Q1'FY26 Earnings presentation
19th July 2025

Sustainable Business Model | Retail Focused | Tech-Led | Customer Centric | Well Governed

Strong performance despite subdued macro

- Strong performance against a backdrop of:
 - Seasonally muted quarter, subdued macro with weak demand and resultant ongoing slowdown in system credit growth
 - Easing policy environment – lower rates, surplus liquidity and upcoming CRR cuts - supported deposit growth and funding cost

Deposits

- Deposit Growth of 31% YoY (and 2.8% QoQ) to ₹ 1.28 Lacs Cr vs. Banking sector deposit growth of ~10.1%
- Cost of funds decreased to 7.08% vs 7.14% in Q4'FY25

Advances

- Loan growth of 18% YoY (and 1.7% QoQ) to ₹ 1.18 Lacs Cr vs Banking sector loan growth of ~9.5% YoY
 - Secured businesses (~90% of the loan portfolio) grew by 22% YoY (and 2.7% QoQ)
 - De-growth of 23% YoY (and 6.6% QoQ) in unsecured businesses

Profitability

- PAT / EPS grew by 16%/15% YoY, and Bank delivered RoA of 1.5% despite:
 - Margin decline of ~38 bps driven by lower asset and investment yield and higher liquidity carried during the quarter, which should partially reverse as we unwind excess liquidity and MF investments
 - Elevated credit costs in unsecured
- Supported by strong treasury performance and continued opex discipline

Strategic Initiatives

- Acquired a new building in BKC Mumbai to consolidate our Mumbai presence (all business verticals, except Digital Unsecured lending, are now operating from Mumbai)
- 2 new Independent Directors (ID) joined the Board taking board strength to 12 with 9 ID
- RBI evaluation in progress for Universal Banking License application

Continue to scale with sustainability

*Credit cost for Q1 is seasonal and thus non-annualised

- ❑ Q1 is a seasonally weaker quarter for asset quality and historically improvement is seen from Q1 levels
- ❑ Credit cost was slightly higher than our expectations – impacted by lower CE in MFI and some slippages in south-based mortgages book

Secured Segment

- ❑ Wheels - remains in-line with expectations, some weakness in higher yielding used SCV / HCV but these are small part (~6%) of overall book
- ❑ Mortgages – slightly elevated slippages in higher yielding south-based book. We have already taken further measures to strengthen collection / security enforcement infrastructure in these geographies and we expect pull back in H2
- ❑ Commercial Banking – remains in-line with expectations

Unsecured Segment

- ❑ Lower CE in MFI (98.3% in Q1 vs. 98.7% in Q4) and book de-growth; recovery is expected to be delayed by one quarter to Q4; full year credit cost expected to be higher than our earlier estimate
- ❑ Credit card asset quality remains elevated, but in line with expectations – stress is peaking and incremental flows are mainly from identified pool of customers where corrective actions have already been initiated

Credit cost estimation on securitized book in GLP is based on internal MIS; Business segment have been reclassified from previous reporting basis internal changes
