**Sub: JSW Energy Secures Supply of Turbine Generators for 1,600 MW Salboni Plant**

**Ref: Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015**

Dear Madam / Sir,

We wish to inform that the JSW Thermal Energy Limited, a wholly owned subsidiary of the Company, has entered into a contract with its associate company, Toshiba JSW Power Systems Private Limited for the procurement of two steam turbine generators of 800 MW each for its thermal project at Salboni, West Bengal.

A Press Release in this regard is attached.

Yours faithfully,

**For JSW Energy Limited**

**Monica Chopra**  
**Company Secretary**

## **JSW Energy Secures Supply of Turbine Generators for 1,600 MW Salboni Plant**

**Mumbai, India — January 15, 2026** — JSW Thermal Energy Limited (“JSW Thermal”), a wholly owned subsidiary of JSW Energy Limited (“the Company”) has entered into a contract with its associate company, Toshiba JSW Power Systems Private Ltd (“Toshiba JSW”) for the procurement of two steam turbine generators of 800 MW each for its Salboni Thermal Project in West Bengal.

The turbine-generator package will be manufactured and supplied in line with the project’s construction schedule, supporting timely completion and commissioning of the plant. By sourcing key equipment through an associate company, the Company aims to enhance supply-chain certainty, improve coordination during execution, and reduce risks arising from industry-wide equipment shortages.

The Company currently owns and operates 5,658 MW of thermal generation capacity, fuelled by a mix of imported and domestic coal. With 1,600 MW under construction at Salboni and an option to add 1,800 MW at KSK Mahanadi, the Company’s total thermal capacity is expected to increase to 9,058 MW. This would represent ~30% of the Company’s total locked-in capacity of 30.5 GW, underscoring the balanced role of thermal power within its overall generation portfolio.

**Mr. Sharad Mahendra, Joint Managing Director and CEO of JSW Energy**

*“The turbine generator supply contract with Toshiba JSW is a strategic step in strengthening supply-chain control and ensuring execution certainty for our Salboni Thermal Project. Our long-standing association with Toshiba, forged in 2008, is built on shared values of excellence, innovation, and a commitment to long-term value creation, and this association further reinforces that trusted partnership.*

*The Salboni Power Project underscores our commitment to supporting India’s energy security by adding reliable baseload capacity that complements the country’s expanding renewable footprint. As India advances toward its long-term energy transition goals, thermal power will continue to play a vital role in grid stability and system resilience. We are proud to contribute to the nation’s ambitious roadmap of incrementally adding nearly 100 GW of thermal capacity, while building a balanced, secure, and future-ready power system for Atmanirbhar Bharat”*

JSW Energy has total locked-in generation capacity of 30.5 GW comprising of 13.3 GW operational, 12.4 GW under-construction across thermal and renewable, 150 MW under-acquisition hydro and has pipeline of 4.6 GW. The company also has 29.4 GWh of locked-in energy storage capacity through hydro pumped storage projects of 26.4 GWh and battery energy storage system of 3.0 GWh. The Company aims to reach 30 GW generation capacity and 40 GWh of energy storage capacity by FY 2030 and achieve Carbon Neutrality by 2050.

**ABOUT JSW ENERGY:** JSW Energy Ltd is one of the leading Private sector power producers in India and part of the USD 23 billion JSW Group which has significant presence in sectors such as steel, energy, infrastructure, cement, sports among others. JSW Energy Ltd has established its presence across the value chains of power sector with diversified assets in power generation, and transmission. With strong operations, robust corporate governance and prudent capital allocation strategies, JSW Energy continues to deliver sustainable growth, and create value for all stakeholders. JSW Energy began commercial operations in 2000, with the commissioning of its first 2x130 MW thermal power plants at Vijayanagar, Karnataka. Since then, the company has steadily enhanced its power generation capacity from 260 MW to 13.3 GW, ensuring diversity in geographic presence, fuel sources and power off-take arrangements. The Company is presently constructing various power projects to the tune of 12.4 GW, with a vision to achieve a total power generation capacity of 30 GW by 2030.

**Forward Looking and Cautionary Statements:**

Certain statements in this release concerning our future growth prospects are forward looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, intense competition within Power Industry including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our internal operations, reduced demand for Power, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which JSW Energy has made strategic investments, withdrawal of fiscal governmental incentives, political instability, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our industry. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company.
