Blue Cloud Softech Signs USD \$8.90 Million MOU with LedgerFi IT Solutions to Drive Zanzibar Government's Digital Transformation

Strategic Partnership Set to Deploy Advanced Blockchain, AI, and Cloud Infrastructure for eDUA Unified Digital Government Platform.

Hyderabad, Telangana, July, 10 2025 – Blue Cloud Softech Solutions Limited (BCSSL), a global leader in Cybersecurity and technology solutions, has **Signed USD \$8.90 Million MOU with LedgerFi IT Solutions to Drive Zanzibar Government's Digital Transformation**

Blue Cloud Softech Solutions Ltd ("Blue Cloud"), a global leader in enterprise software and blockchain-based digital infrastructure, is pleased to announce the signing of a USD \$8.90 million Memorandum of Understanding (MOU) with UAE-India based LedgerFi IT Solutions ("LedgerFi"), a Web3-focused IT firm renowned for its expertise in defense and security innovations. This collaboration will power the Zanzibar Government's ambitious eDUA Unified Digital Government Platform (UDGP), marking a significant leap towards a fully digitized, efficient, and secure public sector ecosystem.

Project Overview

Under the terms of the agreement, Blue Cloud will act as the primary technology partner for the design, development, and end-to-end deployment of the eDUA UDGP, commissioned by the Zanzibar eGovernment Authority (eGAZ). This strategic initiative seeks to centralize, automate, and enhance access to government services for Ministries, Departments, Agencies, and Key Private Sector Entities, ensuring that citizens, residents, businesses, and NGOs benefit from seamless, transparent, and secure digital services.

The moment was captured as leaders from Blue Cloud Softech, LedgerFi, and representatives of the Zanzibar Government gathered to formally sign the landmark agreement, symbolizing a shared commitment to digital transformation and innovation.

From Left, Ravi Janartanan, Executive Director , Blue Cloud Softech Ltd, Mr. Said Seif Said, Director General, Zanzibar e-Government Authority (eGAZ), Hon. Hassan Khamis Hafidh, Deputy Minister, Ministry of Health Zanzibar and Mr Vinay Krishna , Founder Ledger Fi

Cutting-Edge Technologies Powering the eDUA Platform

The eDUA UDGP is envisioned as a next-generation platform, integrating state-of-the-art digital and data technologies to transform the way the government operates and interacts with its stakeholders. Core technologies to be implemented include:

- **Blockchain Technology:** The platform will leverage an enterprise-grade, permissioned blockchain framework to enhance data integrity, minimize fraud, and establish a tamper-proof audit trail for all transactions. This decentralized ledger will serve as the backbone for secure digital identities, document verification, and smart contract automation within government processes.
- **Artificial Intelligence & Machine Learning (AI/ML):** Intelligent automation will be at the heart of the eDUA platform. AI-driven modules will facilitate real-time analytics, predictive decision-making, and automated workflows, resulting in faster service delivery and improved citizen satisfaction. Machine learning algorithms will further optimize resource allocation and identify patterns to proactively address public sector challenges.
- **Cloud Infrastructure:** The eDUA solution will be hosted on a robust, scalable, and highly secure cloud environment, ensuring high availability, rapid deployment, and disaster resilience. Cloud-native microservices architecture will enable modular upgrades, seamless integration with legacy systems, and the ability to scale according to user demand.
- **Centralized Payment & Billing System (eDUA-ZanMalipo):** A unified payment gateway will be introduced to consolidate government-related payments, e-billing, and e-invoicing under a single digital wallet. Powered by blockchain and secured with advanced encryption, eDUA-ZanMalipo aims to reduce manual intervention, lower operational costs, and provide a seamless financial ecosystem for all stakeholders.
- **Cybersecurity & Data Privacy:** The platform will be fortified with advanced cybersecurity protocols, including multi-factor authentication, end-to-end encryption, and real-time threat monitoring to safeguard sensitive data and ensure privacy compliance as per global standards.
- **API Integration & Open Data:** eDUA will feature a comprehensive API gateway, allowing for easy integration with external services, third-party applications, and open data initiatives, thus fostering innovation and expanding the digital ecosystem.

Roles and Responsibilities

Blue Cloud Softech will spearhead the architectural design, core software development, and integration of the latest digital technologies. LedgerFi will manage the overall implementation, operational rollout, and stakeholder training, ensuring that the platform delivers on its promise of a digitally empowered Zanzibar.

Investment and Impact

The total project investment of USD \$8.90 million reflects a shared commitment to creating a revenue-generating and self-sustaining model for Zanzibar's eGovernment services. By leveraging advanced technologies, the collaboration aims to establish Zanzibar as a benchmark for digital governance across Africa and beyond.

Chairman's Message

On the occasion of signing the MOU with LedgerFi, Chairperson Smt. Janaki Yarlagadda stated, "It is with immense pride that we embark on this transformative journey with LedgerFi and the Revolutionary Government of Zanzibar. At Blue Cloud Softech, we believe in the power of technology to bridge gaps, foster transparency, and empower communities. The eDUA Unified Digital Government Platform is not just a technological upgrade—it's a step toward a more inclusive, accessible, and efficient future for all. By integrating cutting-edge blockchain, AI, and cloud solutions, we are committed to setting new standards for digital excellence and public service delivery. We look forward to witnessing Zanzibar shine as a beacon of digital innovation in Africa."
