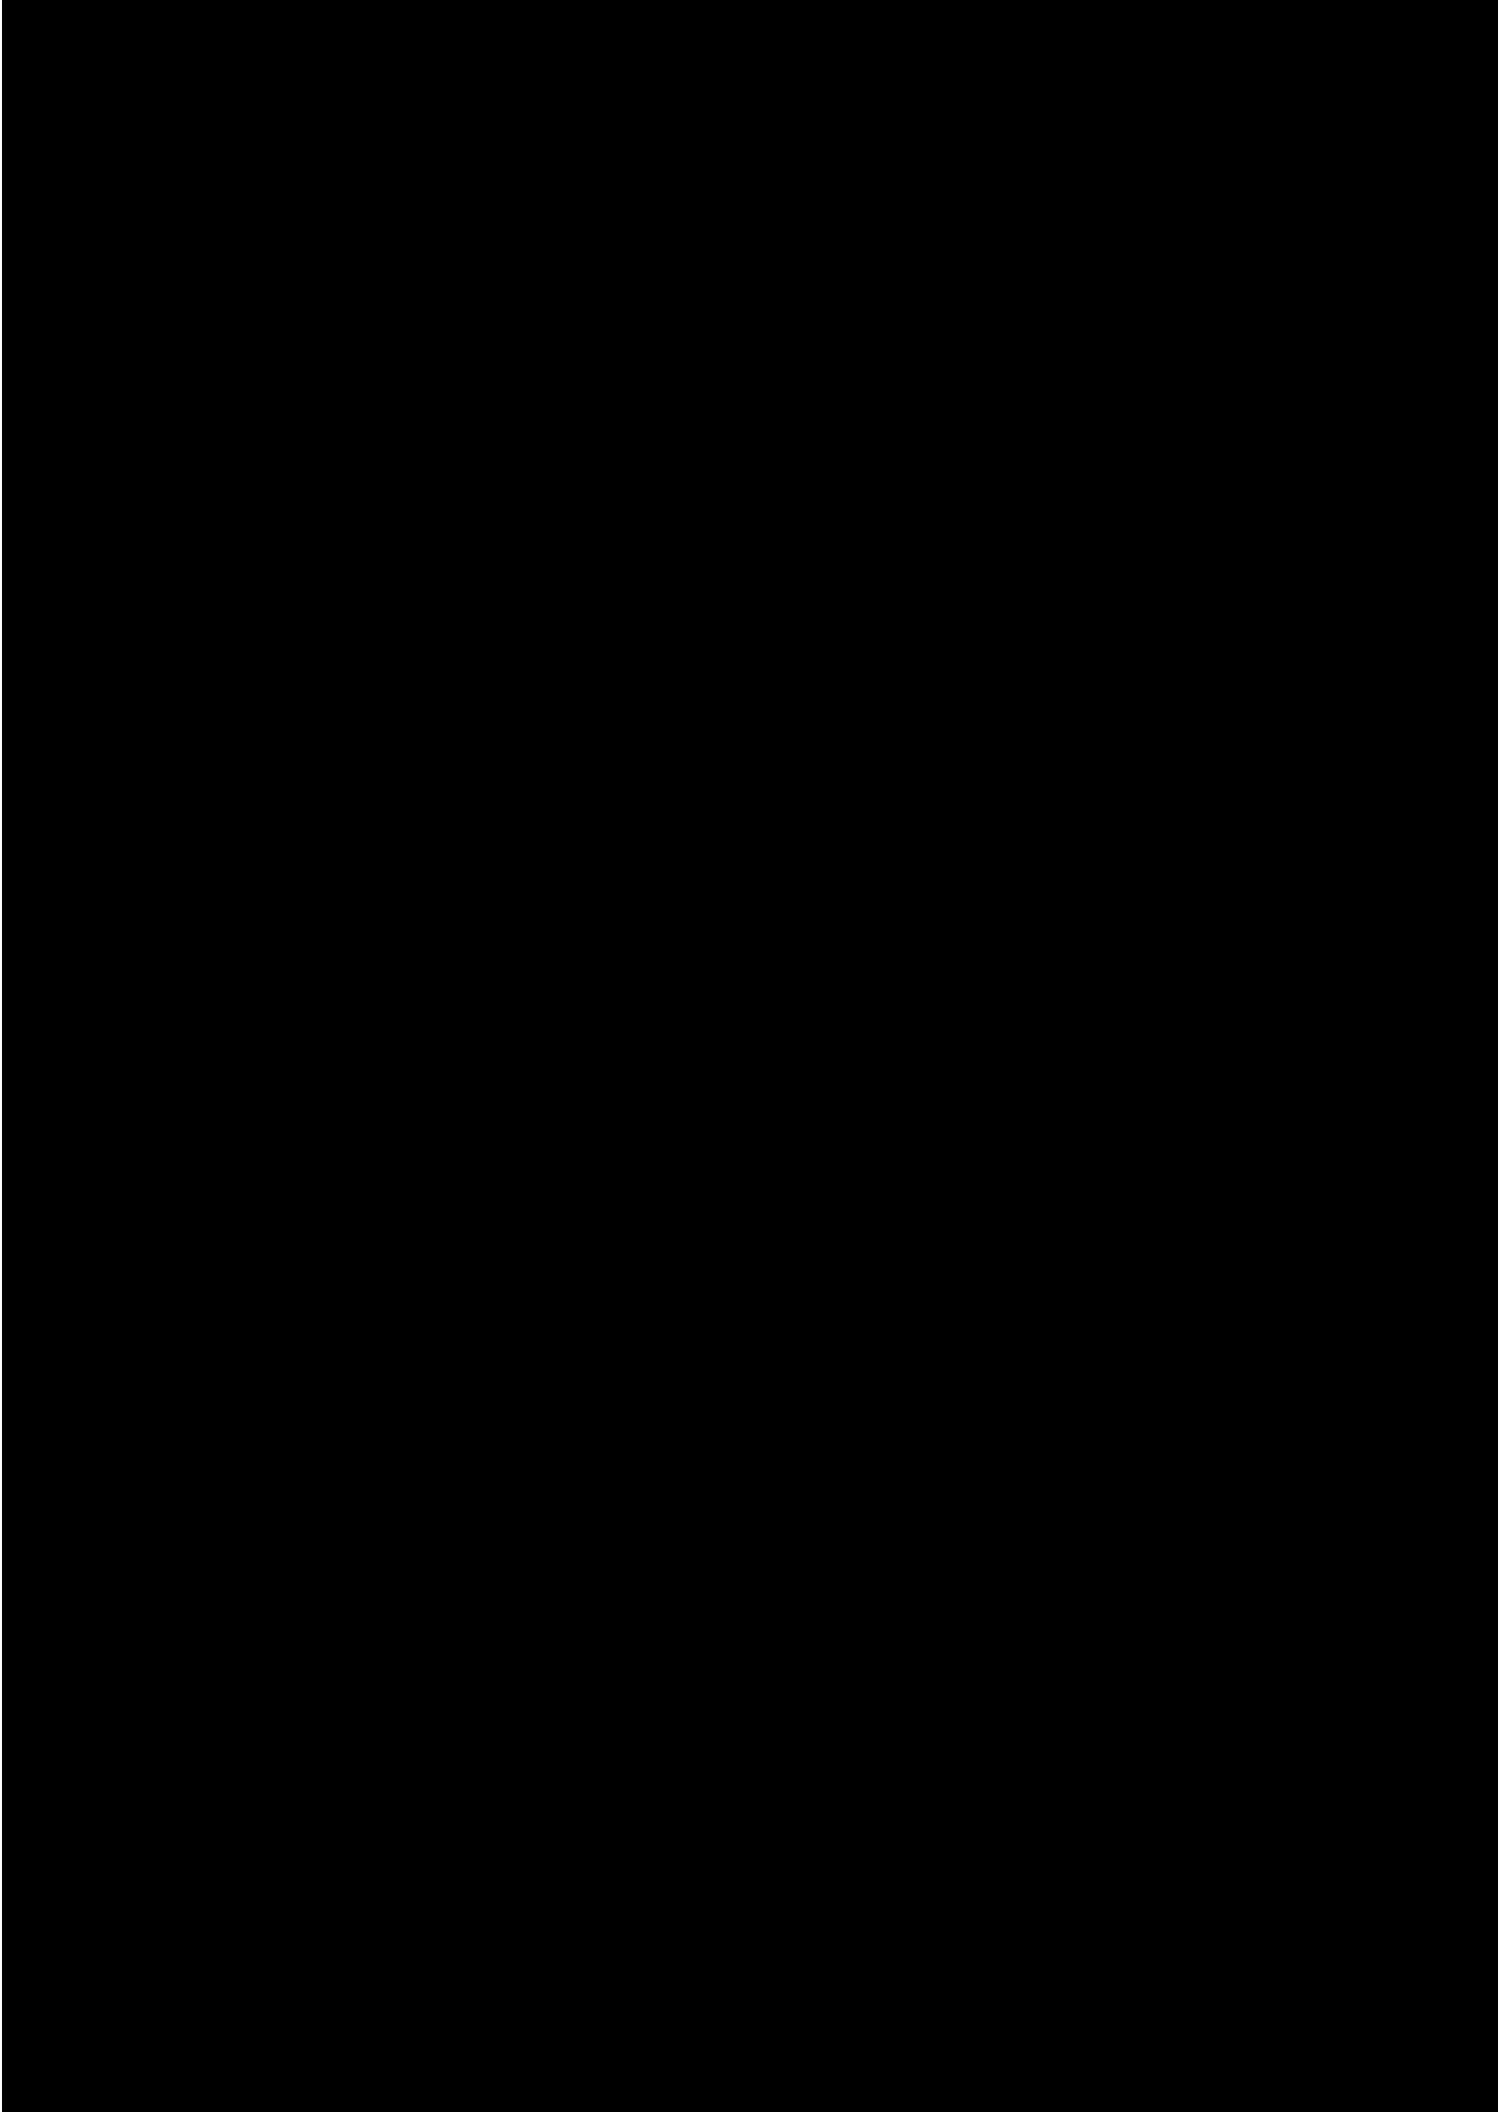

Another important thing that we can do is to use energy more efficiently. This can be done by using energy-saving devices, or by using energy that is cleaner and more sustainable.

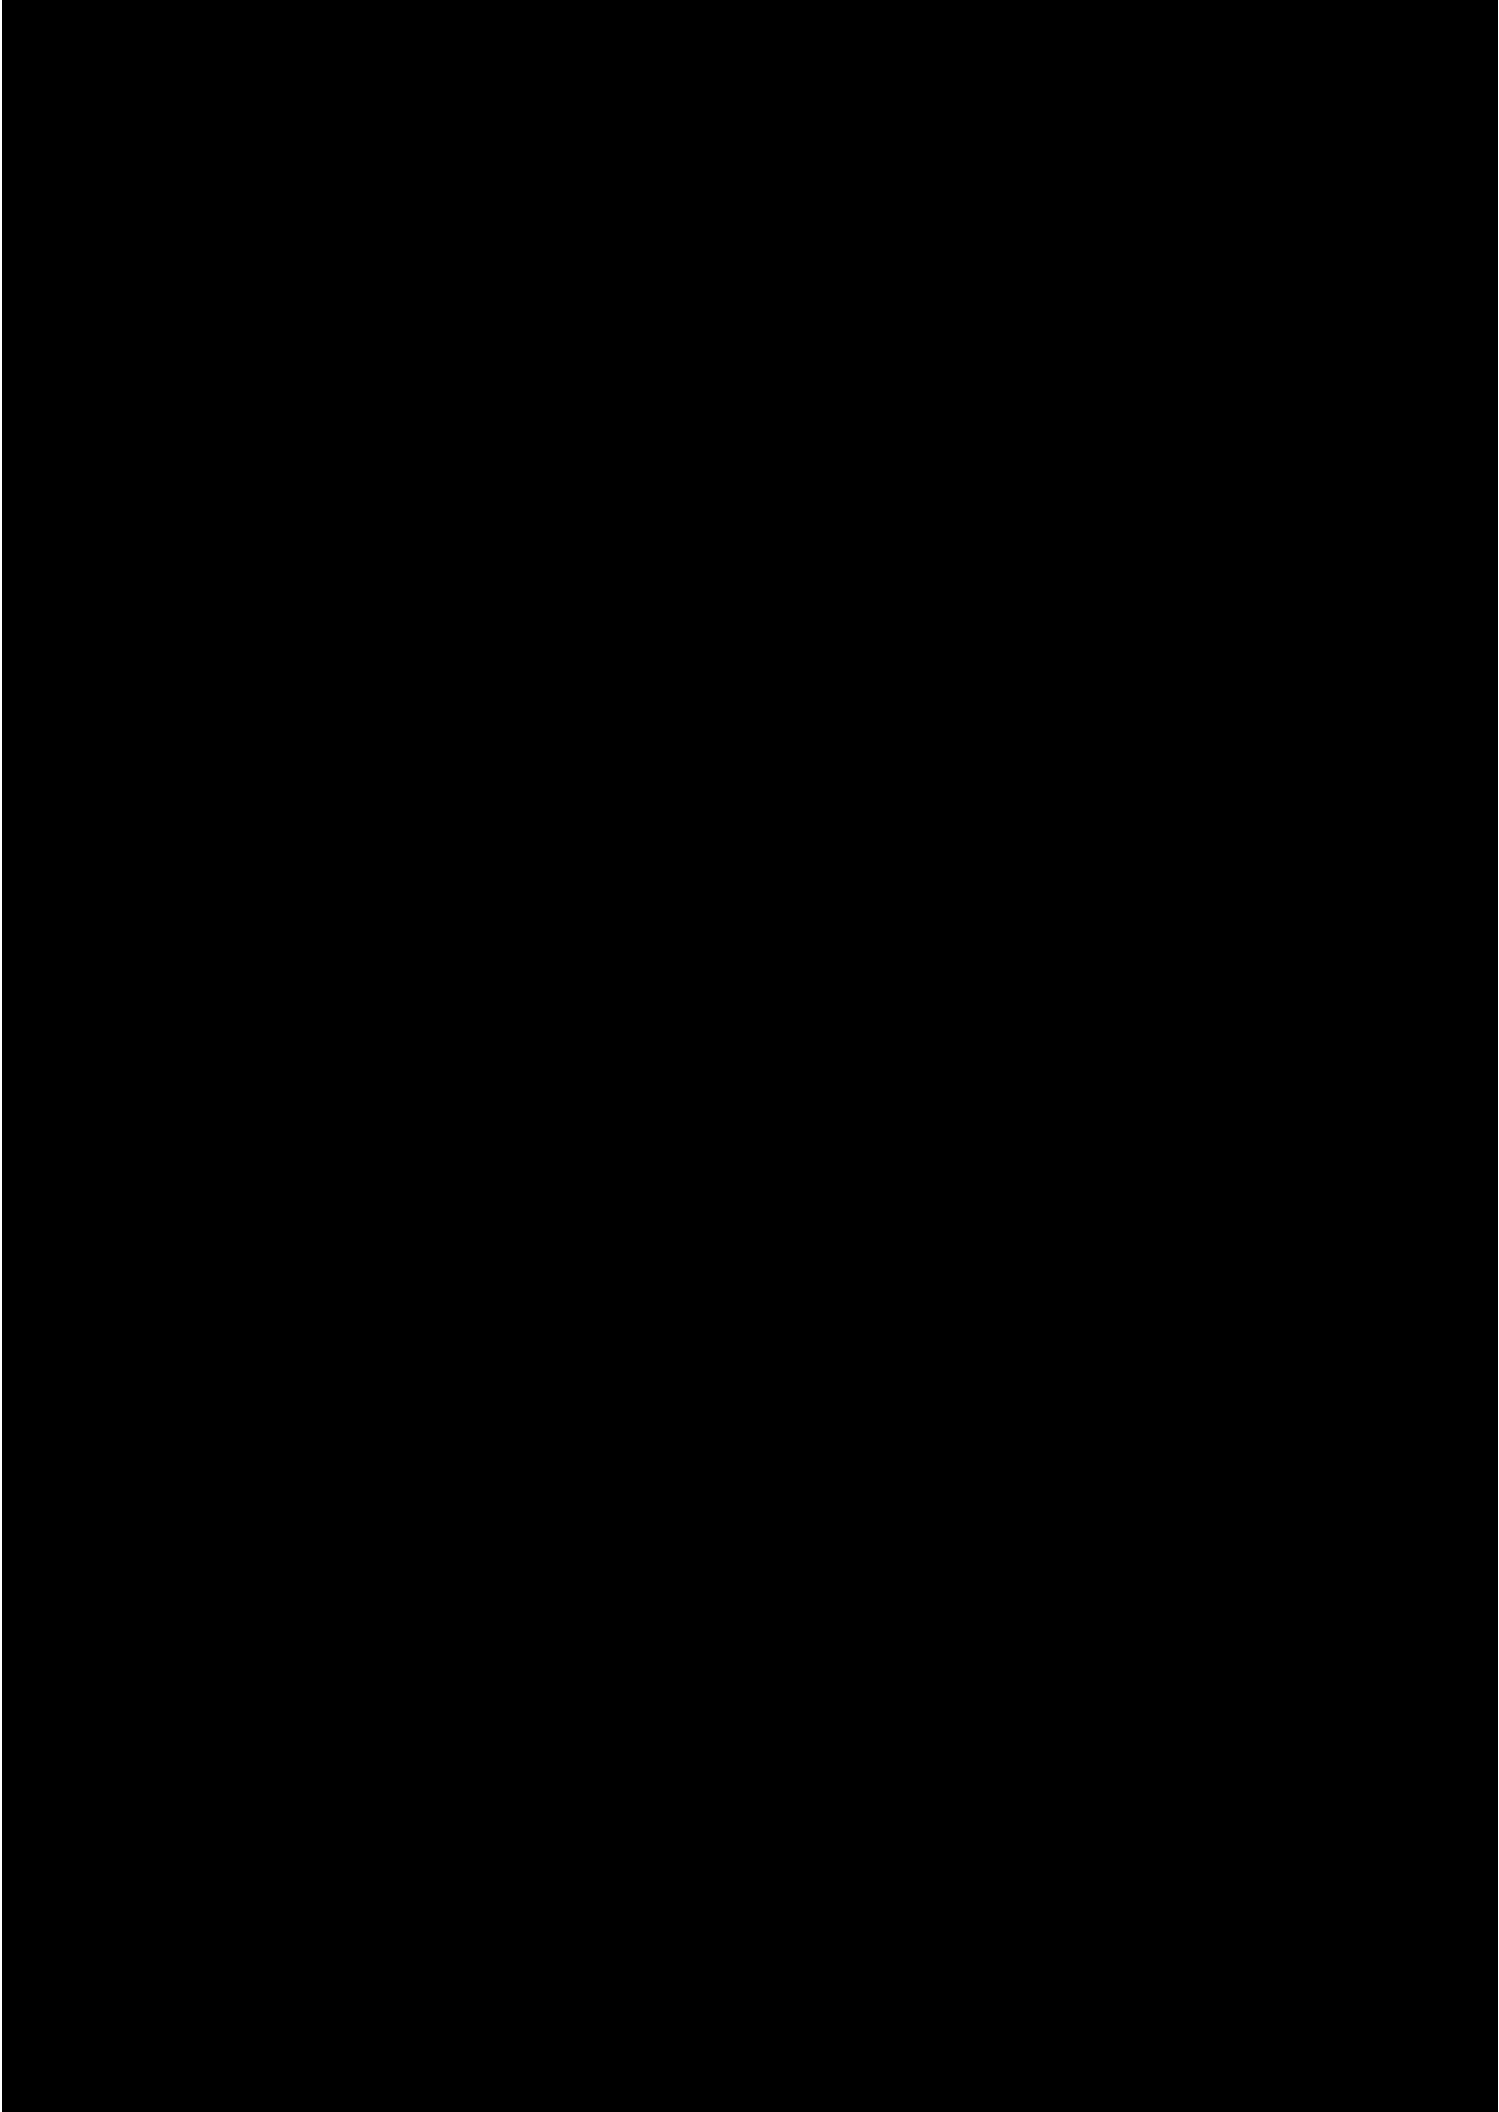

There are many other things that we can do to protect the environment and to conserve the natural resources that we need. It is important that we all do our part to make sure that we can meet the needs of the world's population for many years to come.

One of the most important things that we can do is to protect the ozone layer. This can be done by reducing the amount of ozone-depleting substances that we use.

Another important thing that we can do is to protect the world's forests. This can be done by stopping the logging of old-growth forests, and by planting new trees.

There are many other things that we can do to protect the environment and to conserve the natural resources that we need. It is important that we all do our part to make sure that we can meet the needs of the world's population for many years to come.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 50% of public sector employees being women in 1995 (Department of Social Security 1996). The public sector has also become an important employer of people with disabilities, with 10% of public sector employees being people with disabilities in 1995 (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 50 years of age. In 1995, 10% of public sector employees were over 50 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 60 years of age. In 1995, 10% of public sector employees were over 60 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 65 years of age. In 1995, 10% of public sector employees were over 65 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 70 years of age. In 1995, 10% of public sector employees were over 70 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 75 years of age. In 1995, 10% of public sector employees were over 75 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 80 years of age. In 1995, 10% of public sector employees were over 80 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 85 years of age. In 1995, 10% of public sector employees were over 85 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 90 years of age. In 1995, 10% of public sector employees were over 90 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 95 years of age. In 1995, 10% of public sector employees were over 95 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 100 years of age. In 1995, 10% of public sector employees were over 100 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 105 years of age. In 1995, 10% of public sector employees were over 105 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 110 years of age. In 1995, 10% of public sector employees were over 110 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 115 years of age. In 1995, 10% of public sector employees were over 115 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 120 years of age. In 1995, 10% of public sector employees were over 120 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 125 years of age. In 1995, 10% of public sector employees were over 125 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 130 years of age. In 1995, 10% of public sector employees were over 130 years of age (Department of Social Security 1996).

The public sector has also become an important employer of people who are over 135 years of age. In 1995, 10% of public sector employees were over 135 years of age (Department of Social Security 1996). The public sector has also become an important employer of people who are over 140 years of age. In 1995, 10% of public sector employees were over 140 years of age (Department of Social Security 1996).

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.4 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture, by using more water, or by using more fertilizers.

Another way to meet this demand is to reduce the amount of food that is wasted. This can be done by improving the way that food is stored and distributed.

There are many other ways to meet this demand, and it is important that we find ways to do so in a sustainable way.

One of the most important things we can do is to protect the environment. This means protecting the land, the water, and the air.

By protecting the environment, we can ensure that there is enough food and other resources for everyone in the world.

It is our responsibility to ensure that the world is a better place for everyone, and that is why we must protect the environment.

Let us all work together to make the world a better place for everyone.

Thank you for your attention.

Yours faithfully,
