He further noted the timely commissioning of the two phases of the Solar Grade DHF project with an annual capacity of 10,000 metric tonnes in June & October 2025 respectively would help the Company improve both top and bottom lines during the subsequent quarters.

Mr Malkani also remarked that the company continues to pursue growth in HF and downstream product markets. With recently announced 20,000 TPA fluorinated product plant and other downstream products, developments for which are underway, Tanfac remains committed to sustaining strong operational and financial performance over the coming years."
