## AXISCADES wins key Engagement with Airbus

**Bengaluru, December 17, 2019:** AXISCADES, a leading Engineering technology solutions company has announced that it has been selected by Airbus to work on Fuselage, Product development and Customer support services across different Airbus locations.

This is the third time Airbus has selected AXISCADES for critical engineering services and the contract was won amongst stiff global competition across major engineering services firms across the industry.

Since its incubation in 2011, the AXISCADES and Airbus engagement has evolved to cater to increasingly crucial projects with the aerospace major. Over the past few years, the company has been investing heavily in catering to new trends in the industry and has been delivering cutting edge services spanning different areas of aerospace engineering.

Speaking on the win, **AXISCADES chairman, Mr. David Bradley** said **“We are delighted that Airbus has made the decision to not just continue but increase the scope of work that we can support them with.** Several trends have been redefining how aircrafts are designed and built and we have been able to adapt and build working cases that can be deployed onsite and off. We have worked hard to build a responsive model that not just brings value, but lowers the cost of production.”

### **About AXISCADES Engineering Technologies**

AXISCADES is India’s leading technology solutions company catering to the needs of aerospace, defence, heavy engineering, automotive, energy, medical & healthcare sectors. Its proven technology products and services, coupled with industry best practices, enable global OEMs to create innovative, sustainable, safer and smarter products. The company has more than 2,300 engineers worldwide, offers solutions in mechanical engineering, embedded software and hardware, system integration, manufacturing and aftermarket solutions across domains addressing every stage of product lifecycle development. Headquartered in Bengaluru, AXISCADES has 14 engineering centres worldwide including North America, Europe and Asia.
