Subject: Intimation under Regulation 30 of SEBI (LODR), 2015 – Update on “Silver AI” User Adoption, Promotional Pro Access and Indicative Revenue Potential.

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform the Exchange that “Silver AI”, the Company’s AI-enabled web platform, has received a strong and encouraging response from users since its launch.

Platform URL: ai.silverlinetechnologies.in

User Adoption Update

- The platform has crossed 24,000 registered users within a short period from launch.
- The Company continues to observe robust and accelerating growth in user registrations and engagement on a week-on-week basis.

Promotional Access to Pro Version

- To further accelerate adoption and enhance user experience, the Company has decided to provide access to the Pro version of “Silver AI” free of cost to all users for the next six (6) months, subject to applicable terms and conditions.
- This initiative is intended to maximise platform usage, collect structured feedback, and strengthen product stability ahead of large-scale monetisation.

Indicative Pricing Strategy and Revenue Projections

- Based on current adoption trends, the Company is evaluating a volume-driven pricing strategy for the Pro version of “Silver AI”.

-
- Subject to the platform reaching approximately 500,000 registered users within the next 45 days, the Company plans to reduce the Pro subscription fee to USD 9 per user per month, with the objective of driving mass adoption and higher conversion rates.
 - At this price point, the platform demonstrates significant revenue scalability, as illustrated below:
 - $500,000 \text{ users} \times \text{USD } 9 \text{ per month} = \text{USD } 4.5 \text{ million per month}$
 - Equivalent to ~USD 54 million per annum
 - At current exchange rates, this translates to approximately ₹430–₹450 crore in annualised revenue potential, assuming full Pro adoption.
 - Even at lower Pro conversion levels, the revenue impact remains meaningful. For illustration:
 - 10% conversion (50,000 Pro users): ~USD 450,000 per month (~₹43 crore annualised)
 - 20% conversion (100,000 Pro users): ~USD 900,000 per month (~₹86 crore annualised)

These figures are indicative in nature and intended solely to illustrate the scalability and revenue potential of a subscription-based model at scale.

Ongoing Development and Product Enhancement

- The Company continues to actively enhance “Silver AI” across performance, features, usability, and scalability.
- Continuous user feedback and usage analytics are being incorporated to make the platform more robust, reliable, and valuable for a broad user base.

Supporting Information

- Screenshots evidencing user growth and platform adoption trends over recent weeks are attached herewith for reference.

The Company believes that the early traction of “Silver AI”, combined with a scalable pricing model and growing user base, reinforces its strategic objective of building AI-led, product-driven, recurring revenue streams.

Forward-Looking Statement

Certain statements in this communication, including those relating to projected users, pricing strategy, conversion rates, and revenue potential, are forward-looking in nature and subject to risks and uncertainties. Actual results may differ materially.

Further material updates, if any, will be disclosed in accordance with applicable regulatory requirements.

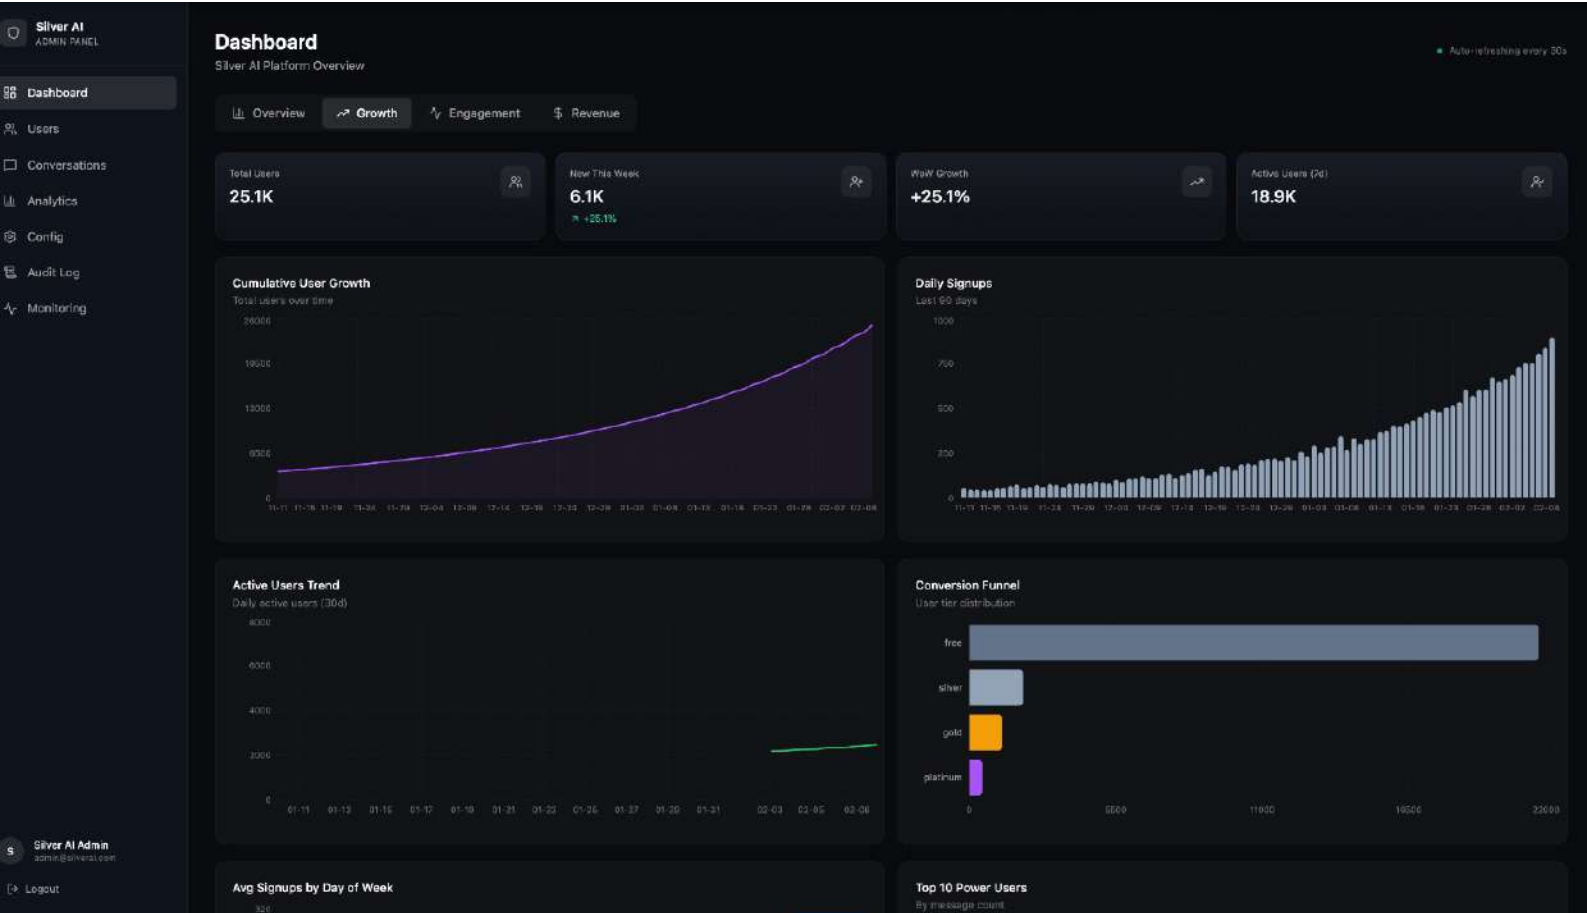

Kindly take the above information on record.

Thanking You,
Yours Faithfully,
For **Silverline Technologies Limited**
