The Board hereby recommends an Ordinary Resolution as set out at item No.5 of the Notice for approval by the Shareholders.

Item No.6

Approval for material transactions with ESAB Europe GmbH, Switzerland, Related Party

For the previous year 2024-25, the Company had obtained shareholder approval for the transactions with ESAB Europe GmbH, Switzerland for a value upto Rs. 150 crores in the Annual General Meeting held on 8th August 2024. The total transaction value for FY 2024-25 with the said related party as per the audited financial statements was Rs. 118.81 crores representing 9.56% of the total turnover of the Company.

The Company expects that the overall transaction value with ESAB Europe GmbH, Switzerland during the financial year 2025-26, may likely exceed the prescribed limit of 10% and therefore as an abundant precaution, the Company would like to obtain shareholders approval for the same.

The Audit Committee at their meeting held on 27th May 2025 have reviewed the details of expected transactions to be carried with ESAB Europe GmbH, Switzerland, during the financial year 2025-26. Based on the inputs and explanations provided by the management of the Company, the Audit Committee have decided that this transaction is likely to be a material related party transaction and therefore recommended the same for the approval of the Board and shareholders.

Based on the recommendation of the Audit Committee, the Board of Directors at their meeting held on 27th May 2025 have approved and recommended the material related party transactions with ESAB Europe GmbH, Switzerland for approval of the shareholders.

Pursuant to the provisions of regulation 23 of the SEBI (LODR) Regulations 2015 all related party transactions and subsequent material modifications shall require prior approval of the audit committee and only those members of the audit committee, who are independent directors, shall approve the related party transactions.

The said regulation provides further that a transaction with a related party shall be considered material, if the transaction(s) to be entered into individually or taken together with previous transactions during a financial year, exceeds rupees one thousand crore or ten per cent of the annual consolidated turnover of the listed entity as per the last audited financial statements of the listed entity, whichever is lower.

The Company seeks to enter into transactions with ESAB Europe GmbH in the ordinary course of business and on an arm's length basis with the prior approval of Audit Committee. As per Regulation 23 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, material related party transactions (i.e., value exceeding 10% of the annual turnover or rupees one thousand crore whichever is lower) require shareholders approval.

The proposed transactions would be in the normal course of business and in the nature of a) sale, purchase, supply of goods or services or any other similar business transactions; b) availing or rendering of services including the usage of Intellectual Property Rights, etc. The approval of the shareholders is hereby sought for the entire gamut of transactions to be entered into with ESAB Europe GmbH, Switzerland under the existing and future arrangements may exceed 10 per cent of the annual turnover of the Company and not exceeding Rs. 200 crores which is considered as material related party transactions.

Item No.7

Approval for Material transactions with EWAC Alloys Limited, India, Related Party

For the previous year 2024-25, the Company had obtained shareholder approval for the transactions with EWAC Alloys Limited for a value upto ₹ 200 crores in the Annual General Meeting held on 8th August 2024. The total transaction value for FY 2024-25 with the said related party as per the audited financial statements is ₹ 86.50 crores representing 6.96% of the total turnover of the Company.

The Company expects that the overall transaction value with EWAC Alloys Limited during the financial year 2024-25, may likely exceed the prescribed limit of 10% and therefore as an abundant precaution, the Company would like to obtain shareholders approval for the same.

The Audit Committee at their meeting held on 27th May 2025 has reviewed the details of expected transactions to be carried with EWAC Alloys Limited during the financial year 2025-26. Based on the inputs and explanations provided by the management of the Company, the Audit Committee have decided that this transaction is likely to be a material related party transaction and therefore recommended the same for the approval of the Board and shareholders.

Based on the recommendation of the Audit Committee, the Board of Directors at their meeting held on 27th May 2025 have approved and recommended the material related party transactions with EWAC Alloys Limited for approval of the shareholders.

Regulation 23 of SEBI (LODR) Regulations provide that all related party transactions and subsequent material modifications shall require prior approval of the audit committee and only those members of the audit committee, who are independent directors, shall approve the related party transactions.

The said regulation provides further that a transaction with a related party shall be considered material, if the transaction(s) to be entered into individually or taken together with previous transactions during a financial year, exceeds rupees one thousand crores or ten per cent of the annual consolidated turnover of the listed entity as per the last audited financial statements of the listed entity, whichever is lower.

The Company seeks to enter into transactions with related parties in the ordinary course of business and on an arm's length basis with the prior approval of Audit Committee. As

per Regulation 23 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, material related party transactions (i.e., value exceeding 10% of the annual turnover or rupees one thousand crores whichever is lower) require shareholders approval.

The proposed transactions would be in the normal course of business and relate to purchases and sales of goods and services, including reimbursement of expenses, if any. The approval of the shareholders is sought for the entire gamut of transactions to be entered with EWAC Alloys Limited under the existing and future arrangements may exceed 10 per cent of the annual turnover of the Company and not exceeding ₹ 200 crores which is considered as material related party transaction.

14. MANAGEMENT DISCUSSION AND ANALYSIS

A. INDUSTRY STRUCTURE AND DEVELOPMENTS

Despite global uncertainties and domestic challenges, India's economic resilience and policy reforms kept activity levels at a steady level. Key sectors in Services stood out as major growth drivers, while India's emergence as a preferred investment destination further underscored its global relevance.

India continued to face the impact of global developments including geo political, economic and disruptive technology driven elements. Key industrial indicators during the year pointed to a flat or marginally lower levels of activity. Relatively softer commodity and input costs helped manage pricing pressures and margins in a really competitive environment.

The Company continued with its focus on productivity together with product portfolio and extension of distributor network to achieve growth in sales and profitability.

B. SEGMENT WISE OR PRODUCT WISE PERFORMANCE

Our key customer segments relevant to the business continued to display weakness whilst emerging sectors, particularly those in renewable energy, digital transformation, and infrastructure, witnessed heightened levels of interest overall

C. OUTLOOK, OPPORTUNITIES AND THREATS

We continue to be invested for the long term and remain focused on managing the short term turbulences with countermeasures.

Commodity prices, geo political developments, tariffs and fiscal / monetary policies coupled with forex related movements would continue to be the key drivers for the ongoing financial year.

New products, export opportunities on goods and services, capital goods cycle revival are potentially key opportunities for the year ahead. Service revenue streams continue to witness opportunities given the cost competitiveness and talent pool availability in India.

Global presence with expanding footprint from acquisitions, long presence in India with established business partners and the ability, driven by organizational experience and strength of Balance Sheet are seen as opportunities.

D. RISKS AND CONCERNS

Pricing pressures, liquidity challenges and supply chain driven issues on working capital together with global factors are seen as key risks apart from cyber security and technology driven risks.

15. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Internal controls are evaluated by the Management on an ongoing basis drawing on inputs from global framework, learnings from previous years and the emerging landscape on technology and regulatory framework. Independent Internal Auditors are engaged by the Company to test efficacy of controls in terms of design and operating effectiveness. We continue to work with internal auditors and domain experts to test these and identify areas for

improvement. As a subsidiary of a US listed entity, it is subjected to additional reviews applicable to such entities. Key findings and actions taken to implement or remediate the same are reviewed by the Audit Committee periodically at its meetings. The scope and coverage of internal audits are aligned to have coverage in terms of key controls and locations. The endeavor is to align to the requirements of Internal Control on Financial Reporting (ICFR) framework while leveraging on work done as part of global reporting requirements. Management testing through independent audit teams followed by external testing were done during the year.

The scope of work of Internal Auditors includes review of controls on accounting, operational controls, financial reporting, statutory and other compliances and operational areas in addition to reviews relating to efficiency and economy in operations.

The Company continues to focus on compliance with the requirements of Internal Controls on Financial Reporting.

16. FINANCIAL PERFORMANCE OF THE COMPANY

A. INCOME AND EXPENDITURE

Revenue from Contract with customers grew by 10.5%. All key categories grew in a difficult year marked by economic and geo-political headwinds. Softness in markets and underlying commodity prices through most of the year resulted in pressure on prices. New products continued to grow in key markets. The Company also witnessed an increase in export of products.

Continuing traction in support services including R&D services to related parties helped grow service revenues over the previous year. Other income increased by about 12% primarily on account of Indirect tax refunds in Financial Year 2024-25.

Material costs as a percentage to sales were comparable with the previous year as adjusted for product mix. Overheads including employee costs were higher at 22.9% from 21.8% in the previous year due to the impact of inflation and also costs on service activities recharged out.

10. Health and safety management system:

- a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage of such system?**

Yes, ESAB India Limited has implemented an Occupational Health and Safety management system, certifiable to ISO 45001, across all its locations. The commitment to maintaining, fostering, and continually improving the safety and well-being of employees is embedded in the company's wider risk management and control processes.

- b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?**

As part of the implementation of ISO standards, procedures for Hazard Identification and Risk Assessment (HIRA) have been established and implemented across the business units. HIRA is conducted for both routine and non-routine activities. Individuals involved in operations, EHS officers, and contractor representatives (where applicable) identify work-related hazards. The identified hazards are recorded, and control measures are discussed and defined according to the hierarchy of controls. The Corrective and Preventive Action (CAPA) tracker is employed to proactively identify safety risks in high-risk activities and implement engineering controls to mitigate these risks. A Cross-Functional Team reviews high-risk activities and implements engineering controls where feasible to mitigate risks. Focused training sessions on "Behavioural Based Safety" (BBS) are conducted to raise awareness among third-party and contractor employees, promoting the adoption of safe work practices.

c. Whether you have processes for workers to report the work related hazards and to remove themselves from such risks. (Y/N)

Yes, ESAB India Ltd. has implemented a robust system for reporting Unsafe Acts and Unsafe Conditions (UAUC), near misses, and incidents. Workers are actively encouraged to report UAUC, near misses, and incidents and to promptly remove themselves from any associated risks. UAUC incidents are documented in an EHS dashboard, covering project sites, factories, and office locations. These reports are analysed based on Safety Essentials categories, and corrective and preventive actions are initiated to mitigate safety risks.

Auditor's Report on Corporate Governance

[Pursuant to Clause E of SCHEDULE V of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015]

To

The Members,
ESAB INDIA LIMITED
Plot No. 13, 3rd Main Road, Industrial Estate,
Ambattur, Chennai - 600058

We have examined the compliance of the conditions of Corporate Governance by **ESAB India Limited** ('the Company') for the year ended on 31st March, 2025, as stipulated under Regulations 17 to 27, clauses (b) to (i) and (t) of sub-regulation (2) of Regulation 46 and para C, D & E of Schedule V of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations").

The compliance of the conditions of Corporate Governance is the responsibility of the management. Our examination was limited to the review of procedures and implementation thereof, as adopted by the Company for ensuring compliance with conditions of Corporate Governance. It is neither an audit nor an expression of opinion on the financial statements of the Company.

In our opinion and to the best of our information and according to the explanations given to us, and the

representations made by the Management, we certify that the Company has complied with the conditions of Corporate Governance as stipulated in the SEBI Listing Regulations for the year ended on 31st March, 2025.

We further state that such compliance is neither an assurance as to the future viability of the Company nor of the efficiency or effectiveness with which the management has conducted the affairs of the Company.

Independent Auditor's Report

to the Members of ESAB INDIA LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of ESAB India Limited (the "Company"), which comprise the Balance Sheet as at 31 March 2025, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year ended on that date, and notes to the financial statements, including a summary of material accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2025, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing ("SA"s) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the *Auditor's Responsibility for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Directors report, Management Discussion and Analysis, Business Responsibility and Sustainability Report and Report on Corporate Governance, but does not include the financial statements and our auditor's report thereon.
- Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Board of Directors for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including Ind AS specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of

the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intend to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Company's Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,

forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal financial controls that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Reporting on comparatives in case the previous year was audited by the predecessor auditor

The financial statements of the Company for the year ended 31 March 2024, were audited by another auditor who expressed an unmodified opinion on those statements on 23 May 2024.

Our opinion on the financial statements is not modified in respect of this matter.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books except for not complying with the requirement of audit trail as stated in (i)(vi) below. (refer note 45 to the Financial Statements).
 - c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Cash Flows and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
 - d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.
 - e) On the basis of the written representations received from the directors as on 31 March 2025 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2025 from being appointed as a director in terms of Section 164(2) of the Act.
 - f) The modification relating to the maintenance of accounts and other matters connected therewith, is as stated in paragraph (b) above.

g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in “Annexure A”. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company’s internal financial controls with reference to financial statements.

h) With respect to the other matters to be included in the Auditor’s Report in accordance with the requirements of Section 197(16) of the Act, as amended,

in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

i) With respect to the other matters to be included in the Auditor’s Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements - Refer Note 34(b) to the financial statements;

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

iv. (a) The Management has represented that, to the best of its knowledge and belief, as disclosed in the note 44(vii) to the financial statements no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities (“Intermediaries”), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the

Company (“Ultimate Beneficiaries”) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(b) The Management has represented, that, to the best of its knowledge and belief, as disclosed in the note 44(viii) to the financial statements, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities (“Funding Parties”), with the understanding, whether recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (“Ultimate Beneficiaries”) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(c) Based on the audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.

v. The final dividend proposed in the previous year, declared and paid by the Company during the year is in accordance with section 123 of the Act, as applicable.

The interim dividend declared and paid by the Company during the year and until the date of this report is in accordance with Section 123 of the Companies Act 2013.

As stated in note 45 to the financial statements, the Board of Directors of the Company has proposed final dividend for the year which is subject to the approval of the members at the ensuing Annual General Meeting. Such dividend proposed is in accordance with Section 123 of the Act, as applicable.

vi. Based on our examination, which included test checks, the Company has used accounting software systems for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has been enabled and operated throughout the year for all relevant transactions recorded in the software except that:

(i) in respect of software operated by third party software service provider, for maintaining payroll records, in the absence of an independent auditor's System and Organization Controls report covering the audit trail requirement for the period from 1 January 2025 till 31 March 2025, we are unable to comment whether the audit trail feature of the said software was enabled and operated during this period, for all relevant transactions recorded in the software and whether there was any instance of the audit trail feature been tampered with.

Further, during the course of our audit, we did not come across any instance of the audit trail feature being tampered with, in respect of said accounting software for the period for which the audit trail feature was enabled and operating.

Additionally, the audit trail that was enabled and operated for the year ended 31 March

2024, has been preserved by the Company as per the statutory requirements for record retention, as stated in Note 46 to the financial statements.

2. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

Management's and Board of Directors' Responsibilities for Internal Financial Controls

The Company's management and Board of Directors are responsible for establishing and maintaining internal financial controls with reference to financial statements based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial

controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with

reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at 31 March 2025, based on the criteria for internal financial control with reference to financial statements established by the Company considering the essential components of internal control

stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Annexure B to the Independent Auditor's Report

ESAB INDIA LIMITED

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment and capital work in progress.
(B) The Company has maintained proper records showing full particulars of Intangible Assets.
- (b) The Property, Plant and Equipment and some of the items under capital work in progress were physically verified during the year by the Management in accordance with a programme of verification which, in our opinion, provides for physical verification, at reasonable intervals. No material discrepancies were noticed on such verification.
- (c) Based on our examination of the registered sale deed / transfer deed / conveyance deed provided to us, we report that, the title deeds of all the immovable properties, (other than immovable properties where the Company is the lessee and the lease agreements are duly executed in favour of the Company) disclosed in the financial statements included in (property, plant and equipment and non-current assets held for sale) are held in the name of the Company as at the balance sheet date.
- (d) The Company has not revalued any of its Property, Plant and Equipment (including Right of Use assets) and Intangible Assets during the year.
- (e) No proceedings have been initiated during the year or are pending against the Company as at 31 March 2025 for holding any benami property under Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- (ii) (a) The inventories except for goods-in-transit and stocks held with third parties, were physically verified during the year by the Management at reasonable intervals. In our opinion and based on information and explanations given to us, the coverage and procedure of such verification by the Management is appropriate having regard to the size of the Company and the nature of its operations. For stocks held with third parties at the year-end, written confirmations have been obtained and in respect of goods in- transit, the goods have been received subsequent to the year end. No discrepancies of 10% or more in the aggregate for each class of inventories were noticed on such physical verification of inventories/alternate procedures performed as applicable, when compared with the books of account.
- (b) According to the information and explanations given to us, the Company has been sanctioned working capital limits in excess of Rs. 5 crores, in aggregate, at points of time during the year, from banks or financial institutions on the basis of security of current assets. In our opinion and according to the information and explanations given to us, the quarterly returns or statements comprising (including revised returns) filed by the Company with such banks or financial institutions are in agreement with the unaudited books of account of the Company of the respective quarters.
- (iii) The Company has made investments in, and not provided any guarantee or security, and granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or any other parties during the year, in respect of which:
 - a) The Company has not provided any loans or advances in the nature of loans or stood guarantee, or provided security to any other entity during the year, and hence reporting under clause 3(iii)(a) of the Order is not applicable.
 - b) The investments made, during the year are, in our opinion, not prejudicial to the Company's interest. The Company has not provided any guarantees or security, granted any loans or advances in the nature of loans.
 - c) The Company has not provided any loans or advances in the nature of loans during the year, and hence reporting under clause 3(iii)(c), (d), (e) & (f) of the Order is not applicable.
- (iv) The Investments in respect of which provisions of Section 186 of the Companies Act, 2013 is applicable have been complied with by the Company. The Company has not granted any loans or provided guarantees or securities that are covered under the provisions of Section 185 and 186 of Companies Act, 2013.
- (v) The Company has not accepted any deposit or amounts which are deemed to be deposits. Hence, reporting under clause 3(v) of the Order is not applicable.

(vi) The maintenance of cost records has been specified by the Central Government under Section 148(1) of the Companies Act, 2013. We have broadly reviewed the books of account maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended, prescribed by the Central Government for maintenance of cost records under Section 148(1) of the Companies Act, 2013, and are of the opinion that, prima facie, the prescribed cost records have been made and maintained by the Company. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

(vii) In respect of statutory dues:

(a) Undisputed statutory dues, including Goods and Service tax, Provident Fund, Employees' State Insurance, Income-tax, Sales Tax, Service Tax, duty of Custom, duty of Excise, cess and other material statutory dues applicable to the Company have been regularly deposited by it with the appropriate authorities in all cases during the year.

There were no undisputed amounts payable in respect of Goods and Service tax, Provident Fund, Employees' State Insurance, Income-tax, Sales Tax, Service Tax, duty of Custom, duty of Excise, cess and other material statutory dues in arrears as at 31 March 2025 for a period of more than six months from the date they became payable.

- Out of the total disputed dues, an amount ₹ 89 lakhs for Excise duty and service tax related matters, ₹195 lakhs for income tax matters and ₹ 158 lakhs for sales tax matters was pre-deposited by the Company.

- (viii) There were no transactions relating to previously unrecorded income that were surrendered or disclosed as income in the tax assessments under the Income Tax Act, 1961 (43 of 1961) during the year.
- (ix) (a) The Company has not taken any loans or other borrowings from any lender. Hence reporting under clause 3(ix)(a) of the Order is not applicable to the Company.
- (b) The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.
- (c) The Company has not taken any term loan during the year and there are no unutilised term loans at the beginning of the year and hence, reporting under clause 3(ix)(c) of the Order is not applicable.
- (d) As informed to us, the Company has not raised any short-term loan during the year and there are no unutilised short term loans at the beginning of the year and hence, reporting under clause 3(ix)(d) of the Order is not applicable.
- (e) The Company did not have any subsidiary or associate or joint venture during the year and hence, reporting under clause 3(ix)(e) of the Order is not applicable.
- (f) The Company has not raised any loans during the year and hence reporting on clause 3(ix)(f) of the Order is not applicable.
- (x) (a) The Company has not issued any of its securities (including debt instruments) during the year and hence reporting under clause 3(x)(a) of the Order is not applicable.
- (b) During the year the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) and hence reporting under clause 3(x)(b) of the Order is not applicable to the Company.
- (xi) (a) To the best of our knowledge, no fraud by the Company and no material fraud on the Company has been noticed or reported during the year.
- (b) To the best of our knowledge, no report under sub-section (12) of section 143 of the Companies Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year and upto the date of this report.
- (c) We have taken into consideration the whistle blower complaints received by the Company during the year and provided to us, when performing our audit.
- (xii) The Company is not a Nidhi Company and hence reporting under clause 3(xii) of the Order is not applicable.
- (xiii) In our opinion, the Company is in compliance with Section 177 and 188 of the Companies Act, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the financial statements etc. as required by the applicable accounting standards.
- (xiv) (a) In our opinion the Company has an adequate internal audit system commensurate with the size and the nature of its business.
- (b) We have considered, the internal audit reports issued to the Company during the year upto 31 December 2024 and the draft of the internal audit reports where issued after the balance sheet date covering the period 1 January 2025 to 31 March 2025 for the period under audit.

Notes to financial statements for the year ended March 31, 2025

(All amounts are in lakhs of Indian rupees, unless otherwise stated)

1. Company Overview

ESAB India Limited ("the Company") (CIN L29299TN1987PLC058738) was incorporated on November 10, 1987 and commenced its business operations in July 1988. The Company is a Public Limited Company domiciled in India and has its primary listings on BSE Limited and National Stock Exchange of India Limited in India. The registered office of the Company is located at Plot No.13, 3rd Main Road, Industrial Estate, Ambattur, Chennai 600 058. The Company is engaged in the business of fabrication technology. The Company caters to both domestic and international markets. Information on other related party relationships of the Company is provided in Note 36.

The financial statements were approved for issue in accordance with the resolution passed by the Board of Directors on May 27, 2025.

2. Material Accounting Policies

2.1 Statement of compliance and basis of preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013 (Ind AS compliant Schedule III) as applicable to these financial statements.

These financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. The financial statements are presented in lakhs of Indian rupees and all values are rounded to the nearest lakhs, except when otherwise indicated.

Going Concern

The directors have, at the time of approving the financial statements, a reasonable expectation that the company have adequate resources to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going concern basis of accounting in preparing the financial statements

2.2 Summary of Material Accounting Policies

a) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current / non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or

- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities. The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

b) Foreign currency transactions and balances

Financial Statements are presented in Indian rupees (₹) which is also the functional currency of the Company. Transactions in foreign currencies are initially recorded by the functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

c. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement

Notes to the Financial Statements

for the year ended March 31, 2025

(All amounts are in lakhs of Indian rupees, unless otherwise stated)

is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use of selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate under the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level	Remarks
Level 1	Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
Level 2	Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
Level 3	Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes to the financial statements.

d. Revenue from operations

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of Goods

Revenue is measured at the transaction value of the consideration received or receivable, including freight recovered and net of returns, allowances and rebates and Goods and Services tax.

Revenue is recognised upon transfer of control of promised products to customers, in accordance with a sales contract, which is primarily ex-works in case of dealers and in accordance with incoterms with respect to other than dealers, in an amount that reflects the consideration which the company expects to receive in exchange for those products. Revenue is recognised only to the extent that there is a probability of ultimate collections.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of products, the Company considers the effects of variable consideration and consideration payable to the customer.

Variable Consideration - Incentives

The Company provides retrospective incentives to certain dealers once the quantity or value of the products purchased during the period exceeds a threshold specified in the contract. The Company applies the most likely amount method or the expected value method to estimate the variable consideration in the contract. The selected method that best predicts the amount of variable consideration is primarily driven by the number of volume thresholds contained in the contract. The most likely amount is used for those contracts with a single volume threshold, while the expected value method is used for

Notes to the Financial Statements

for the year ended March 31, 2025

(All amounts are in lakhs of Indian rupees, unless otherwise stated)

ESAB INDIA LIMITED

those with more than one volume threshold. The Company then applies the requirements on constraining estimates in order to determine the amount of variable consideration that can be included in the transaction price and recognised as revenue. A refund liability is recognised for the expected future incentives (i.e., the amount not included in the transaction price).

Installation services

The Company provides installation services that are bundled together with the sale of certain products for which the installation services can be obtained from other providers and does not significantly customise or modify the product. The Company determined that both the equipment and installation are capable of being distinct.

Rendering of services

Revenue from services is recognised when the services are rendered in accordance with the specific terms of contract and when collectability of the resulting receivable is reasonably assured.

Interest Income

Interest income from financial assets is recognised at the effective interest rate method applicable on initial recognition. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Export Benefits

Export incentives such as Remission of Duties and Taxes on Export Products (RoDTEP) are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with. Export Benefits are accounted for in the year export of products and services based on eligibility and where there is no uncertainty in receiving the same.

Contract balances

Trade receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Section (n) Financial instruments – initial recognition and subsequent measurement.

Refund liabilities

A refund liability is recognised for the obligation to refund some or all of the consideration received (or receivable) from the customer. The Company's refund liabilities arise from customers' incentives. The Company updates its estimates of refund liabilities (and the corresponding

change in the transaction price) at the end of each reporting period.

Other Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition. Dividend Income is accounted when the right to receive is established.

e. Taxes

Income taxes comprise Current and deferred tax. Income tax expense/credit is recognised in the statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the income taxes are also recognised in other comprehensive income or directly in equity, respectively.

(i) Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the country where the Company operates and generates taxable income.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Company shall reflect the effect of uncertainty for each uncertain tax treatment by using either most likely method or expected value method, depending on which method predicts better resolution of the treatment.

(ii) Deferred tax

Deferred tax is provided using the balance sheet method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable

temporary differences, except when the deferred tax liability arises from an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity which intends either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

f. **Non-current assets held for sale**

The Company classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that it is unlikely that the decision to sell will be withdrawn. Management must be committed to the sale expected within one year from the date of classification.

The criteria for held for sale classification is met only when the asset is available for immediate sale in its present condition, subject only to terms that are usual and customary for sale of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned. The Company treats sale of the asset to be highly probable when:

- The appropriate level of management is committed to a plan to sell the asset,
- An active programme to locate a buyer and complete the plan has been initiated (if applicable),
- The asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- The sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and
- Actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Non-current assets held for sale are measured at the lower of their carrying amount and the fair value less costs to sell. Assets and liabilities classified as held for sale are presented separately in the balance sheet.

Property, plant and equipment and intangible assets once classified as held for sale are not depreciated or amortised.

g. **Property, plant and equipment and Depreciation of PPE**

Property, Plant and Equipment (PPEs) are recorded at cost less accumulated depreciation and accumulated impairment loss (if any). The Company capitalizes all costs relating to acquisition and installation of Property, Plant and Equipment. The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those

Notes to the Financial Statements

for the year ended March 31, 2025

(All amounts are in lakhs of Indian rupees, unless otherwise stated)

subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying Property, Plant and Equipment up to the date the Property, Plant and Equipment is ready for its intended use.

Cost of spares relating to specific item of Property, Plant and Equipment is capitalized. Cost of modifications that enhance the operating performance or extend the useful life of Property, Plant and Equipment are also capitalized, where there is a certainty of deriving future economic benefits from the use of such assets.

Any part or components of Property, Plant and Equipment which are separately identifiable and expected to have a useful life which is different from that of the main assets are capitalized separately, based on the technical assessment of the Management.

Advances paid towards the acquisition of Property, Plant and Equipment outstanding at each balance sheet date are disclosed as "Capital Advances" under Other Non Current Assets and cost of Property, Plant and Equipment not ready to use before such date are disclosed under "Capital Work-in-Progress".

Capital Work in Progress

Capital work in progress is stated at cost, net of accumulated impairment loss, if any. Plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in profit or loss as incurred.

Depreciation :

The Company, based on technical assessment made by technical expert and management estimate, depreciates certain items of building, plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Particulars	Useful Life
Buildings	30 - 60 years
Plant & Machinery	4 - 21 years
Furniture and Fixtures	16 years
Vehicles	6 years

The estimated useful lives, residual values and depreciation method are reviewed on an annual basis and if necessary, changes in estimates are accounted for prospectively.

Derecognition of Property, Plant and Equipment:

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss on disposal or retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss.

h. Intangible Assets

Intangible assets with finite useful lives that are acquired separately are measured on initial recognition at cost. They are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight line basis over their estimated useful lives from the date of capitalisation. The estimated useful life is reviewed at the end of each reporting period and the effect of any changes in estimate being accounted for prospectively.

The Company holds only acquired computer software which are amortized on a straight line basis over a period of 4 years.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

i. Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industry or country in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so

that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

j. Inventories

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Raw materials:

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.

Finished goods and work in progress:

Cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity. Cost is determined on first in, first out basis.

Stock in Trade (Goods acquired for Trading):

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.

An allowance for Inventory is recognised for cases where the realisable value is estimated to be lower than the inventory carrying value. The inventory allowance is estimated taking into account various factors, including prevailing sales prices of inventory item and losses associated with excess obsolete / slow-moving / redundant inventory items. The Company has, based on these assessments, made adequate provision in the books. An allowance for Inventory is recognised for cases where the realisable value is estimated to be lower than the inventory carrying value. The inventory allowance is estimated taking into account various factors, including prevailing sales prices of inventory item and losses associated with excess obsolete / slow-moving / redundant inventory items. The Company has, based on these assessments, made adequate provision in the books.

Stores and spares which do not meet the definition of Property, plant and equipment are accounted as inventories.

k. Retirement and other employee benefits

Employee benefits include provident fund, gratuity, pension, compensated absences and other termination benefits.

i. Defined contribution plans

Employee defined contribution plans include Provident Fund, Employee state insurance.

Provident Fund and Employee State Insurance:

All employees of the Company receive benefits from Provident Fund and Employee's State Insurance (where applicable), which are defined contribution plans. Both, the employee and the Company make monthly contributions to the plan, each equalling to a specified percentage of employee's basic salary. The Company has no further obligations under the plan beyond its monthly contributions. The Company contributes to the Employee Provident Fund and Employee's State Insurance (where applicable) scheme maintained by the Central Government of India and the contribution thereof is charged to the Statement of Profit and Loss in the year in which the services are rendered by the employees.

ii. Defined benefit plans

The Company operates two defined benefit plans for its employees, viz., gratuity and pension. For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in the Statement of profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Defined benefit costs are categorised as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);

- Net interest expense or income; and
- Remeasurement comprising actuarial gains or losses and return on plan assets (excluding amounts included in net interest on the net defined benefit liability).

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs. The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

The Company makes contribution to a scheme administered by the insurer to discharge gratuity liabilities to the employees. Short-term employee benefits: A liability is recognised for benefits accruing to employees in respect of wages and salaries in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service. The Company has funded this with Life Insurance Corporation of India ('LIC').

iii. Other employee benefits

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The Company recognizes expected cost of short-term employee benefit as an expense, when an employee renders the related service.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the period-end. Remeasurements as a result of experience

adjustments and changes in actuarial assumptions are recognized in statement of profit and loss. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

i. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement. Provisions are determined based on the best estimate required to settle the obligation at the balance sheet date and measured using the present value of cash flows estimated to settle the present obligations (when the effect of time value of money is material). These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

m. Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability. The Company does not recognize a contingent liability but discloses its existence in the financial statements, contingent assets are only disclosed when it is probable that has economic benefits will flow to the entity.

n. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instruments.

i. Financial Assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification of financial assets:

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the Company may make the following irrevocable election / designation at initial recognition of a financial asset:

- the Company may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met (see (iii) below); and

- the Company may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (see (iv) below). All other financial assets are subsequently measured at fair value."

(i) Amortised cost and effective interest method:

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost and at FVTOCI. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the

financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

For purchased or originated credit-impaired financial assets, the Company recognises interest income by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.

Interest income is recognised in profit or loss and is included in the 'Other income' line item.

(ii) Debt instruments classified as at FVTOCI:

The debt instruments are initially measured at fair value plus transaction costs.

Subsequently, changes in the carrying amount of these debt instruments as a result of foreign exchange gains and losses (see below), impairment gains or losses (see below), and interest income calculated using the effective interest method (see (i) above) are recognised in profit or loss. The amounts that are recognised in profit or loss are the same as the amounts that would have been recognised in profit or loss if these debt instruments had been measured at amortised cost. All other changes in the carrying amount of these debt instruments are recognised in other comprehensive income and accumulated in a separate component of equity. When these debt instruments are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.

Equity instruments designated as at FVTOCI:

On initial recognition, the Company may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading:

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs.

Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive

income and accumulated in a separate component of equity. The cumulative gain or loss is not reclassified to profit or loss on disposal of the equity investments, instead, it is transferred to retained earnings.

Dividends on these investments in equity instruments are recognised in profit or loss in accordance with Ind AS 109, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the 'Other income' line item in profit or loss.

The Company designates all investments in equity instruments that are not held for trading as at FVTOCI on initial recognition.

A financial asset is held for trading if:

- It has been acquired principally for the purpose of selling it in the near term; or
- On initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking;

(iv) Financial assets at fair value through profit or loss (FVTPL):

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI (see (i) to (iii) above) are measured at FVTPL. Specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Company designates an equity investment that is neither held for trading (see (iii) above).
- Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria (see (i) and (ii) above) are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency (so called 'accounting mismatch') that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instruments as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit

or loss includes any dividend or interest earned on the financial asset and is included in the 'other income' line item.

Foreign exchange gains and losses:

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically:

- for financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'other income' line item ;
- for debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss in the 'other income' line item. As the foreign currency element recognised in profit or loss is the same as if it was measured at amortised cost, the residual foreign currency element based on the translation of the carrying amount (at fair value) is recognised in other comprehensive income in a separate component of equity;
- for financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'other income' line item as part of the fair value gain or loss; and
- for equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in a separate component of equity.

Impairment of financial assets:

The Company recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI, lease receivables, trade receivables and contract assets, financial guarantee contracts, and certain other financial assets measured at amortised cost such as deferred consideration receivable on disposal of subsidiaries. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the

difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months. For trade receivables, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient method as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

De-recognition of financial assets:

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the

financial asset and also recognises a collateralized borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in a separate component of equity is reclassified to profit or loss. In contrast, on derecognition of an investment in an equity instrument which the Company has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in a separate component of equity is not reclassified to profit or loss, but is transferred to retained earnings."

Financial liabilities and equity instruments

Classification as debt or equity:

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments:

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs. Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, and financial guarantee contracts issued by the Company, are measured in accordance with the specific accounting policies set out below.

Financial Liabilities at FVTPL:

Financial liabilities are classified as at FVTPL when the financial liability is (i) held for trading or (ii) it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been acquired principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- or the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the grouping is provided internally on that basis;

Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on changes in fair value recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other income' line item in profit or loss.

However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are recognised in retained earnings. Gains or losses on financial guarantee contracts issued by the Company that are designated by the Company as at FVTPL are recognised in profit or loss.

Financial liabilities subsequently measured at amortised cost:

Financial liabilities that are not held-for-trading or designated as at FVTPL, are measured

subsequently at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Foreign exchange gains and losses:

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. These foreign exchange gains and losses are recognised in the 'other income' line item in profit or loss for financial liabilities.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss for financial liabilities.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

When the Company exchanges with the existing lender one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, the Company accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective rate is at least 10 per cent

ESAB INDIA LIMITED

different from the discounted present value of the remaining cash flows of the original financial liability. If the modification is not substantial, the difference between: (1) the carrying amount of the liability before the modification; and (2) the present value of the cash flows after modification is recognised in profit or loss as the modification gain or loss within 'other income'.

(iii) Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets.

Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Original classification	Revised classification	Accounting treatment
Amortised cost	FVTPL	Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.
FVTPL	Amortised Cost	Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.
Amortised cost	FVTOCI	Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.
FVTOCI	Amortised cost	Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost.
FVTPL	FVTOCI	Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.
FVTOCI	FVTPL	Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o. Cash and cash equivalents

Cash comprises of cash on hand and demand deposits with banks. Cash Equivalents are short term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash which are subject to an insignificant risk of changes in value. Bank balances other than the balance included in cash and cash equivalents represents balance on account of unpaid dividend and margin money deposit with banks.

p. Dividend

Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Board of Directors of the Company. The Company declares and pays dividends in Indian rupees and are subject to applicable taxes

q. Cash Flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) after tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

r. Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

t. Leases

The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (1) the contract involves the use of an identified asset (2) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (3) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases.

For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs. Refer to the accounting policies in section (i) impairment of non financial assets.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of the leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

Short-term leases

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date

ESAB INDIA LIMITED

and do not contain a purchase option). Lease payments on short-term leases are recognised as expense on a straight-line basis over the lease term.

u. Segment reporting

Operating segments reflect the Company's management structure and the way the financial information is regularly reviewed by the Company's Chief operating decision maker (CODM). The CEO of the company has been identified as the Chief Operating Decision Maker (CODM) as defined by Ind AS 108, Operating Segments. The CODM considers the business from both business and product perspective based on the dominant source, nature of risks and returns and the internal organisation and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit / (loss) amounts are evaluated regularly by the CODM in deciding how to allocate resources and in assessing performance.

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment

liabilities have been identified to segments on the basis of their relationship to the operating activities of the segment.

Inter-segment revenue, where applicable, is accounted on the basis of transactions which are primarily determined based on market / fair value factors.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under "unallocated revenue / expenses / assets / liabilities".

v. Provision for Warranty

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidence based on corrective actions on product failures. The timing of outflows will vary as and when warranty claim will arise.

Standards notified but not yet effective

There are no standards that are notified and not yet effective as on the date.

ESAB INDIA LIMITED

Nature and purpose of reserves

Securities Premium

Securities premium is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes such as issuance of bonus shares in accordance with the provisions of the Companies Act, 2013.

Capital reserve

A scheme of amalgamation of Maharashtra Weldaids Limited (MWL) with the Company, with effect from April 1, 1992, became effective on February 18, 1994. Accordingly, the results of MWL have been incorporated in the results of the Company in the financial year ended March 31, 1994. On amalgamation the assets, liabilities and reserves of MWL have been incorporated at that Company's book values and the net difference between such values and the net consideration is accounted for as Capital reserve.

General reserve

Under the erstwhile Companies Act 1956, general reserve was created through an annual transfer of net income at a specified percentage in accordance with applicable regulations. The purpose of these transfers was to ensure that if a dividend distribution in a given year is more than 10% of the paid-up capital of the Company for that year, then the total dividend distribution is less than the total distributable results for that year. Consequent to introduction of Companies Act 2013, the requirement to mandatorily transfer a specified percentage of the net profit to general reserve has been withdrawn. However, the amount previously transferred to the general reserve can be utilised only in accordance with the specific requirements of Companies Act, 2013.

Retained Earnings

Retained earnings are the profits / (loss) that the Company has earned/incurred till date, less any transfers to general reserve, dividends or other distributions paid to shareholders. Retained earnings include re-measurement loss / (gain) on defined benefit plans, net of taxes that will not be reclassified to Statement of Profit and Loss.

30. Earnings per share (EPS)

Basic EPS amounts are calculated by dividing the profit for the year attributable to equity holders by the weighted average number of Equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit attributable to equity holders by the weighted average number of Equity shares outstanding during the year plus the weighted average number of Equity shares that would be issued on conversion of all the dilutive potential Equity shares into Equity shares.

The following reflects the income and share data used in the basic and diluted EPS computations:

	31-Mar-25	31-Mar-24
Profit for the year	17,542	16,298
Weighted average number of Equity shares for EPS	1,53,93,020	1,53,93,020
Basic and Diluted earnings per share (₹)	113.98	105.90

There have been no other transactions involving equity shares or potential equity shares between the reporting date and the date of authorisation of these financial statements.

31. Significant accounting judgements, estimates and assumptions

The preparation of the Company's Financial Statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Company's exposure to risks and uncertainties includes:

- Financial risk management objectives and policies Note 39
- Capital management Note 40

Judgements

In the process of applying the Company's accounting policies, management has not made any judgement, which has significant effect on the amounts recognised in the Financial Statements.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Provision for expected credit losses of trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns. The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical

ESAB INDIA LIMITED

credit loss experience with forward-looking information. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed. The information about the ECLs on the Company's trade receivables is disclosed in Note 8.

Allowances for slow / Non-moving Inventory and obsolescence:

An allowance for Inventory is recognised for cases where the realisable value is estimated to be lower than the inventory carrying value. The inventory allowance is estimated taking into account various factors, including prevailing sales prices of inventory item and losses associated with obsolete / slow-moving / redundant inventory items. The Company has, based on these assessments, made adequate provision in the books.

Deferred income taxes

The Company's tax expense for the year is the sum of the total current and deferred tax charges. The calculation of the total tax expense necessarily involves a degree of estimation and judgement in respect of certain items. A deferred tax asset is recognised when it has become probable that future taxable profit will allow the deferred tax asset to be recovered. Recognition, therefore involves judgement regarding the prudent forecasting of future taxable gains and profits of the business.

Defined benefit plans

The cost of the defined benefit plan and other post-employment benefits and the present value of the obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. Further details about defined benefit obligations are given in Note 33.

A. Gratuity plan

The Company has a defined benefit gratuity plan for employees which requires contributions to be made to a separately administered fund. The gratuity plan is governed by the Payment of Gratuity Act, 1972 ("Act"). Under the Act, every employee who has completed five years or more of service is entitled to this Gratuity payment, on departure, of 15 days' salary (last drawn salary) for each completed year of service subject to a maximum of Rs. 20 lakhs. The Company has established a trust to setup an employee group gratuity scheme for providing gratuity benefits to eligible employees as per the rules of the scheme. The gratuity scheme is funded with Life Insurance Corporation of India ("LIC") for the purpose of providing gratuity benefits to its employees. The Trust is administered by the Board of Trustees, which is responsible for the administration of the plan assets. The present value of the defined benefit obligation, and the related current service cost, were measured using the projected unit credit method.

35. Leases

The Company has lease contracts for lease hold lands, lease hold premises and vehicles used in its operations. Leasehold lands generally have lease terms between 15 and 99 years, lease hold premises and motor vehicles have lease terms between 2 and 5 years. The Company's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Company is restricted from assigning and subleasing the leased assets.

The Company also has leases of premises with lease terms of 12 months or less. The Company applies the 'short-term lease' recognition exemptions for these leases.

Set out below are the carrying amounts of right-of-use assets recognised and the movements during the period:

Terms and conditions of transactions with related parties

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and interest free and settlement occurs in cash. There have been no guarantees provided or received for any related party receivables or payables. For the year ended March 31, 2025, the Company has not recorded any impairment of receivables relating to amounts owed by related parties (March 31, 2024: Nil). This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

37. Fair value hierarchy related disclosures

This note provides information about how the company determines fair values of various financial assets and liabilities

(i) Fair value of the Company's Financial assets and liabilities that are measured at fair value on a recurring basis

Particulars	Fair Value as at		
	31-Mar-25	31-Mar-24	Fair Value Hierarchy
Financial Assets			
Investment in Quoted Mutual Funds	2,311	-	Level 1
Investment in Unquoted Equity Shares	61	44	Level 3

The investment in unquoted equity shares (Level 3 in the fair value hierarchy) of the company consists of third party power companies invested at face value as per statutory requirements.

There have been no transfers between the level 1, level 2 and level 3 during the period.

In determining fair value measurement, the impact of potential climate-related matters, including legislation, which may affect the fair value measurement of assets and liabilities in the financial statements has been considered. At present, the impact of climate-related matters is not material to the Company's financial statements.

38. Fair values

The management considers that the carrying amounts of financial assets and financial liabilities recognised in the financial statements approximate their fair values. Refer note 41 for the value of all financial instruments

39. Major Financial risk management objectives

The Company is exposed to certain financial risks that could have significant influence on the Company's business and operational/ financial performance. These include market risk (including commodity price risk, currency risk and interest rate risk), credit risk and liquidity risk.

The Management reviews and approves risk management framework and policies for managing these risks and monitor suitable mitigating actions taken by the management to minimise potential adverse effects and achieve greater predictability to earnings.

In line with the overall risk management framework and policies, the treasury function provides services to the business, monitors and manages through an analysis of the exposures by degree and magnitude of risks. The Company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: commodity price risk, currency risk and interest rate risk.

Commodity Price Risk

The Company is exposed to commodity price risks primarily on Steel and Minerals. Price and supply disruptions arising from geopolitical and other developments could affect the Company's financial assets, profitability and future cash flows. The Company reviews its commercial arrangements with suppliers and customers at periodic intervals to adapt to changes arising from commodity price and availability risks.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities like import of raw materials, components and capital goods from outside India, incurs few expenditure as well as make export sales to countries outside India.

Unhedged foreign currency

The carrying amounts in Indian Rupees of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

As on March 31, 2025:

Particulars	Gross exposure	Exposure hedged	Net liability exposure on the currency
Impact of USD exposure	732	–	732
Impact of EURO exposure	(1,770)	–	(1,770)
Impact of other exposures	49	–	49
Net overall exposure - net assets / (net liabilities)	(989)	–	(989)

As on March 31, 2024:

Particulars	Gross exposure	Exposure hedged	Net liability exposure on the currency
Impact of USD exposure	(906)	–	(906)
Impact of EURO exposure	(605)	–	(605)
Impact of other exposures	(31)	–	(31)
Net overall exposure - net assets / (net liabilities)	(1,542)	–	(1,542)

Foreign currency sensitivity analysis:

The following tables demonstrate the sensitivity to 5% appreciation in USD and EURO exchange rates on foreign currency exposures as at the year end, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities. The Company's exposure to foreign currency changes for all other currencies is not material.

Nature	As at	Increase / (Decrease) in PBT for change in USD rates	Increase / (Decrease) in Equity for change in USD rates	Increase / (Decrease) in PBT for change in EURO rates	Increase / (Decrease) in Equity for change in EURO rates
Receivables	31-Mar-25	210	210	1	1
Payables		(173)	(173)	(88)	(88)
Receivables	31-Mar-24	118	118	8	8
Payables		(163)	(163)	(39)	(39)

Forward Exchange Contracts

There are no forward foreign exchange contracts outstanding as at 31 March 2025.

Interest rate risk

The Company is not exposed to interest rate risk because there are no borrowings.

Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions. The Company has adopted a policy of dealing only with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults.

Trade receivables consist of a large number of customers, spread across India. Ongoing credit evaluation is performed on the financial condition of accounts receivable.

a. Trade receivables

Customer credit risk is managed by the company subject to the Company's established policy, procedures and control relating to customer credit risk management.

An impairment analysis is performed at each reporting date using a provision matrix based on transaction date to measure expected credit losses. The calculation reflects the probability-weighted outcome and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in Note 41. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

b. Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company's treasury department in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company's Board of Directors on an annual basis and may be updated throughout the year subject to approval of the Company's Finance Committee. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

The Company invests only on quoted liquid mutual funds with very low credit risk, which are classified under fair value through profit and loss. The Company's maximum exposure to credit risk for the components of the balance sheet at 31 March 2025 and 31 March 2024 is the carrying amounts as illustrated in Note 7.

Liquidity risk

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The Company manages liquidity risk by maintaining sufficient cash and cash equivalents including bank deposits and availability of funding through an adequate amount of committed credit facilities to meet the obligations when due.
