DEE Development Engineers Limited Appoints Brham Prakash Yadav as Chief Financial Officer

Delhi, January 07, 2026: DEE Development Engineers Limited (DDEL) (BSE: 544198; NSE: DEEDEV), a leading name in process piping solutions, announces the appointment of Mr. Brham Prakash Yadav as Chief Financial Officer, effective January 2026. Mr. Yadav is a Chartered Accountant and Cost Accountant with over 30 years of extensive experience in finance and operations within large, multi-plant manufacturing organizations. He possesses a strong track record in governance, capital allocation, and performance enhancement in listed company environments.

This appointment follows a robust first half of FY26, during which DDEL reported a 39.2% year-on-year increase in Q2 FY26 Operating Income, reaching ₹27,000 lakhs, alongside a 47.9% rise in Operating EBITDA to ₹4,406 lakhs, with margins expanding to 16.3%. For H1 FY26, Revenue from Operations grew by 30.3% year-on-year to ₹49,376 lakhs, supported by an order book of ₹1,332.53 crore as of 30 November 2025 and sustained momentum in the power and oil and gas sectors. In this context, Mr. Yadav will play a pivotal role in fortifying financial strategy, capital planning, and governance to underpin DEE's forthcoming growth phase.

Most recently, Mr. Yadav served as Chief Financial Officer and Board member at Munjal Auto Industries Limited, a publicly listed automotive components manufacturer with revenues exceeding ₹1,800 crore. There, he oversaw finance, treasury, taxation, internal controls, and investor relations across multiple manufacturing sites. His prior roles include leadership of finance functions at prominent engineering and auto-component companies, where he spearheaded initiatives in financial planning and analysis, working capital optimization, internal financial controls, and regulatory compliance.

Mr. K.L. Bansal, Chairman and Managing Director of DEE Development Engineers Limited, remarked, "Brham brings a comprehensive blend of financial discipline, operational insight, and leadership acumen across large manufacturing enterprises. His extensive experience with capital-market transactions – including IPOs, private equity, mergers and acquisitions, and complex capital-raising activities – combined with a demonstrated ability to enforce cost and cash discipline, will be instrumental as DEE scales operations and explores new growth opportunities domestically and internationally."

Throughout his career, Mr. Yadav has been instrumental in several high-impact financial initiatives, including private debt funding of approximately ₹400 crore, multiple plant acquisitions, large-scale greenfield projects, and enterprise-wide cost and control programs that have significantly enhanced profitability and cash flow. He has also led the implementation of management dashboards, plant-level cost controls, and working capital improvements, resulting in reduced interest expenses and improved return on capital employed.

Mr. Brham Prakash Yadav stated, "DEE has established itself as a trusted specialist in process piping solutions, supported by a strong order book and an expanding global presence. I look forward to collaborating with the leadership team to further strengthen financial governance,

enhance capital efficiency, and support disciplined, sustainable growth aligned with the company's strategic priorities and stakeholder interests."

DEE Development Engineers remains committed to disciplined execution, financial transparency, and strategic expansion as it advances its long-term growth objectives within key energy and infrastructure sectors.

About DEE DEVELOPMENT ENGINEERS LIMITED

DDEL is the largest player in process piping solutions in India in terms of installed capacity, with strategically located state-of-the-art manufacturing facilities. It is an engineering company providing specialized process piping solutions for industries such as oil and gas, power (including nuclear), process industries, and chemicals through engineering, procurement, and manufacturing services. DEE also manufactures and supplies piping products such as high-pressure piping systems, piping spools, high-frequency induction pipe bends, LSAW pipes, industrial pipe fittings, pressure vessels, industrial stacks, modular skids, and accessories, including boiler superheater coils, de-super heaters, and other customized manufactured components, while also specializing in handling complex metals such as varying grades of carbon steel, stainless steel, super duplex stainless steel, alloy steel, and other materials including Inconel and Hastelloy in our manufacturing processes.
