Anshul Zadaan, Director & CEO of GE T&D India Limited, said, "In Q1, FY 2021-22 we continued to operate with full rigor, however certain restrictions in few states due to coronavirus continued to pose challenges. During the quarter, our team commissioned important projects associated with the Green Energy Corridor Transmission System. This includes commissioning of 765-kiloVolt (kV) Gas-Insulated Substation (GIS) at Phagi in Rajasthan as well as 400 kV/220 kV Gas-Insulated Substation (GIS) at Bhuj for Power Grid Corporation Limited. The substations will facilitate the evacuation of renewable energy getting generated in solar parks at Bhadla, Fatehpur and Bikaner to various beneficiaries. We continued to strengthen our market in the neighbouring countries by winning order of 220/33 KV Air Insulated Substation from Bhutan Power Corporation Limited. As the contribution of renewable energy increases in the overall energy mix, GE T&D's technology will further strengthen the grid evacuation infrastructure and improve electricity access for millions of people across the country."

GE T&D India Limited

With over 100 years of presence in India, GE T&D India is a leading player in the power Transmission & Distribution business. Our product portfolio is ranging from Medium Voltage to Ultra High Voltage Air Insulated Substation, Transmission and Distribution, Industrial and Infrastructure markets.

GE T&D India has a predominant presence in all stages of the power supply chain and offers a wide range of products that include Gas Insulated Switchgear, Gas Insulated Transformers, Gas Insulated Breakers, Instrument Transformers, Substation Automation Equipment, GE T&D also offers Digital & ITware & solutions, Turnkey & solutions for Substation Engineering & Construction, Dielectric Aerial Transmission Systems, High Voltage Dismantling & Re-erecting, with 2300 J employees and 9 manufacturing sites, GE T&D India is future ready to meet the growing demands for equipments and services. GE is focused towards introducing Green and Digital & solutions aiming towards smarter and environment friendly Indian Grid.
