---	--

Subject: Intimation under Regulation 30 of SEBI (LODR) Regulations, 2015- Press Release

Pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby inform you that our subsidiary, ARAPL RaaS Private limited, has received an another order from a leading US-based logistics and warehouse management company for the supply of autonomous mobile robots.

Key highlights of the order are as follows:

- Humro will supply six new mobile robots on a two-year lease arrangement for a total consideration of Rs. 4.13 crore.
- This marks a major breakthrough in the US market for Humro and is expected to bolster the company’s presence in the North American logistics automation sector.
- Humro currently has four approved “Make in India” mobile robotics products in its portfolio and aims to accelerate its expansion in the US business landscape.

This development is in line with the company's strategy to enhance international business opportunities and leverage its innovative products in global markets.

We request you to kindly take the above information on your records.

Thank you.

Yours faithfully

For Affordable Robotic & Automation Limited

ARAPL subsidiary Humro wins major US order for Autonomous robots

- *To supply six new mobile robots on a two year lease for Rs 4.13 crore to a large US logistics and warehouse management player*
- *With four approved Make in India mobile robotics products in the portfolio, company sets sights on accelerating US business*

Mumbai | Pune, India – November 6, 2025: Affordable Robotic and Automation Limited (ARAPL) (BSE: 541402 | NSE: AFFORDABLE), India's first listed robotics company, today announced that its subsidiary, ARAPL RaaS (Humro), has secured another order for its autonomous forklift from a leading US-based logistics player. The order marks Humro's entry into a new product category and represents a significant milestone in ARAPL's global expansion journey.

Following comprehensive and successful prototype trials conducted over the past three months at the client's facilities, the new order includes six robots valued at Rs 4.13 crore, leased for a period of two years. This order opens the door to large-scale deployment opportunities, with the potential for 47–50 mobile robots to be installed in each of the client's two US warehouses over the next two years.

"With an increasing number of customers validating our products, we are delighted and deeply encouraged by this growing confidence in our technology," said **Milind Padolee, Founder & Managing Director, ARAPL**. "This order, following stringent approvals and successful prototype performance, not only opens new avenues for us but also reinforces our vision of positioning Make in India mobile robots on the global stage — in a sector currently dominated by large US and Chinese players. This achievement propels us closer to that goal, strengthening our ambition to scale next-generation automation platforms across international markets, he said.

Equipped with LiDAR-based navigation, real-time obstacle detection, and precision control algorithms, the fully autonomous robots are engineered for safe, 24/7 operations. They integrate seamlessly with Warehouse Management Systems (WMS) and ERP platforms, improving productivity while reducing operational costs.

A key driver of ARAPL's global vision, ARAPL RaaS (Humro) specialises in Autonomous Mobile Robots (AMRs) for warehouses, manufacturing plants, and logistics hubs. Powered by ARAPL's proprietary i-ware controller, Humro leverages AI, advanced navigation, and swarm robotics to deliver scalable and intelligent automation solutions.

To accelerate growth, ARAPL has announced a proposed investment of USD 8–10 million in Humro, including USD 3 million infused personally by Mr Milind Padolee. The infusion, structured as an interest-free loan, includes an option for conversion into equity.

"Being a deep-tech robotics player in a high-growth global market, Humro has consistently delivered on its promise since its inception in 2021. With a robust product portfolio and strong client validation, we are now well-positioned to expand our customer base," added Padolee.

As industries worldwide fast-track automation adoption, ARAPL stands at the intersection of AI, robotics, and human ingenuity, driving the next era of intelligent manufacturing and logistics.

Founded in 2005 by Milind Padolee, ARAPL has evolved from a Pune-based startup into a global automation powerhouse with a 350,000 sq. ft. facility, 400+ employees, and a portfolio of over 7,000 industrial robots and 10,000 automated car parking systems.

The company made history in 2018 as India's first listed robotics firm, debuting on the BSE SME Exchange at Rs 85 per share and migrating to the main boards of NSE and BSE in 2024. With nine patents, three proprietary software platforms, and a strong R&D pipeline, ARAPL continues to innovate across industrial automation, robotic inspection, warehouse systems, and AI/ML-powered solutions.

About ARAPL

Affordable Robotic & Automation Ltd. (ARAPL), established in 2005 and headquartered in Pune, India, is a leading provider of turnkey automation solutions for various industries. With over a decade of expertise, ARAPL serves a wide range of sectors, including automotive, non-automotive, general industries, and the government sector, extending its customer base across India, China, and other parts of Asia. The company specialises in industrial automation solutions such as line automation, robotic inspection stations, and automated assembly systems, with significant expertise in robotic welding cells and automated car parking systems. Spanning 120,000 square feet with over 250 employees, ARAPL has expanded its operations with multiple facilities, including a sales and service office in Faridabad and a new manufacturing facility in Wadki, Pune. In 2018, ARAPL achieved a significant milestone by being listed on the Indian stock exchange, marking its growth and success in the automation industry.

About Humro

Humro (an ARAPL RaaS brand) is India's leading deep-tech robotics company, specializing in autonomous mobile robotic solutions for manufacturing, warehousing, and industrial shippers. Its intelligent, safety-certified AMRs are powered by patented technology, proprietary FleetOps software, and secure iWare integration, delivering enterprise-grade automation with unmatched affordability. With flexible ownership models including Robotics-as-a-Service (RaaS), leasing, and perpetual licenses, Humro enables businesses of all sizes to scale operations, boost efficiency, and modernize without heavy upfront investment.
