## Annexure-I

Proposed setup of new manufacturing unit under Brahmanand Pipes Private Limited in Sinnar District Nashik Maharashtra.

Particulars	Details
Rationale	<p>As the Government of India (GOI) has reduced GST on many agriculture products to 5%, there has been a huge demand from the agriculture sector as a whole.</p> <p>By setting up of new manufacturing unit under Brahmanand Pipes Private Limited, will increase the Company's overall production capacity by approximately 50%, marking a decisive step in scaling operations, strengthening market positioning, and unlocking long-term shareholder value.</p> <p><b>The new facility will manufacture a broad range of products addressing multiple high-growth end markets, including:</b></p> <ul style="list-style-type: none"><li>• High-speed drip irrigation systems and equipment</li><li>• HDPE pipes for government water supply and irrigation projects</li><li>• Drainage and sewerage pipelines</li><li>• Telecom pipes and ducts</li><li>• Industrial piping solutions</li><li>• Mulching paper for modern agriculture</li><li>• Specialized micro-irrigation moulded products and accessories</li><li>• Other value-added agricultural and infrastructure products</li></ul> <p>This diversification meaningfully reduces product concentration risk while positioning RMDRIP to benefit from strong structural tailwinds in agricultural modernization, water infrastructure, rural development, telecom expansion, and industrial capex.</p>
Mode of financing	The project cost will be financed partly through own sources / Promoters contribution, Loans / Borrowings and fresh Equity Investment.
Capacity	The new unit will have an installed capacity of approximately 12,000 metric tonnes per annum, significantly enhancing RMDRIP's manufacturing footprint.
Period within which the proposed unit to be setup.	<p>The land acquisition will be completed on or before 28<sup>th</sup> February, 2026.</p> <p>The construction is expected to be completed by first quarter of FY 2026-27 and commercial production is expected to commence in second quarter of FY 2026-27.</p>
Existing capacity utilization	Approximate 90%.
Proposed Capacity addition	Approximately 12,000 metric tonnes per annum
