Dear Madam/Sir,

Sub. : Business Update for quarter ended June 30, 2025

Ref. : Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015 (“SEBI Listing Regulations”)

In accordance with SEBI Listing Regulations and Code of Practices and Procedures for Fair Disclosure of Unpublished Price Sensitive Information in terms of Regulation 8 of SEBI (Prohibition of Insider Trading) Regulations, 2015, the following is the Business Update for the quarter ended June 30, 2025 (“Q1FY26”):

The Company reached new performance peak across operational verticals, further cementing its position as a leader in sustainable urban waste management. The core operating revenue for the quarter grew by 11% YoY, supported by increased volumes and contractual escalations, demonstrating the strength and resilience of its business model.

Total tonnage managed reached new highs to 1.33 million tonnes, with Processing approximately 0.81 million tonnes, up 13% year-on-year (YoY) and Collection & Transportation (C&T) managing 0.52 million tonnes—a robust 10% YoY increase. This growth was driven by steady improvements in operational efficiency, favourable seasonal trends, and ramp-up of operations at the CIDCO bio-mining site. This reinforces our ongoing commitment to optimising throughput and enhancing material recovery rates.

The Waste-to-Energy (WtE) plant maintained a plant load factor (PLF) of approximately 84%, meeting both managements and technical vendor’s expectations and underscoring the reliability and efficiency of energy recovery operations.

A key highlight this quarter was the group’s record sales of compost and refuse-derived fuel (RDF), demonstrating our focus on circularity in waste management. Compost sales reached around 6,600 tonnes, up 10% YoY, while RDF sales surged by an impressive 62% YoY to approximately 55,500 tonnes. These results showcase Company’s ability to maximize resource recovery and support the alternative energy market.

Antony Waste Handling Cell Limited

CIN: L90001MH2001PLC130485

A significant strategic achievement was realized with the successful commercial launch of Extended Producer Responsibility (EPR) initiative within the Waste-to-Energy (WtE) division. The PCMC WtE project has now been officially registered to qualify for EPR credits through its plastic processing operations. In the first quarter, we began monetising these credits, generating revenue by selling 20% of the more than 94,400 metric tons of EPR credits allocated for the first year of operations. This accomplishment not only advances Company's sustainability objectives but also establishes a new revenue stream for the division. The rollout of the EPR initiative demonstrates Company's commitment to responsible waste management and positions it as a leader in the evolving circular economy landscape.

The information provided herein is on a consolidated basis and subject to a limited review by the management team.

Further, updates on these efforts will be provided at the end of every quarter throughout the current financial year.

Thanking you,
For Antony Waste Handling Cell Limited

Harshada Rane
Company Secretary and Compliance Officer

Business Update
Q1FY26

Operational Excellence

Quarterly Performance

- The core operating revenue for the quarter grew by 11% YoY
- C&T operations managed ~0.52 million tonnes (+10% yoy)
- Processed ~0.81 million tonnes (+13% yoy)
- Total tonnage including processing reached ~1.33 million tonnes which reflects a ~12% YoY increase

Circularity Practices

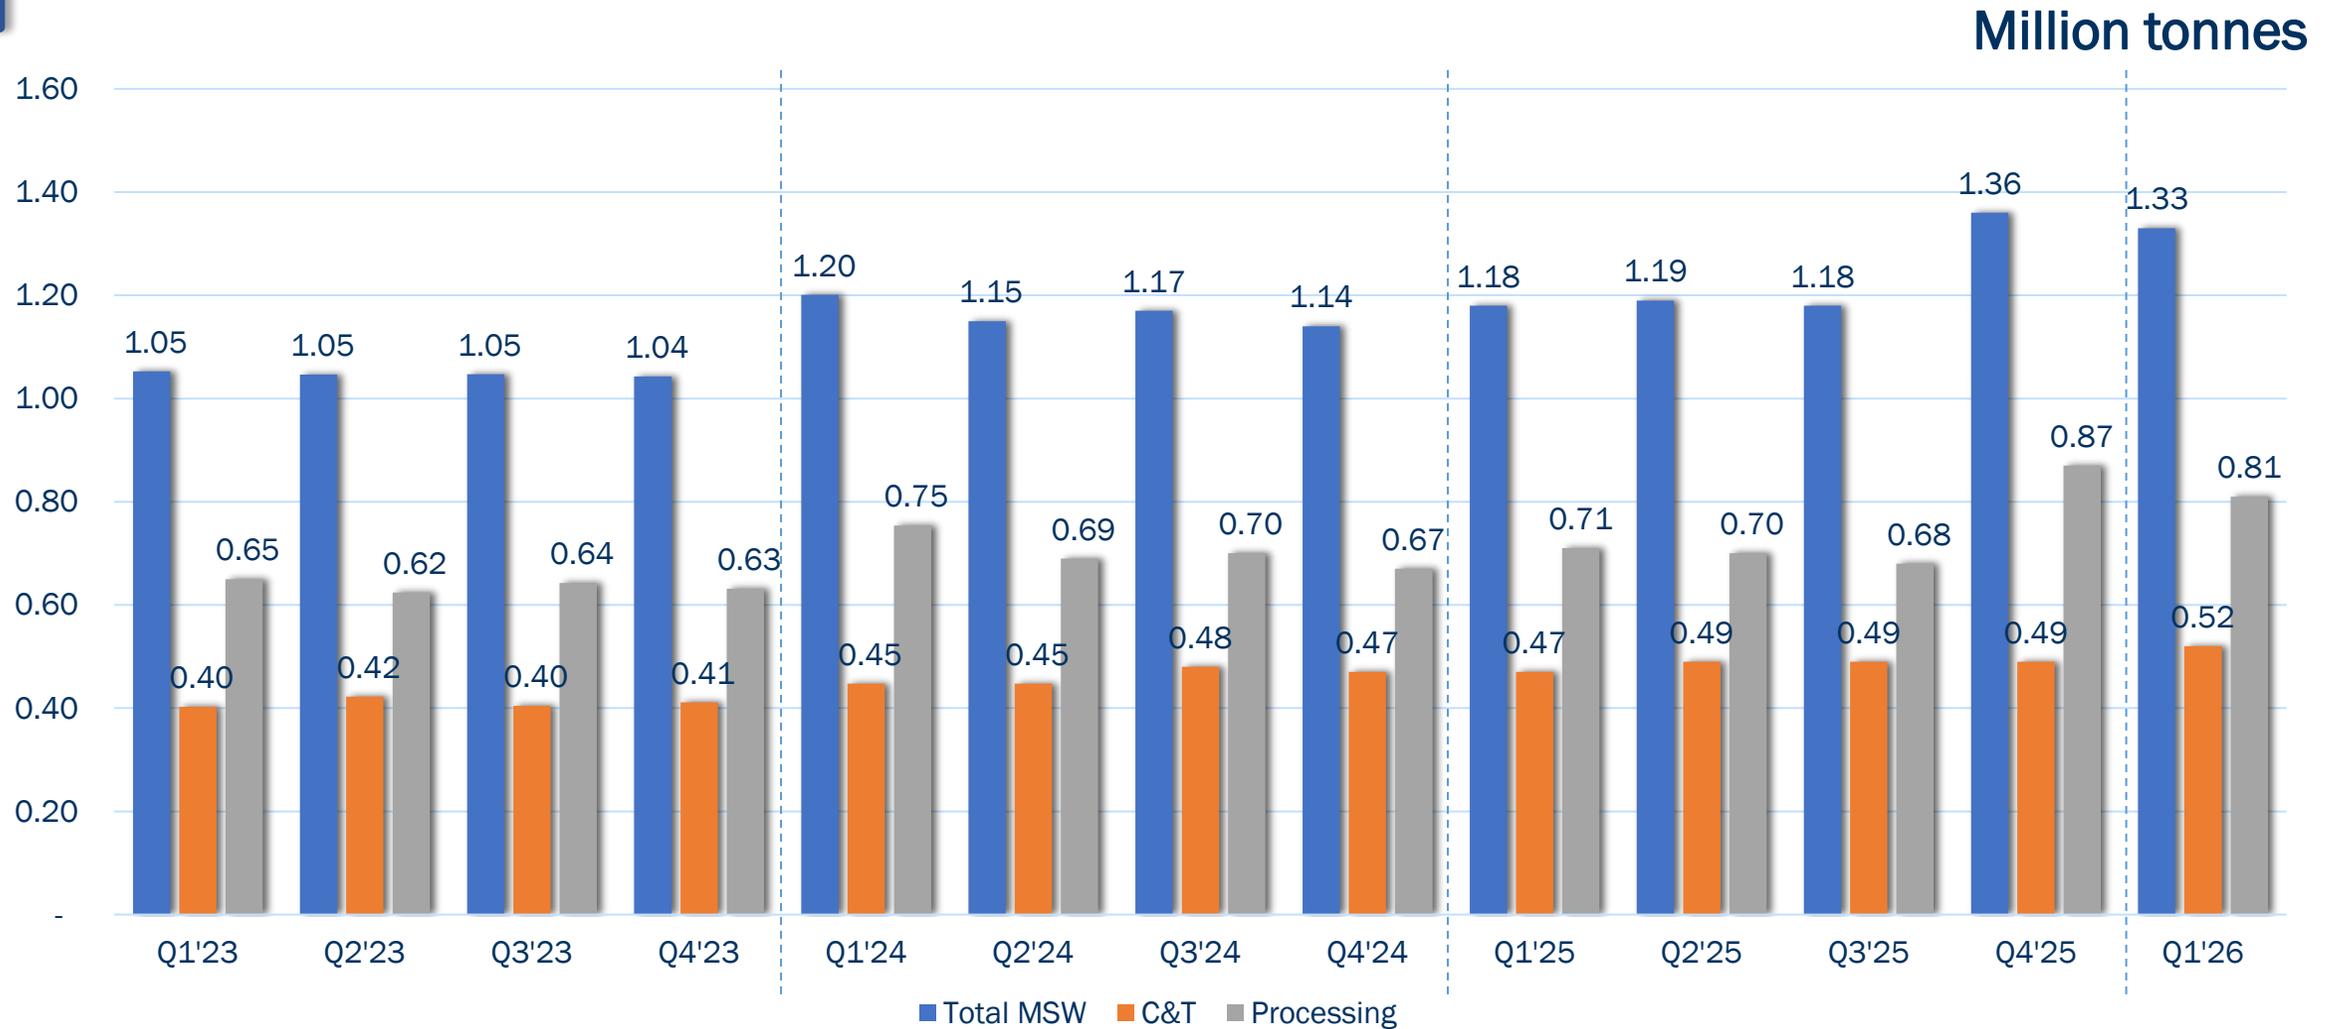

Plastic EPR Credits

Quarterly Performance

- Sale of ~6,600 Tonnes of compost
- Sale of ~ 55,500 tonnes of Refuse Derived Fuel (RDF)
- Monetised ~20% of the EPR credits allocated for the first year of operations at WtE

Quarterly Operational Highlights

Total MSW includes the tonnage from C&T except projects billed based on fixed shifts, trips, or household counts, processing and sale of compost and RDF.

Thank you
