DPIIT Grants PLI Upgrade to Calcom, ₹25 Crore Investment Fully Deployed to expand LED Manufacturing Capabilities

New Delhi, May 19, 2025 — *Calcom Vision Limited*, one of India's foremost Original Design Manufacturers (ODM) and Electronics Manufacturing Services (EMS) providers, has been elevated to the **Large Investment category** under the Government of India's prestigious **Production Linked Incentive (PLI) Scheme for White Goods** — a leap that reaffirms Calcom's commitment to powering India's self-reliance in LED component manufacturing.

Under this upgraded approval by the **Department for Promotion of Industry and Internal Trade (DPIIT)**, Calcom has **increased its investment commitment from ₹10 crore to ₹25 crore** — and has already deployed the entire amount **ahead of the scheme's five-year schedule**. This bold move showcases Calcom's speed, scale, and strategic foresight in seizing India's next big manufacturing opportunity.

With this milestone, Calcom's portfolio of eligible products has expanded significantly to include **LED Drivers, Modules, Engines, Mechanical Housings, Heat Sinks, Diffusers, and Light Management Systems (LMS)** — key components in building a fully integrated domestic LED supply chain.

Backing Aatmanirbhar Bharat with Action, Not Just Intent

This advancement aligns squarely with the Government of India's **Aatmanirbhar Bharat** and **Make in India** missions. The ₹6,238 crore PLI Scheme for White Goods is accelerating India's emergence as a global manufacturing hub for LED components and air conditioners. As of early 2025, ₹10,478 crore in investments has been committed by 84 approved companies, with production targets surpassing ₹1.72 lakh crore by FY2028–29.

Calcom's upgraded commitment alone is projected to unlock **₹15.96 crore in performance-based incentives**, driven by **₹150 crore in incremental sales by FY2026–27** — more than double its original sales projections under the initial PLI phase.

"We're Not Just Manufacturing — We're Nation-Building"

Mr. Abhishek Malik, Executive Director of Calcom Vision Ltd., remarked:

"This PLI upgrade isn't just a government nod — it's a bold validation of Calcom's role in India's industrial future. We've front-loaded our entire ₹25 crore investment ahead of time, and we're only getting started. Our vision is clear: to lead India's LED revolution with innovation, agility, and purpose. As India localises components and ramps up exports, Calcom is ready to be the design-led, globally competitive partner the country needs."

Calcom's **world-class, 30,000 sq. meter manufacturing hub in Greater Noida**, equipped with end-to-end R&D and backward integration, stands ready to anchor India's shift toward energy-efficient lighting and next-generation smart electronics.

About Calcom Vision Limited

Founded in 1976, *Calcom Vision Limited* is a trusted name in ODM and EMS solutions for energy-efficient electronics and consumer durables. Over the decades, Calcom has partnered with some of the world's most respected brands — including **Panasonic, LG, Samsung, Philips, Osram, Bajaj, USHA, Amazon, HPL Electric & Power, and many others** — delivering high-performance products such as calculators, TVs, home appliances, and LED solutions.

In 2009, Calcom made a strategic pivot into lighting electronics and is now one of India's top manufacturers of LED bulbs, luminaires, and drivers. In 2023, Calcom entered a JV with Korea's Taehwa Enterprise to launch *Calcom Taehwa Techno Private Limited (CTTPL)* — focusing on advanced BLDC fan technologies for India.

Calcom stands at the forefront of India's manufacturing renaissance — not just making in India, but *engineering the future* in India.
