Detailed Rationale & Key Rating Drivers

The revision in ratings assigned to the bank facilities of Lokesh Machines Limited (LML) takes into account improved financial performance of the company during FY18 (FY reers to the period from April 01 to March 31) and H1FY19 with increased revenue and profits, improvement in the capital structure of the company, improved liquidity position and in

as on March 31, 2018. Overall gearing ratio has improved in the last year on account of repayment of long term debt.

Improved liquidity position with improved operating cycle; albeit high reliance on bank borrowings owing to working capital-intensive nature of operations: The liquidity position of the company witnessed improvement backed by reduction in operating cycle. LML reported operating cycle of 226 days in FY18 (against 320 days in FY17) due to reduction in inventory holding levels. The company had cash and bank balances to the tune of Rs. 3.08 crore (incl. margin money deposits) as on March 31, 2018. Further, as on March 31, 2018, the current ratio of the company was 1.15x.

Improving order book: The company has on outstanding order book of Rs.95.88 crore as on October 30, 2018 visà-vis Rs.63.62 crore as on September 30, 2017, which is an increase of 50.71% in that span of 12 months.

Experienced promoters who are extending financial support: Lokesh Machines Limited (LML) is promoted by Mr M. Lokeswara Rao, who has four decades of experience in Machines Tools industry. He was earlier associated with KCP limited and HMT. He worked for 11 years in Hindustan Machines Tool (HMT) before starting LML. The company also derives strength and managerial capabilities from the experience of the other promoters i.e. Mr. Kishore Babu, Mr M Srikrishna and Mr. M Srinivas who also have rich experience in the Machine Tools design and manufacturing segment.

The promoters have been supporting the operations of the company by equity infusion. During FY17, there was

Reducing operating margins; however the same continued to remain at moderate levels: During FY18, PBILDT margin declined by 484 bps to 16.48% in FY18 from 21.23% in FY17 on account of increase in material costs. Despite the decline, the operating margin of the company was at moderate levels for FY18.

Further, falling PBILDT margins didn't affect PAT margins, and PAT margin for FY18 stood improved at 2.68% vis-à-vis 1.66% for FY17 owing to lower interest cost.
