**Sub: Disclosure under Regulation 30 of the SEBI (Listing Obligation and Disclosure Requirements ) Regulations, 2015- Press Release - Sterling Tools Partners with China's MINIEYE .**

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015, please find attached a copy of Press Release on Sterling Tools Partners with China's MINIEYE to provide ADAS and Driver Monitoring Solutions for the Indian Market.

This is for your information and records.

for Sterling Tools Limited

**Komal Malik**

Company Secretary & Compliance Officer

## Sterling Tools Partners with China's MINIEYE to Provide ADAS and Driver Monitoring Solutions for the Indian Market

- Sterling Tools to support application engineering and on-ground adaptation of MINIEYE's ADAS and Driver Monitoring Systems for the Indian market
- Collaboration focused on engineering and perception adaptation for Indian driving environments, road conditions, and use cases
- Aligned with India's mandatory ADAS and Driver Drowsiness and Attention Warning Systems (DDAWS) regulations effective January 1, 2027
- Partnership covering commercial and passenger vehicle segments

**India, 19 January 2026:** Sterling Tools Limited (BSE: 530759 | NSE: STERTOOLS), a leading automotive components and technology manufacturer, has partnered with MINIEYE, a China-based intelligent driving and in-cabin solutions company listed on the Hong Kong Stock Exchange, to advance the deployment of Advanced Driver Assistance Systems (ADAS) and Driver Monitoring Systems (DMS) for the Indian automotive market.

As part of the partnership, Sterling Tools will support perception tuning and on-ground industry engagement, enabling ADAS and driver monitoring systems to be trained and adapted for India-specific road scenarios, mixed traffic conditions, and driving patterns. This approach recognises that intelligent driving systems require data-driven perception development and application-level engineering to function reliably in Indian environments.

The collaboration is focused on application engineering and system adaptation to ensure ADAS and driver monitoring technologies are suited to Indian driving environments, driving cycles, and real-world road conditions, rather than being direct replications of global market implementations. The effort will span both commercial and passenger vehicle segments.

**Anish Agarwal, Director, Sterling Tools Limited, said,** *"Road safety and regulatory compliance are becoming increasingly important across both commercial and passenger vehicle segments in India. This collaboration allows us to work with a global technology partner to address the growing need for driver assistance and monitoring systems that are engineered for Indian operating conditions. At Sterling Tools, our focus remains on supporting OEMs with engineered, safety critical technologies aligned with upcoming regulatory requirements."*

**Dr. Liu Guoqing, Founder and Chairman of MINIEYE, said,** *"Partnering with Sterling Tools marks a vital step in bringing intelligent driving to India, leveraging Sterling Tools local expertise to translate technology into production-ready applications that enhance vehicle safety."*

The collaboration will cover the adaptation of systems including Autonomous Emergency Braking (AEB), Forward Collision Warning (FCW), Lane Departure Warning Systems (LDWS), Driver Drowsiness and Attention Warning Systems (DDAWS), and Blind Spot Monitoring, among others, aligned with OEM requirements and regulatory expectations.

# STERLING TOOLS

India's automotive sector is entering a critical safety transition phase, with mandatory fitment of ADAS and Driver Drowsiness and Attention Warning Systems (DDAWS) in new vehicle models effective January 1, 2027. As adoption accelerates, OEMs are increasingly seeking systems that are engineered for Indian traffic behaviour, road complexity, and operating conditions, while remaining compliant with regulatory requirements.

MINIEYE brings global experience in intelligent driving and in-cabin technologies, with solutions compliant with EU General Safety Regulation (GSR) requirements and supported by Automotive SPICE V4.0 CL3 certification. Its systems are deployed across multiple international markets, including Europe, the UK, Australia, Southeast Asia, the Middle East, and South America.

Sterling Tools continues to strengthen its position as a technology-led automotive partner through sustained investments in advanced engineering and manufacturing capabilities. The company is expanding its portfolio across next-generation automotive technologies, including EV power electronics, high-voltage DC contactors and relays, and rare-earth-magnet-free motor solutions, aligned with electrification, intelligent mobility, and safety-driven regulatory adoption.

## **About Sterling Tools Limited**

Incorporated in 1979, Sterling Tools Limited (STL) manufactures high-tensile, cold-forged automotive fasteners catering to the passenger vehicle, two-wheeler, commercial vehicle, agri-equipment, and construction equipment segments. Its subsidiary, Sterling E-Mobility Solutions Limited (formerly Sterling Gtake E-Mobility) focuses on providing EV powertrain and power electronics solutions, while another subsidiary, Sterling Tech-Mobility Ltd. (STML) has successfully ventured into emerging sectors such as electric vehicle components, ensuring robust value creation for stakeholders. Sterling E-Mobility Solutions also continues to manufacture motor control units under license from Jiangsu Gtake Electric Co Ltd. STL and its subsidiaries cater to leading incumbent and start-up OEMs.

## **About MINIEYE**

Founded in 2014, Minieye Technology Co., Ltd. (Stock Code: 2431.HK) is a leading provider of intelligent driving and cabin solutions in China. With strong R&D and commercialization capabilities, MINIEYE promotes automotive automation while enhancing safety and driving experience globally.
