IIP growth hits 26-month high of 7.8% in Dec

KULDEEP SINGH
New Delhi, January 28

INDIA'S FACTORY OUTPUT recorded strong growth for the second consecutive month in December, with the Index of Industrial Production (IIP) rising 7.8% year-on-year (y-o-y), on the back of healthy consumer demand and strong manufacturing performance, according to government data released on Wednesday.

The output has been on an upward trajectory for the second straight month, recovering from a 14-month low of 0.5% in October. November IIP growth was revised upward to 7.2%.

In December 2024, the IIP had grown by 3.7%.

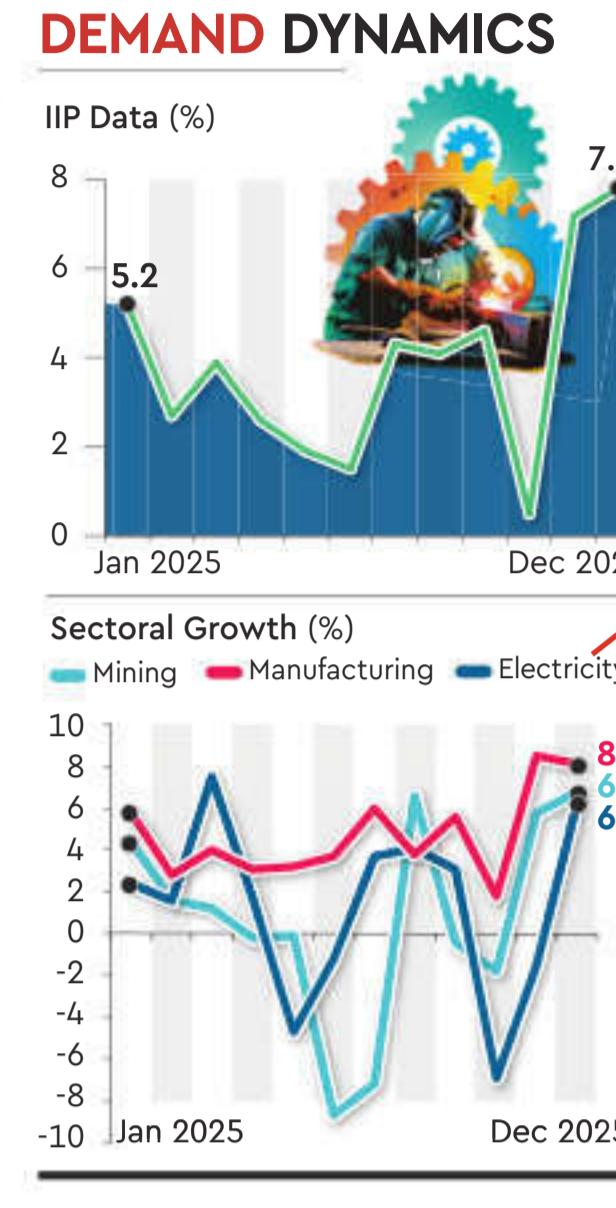

Growth in IIP in December was driven by an across-the-board surge in manufacturing (8.1%), mining (6.8%) and electricity (6.3%), the Ministry of Statistics and Programme Implementation (MoSPI) said. Within manufacturing, the highest-growth industries included "computer, electronic and optical products (34.9%)", "motor vehicles, trailers and semi-trailers (33.5%)" and "other transport equipment (25.1%)". The electricity sector posted healthy expansion after contracting in October and November.

Madan Sabnavis, chief economist at Bank of Baroda, attributed the growth to visible effects from Goods and Services Tax (GST) rate rationalisation boosting consumer goods, alongside infrastructure investment reflecting in capital goods. He forecast full-year IIP growth at 4.5-5%.

Aditi Nayar, chief economist at ICRA, noted that the surprise largely stemmed from manufacturing output, likely supported by post-festive restocking, despite sluggish non-oil exports in the month.

On the demand side, consumer durables output accelerated 12.3% y-o-y and consumer non-durables 8.3% y-o-y. Capital goods rose 8.1% (vs 10.5% a year earlier), intermediate goods 7.5% (vs 6.4%), infrastructure/construction goods 12.1% (vs 8.4%), and primary goods a modest 4.4% (vs 3.8%).

Paras Jasrai, economist at India Ratings, highlighted that consumer non-durables growth was the highest in 26 months. "High consumer non-durable growth post-festive season (at a 13-month high) suggests inventories with

wholesalers and manufacturers have depleted, and manufacturers anticipate sustained demand," he said, adding that that the figures provide anecdotal evidence of GST rate rationalisation stimulating economic demand.

Economists noted that factory output touched a six-quarter high of 5.2% y-o-y in Q3 FY26 (October-December 2025), up from 4.3% in Q2.

"IIP growth accelerated to a six-quarter high of 5.2% in Q3 FY26 from 4.3% in Q2, reflecting improved performance in manufacturing and mining sectors," Nayar said. This bodes well for industrial gross value added (GVA) growth in the quarter.

Experts expect IIP growth to moderate to 6-7% in January, partly due to a higher base effect.

Dipti Deshpande, principal economist at Crisil, said domestic tailwinds should continue supporting consumer segments for a few more quarters, though higher US tariffs could increasingly weigh on export-oriented segments. "A trade deal with the US, bringing tariffs closer to levels faced by peers, could mitigate the impact," Deshpande added.

Govt mulls seasonal adjustment of IIP data

THE MINISTRY OF Statistics and Programme Implementation (MoSPI) has released a discussion paper proposing seasonal adjustment of the Index of Industrial Production (IIP) to mitigate the distorting effects of moving festivals and other calendar variations on monthly data.

The adjustment aims to remove predictable seasonal and calendar effects, allowing for a more accurate assessment of underlying trends in industrial activity, the ministry stated.

Until now, the National Statistics Office (NSO) under MoSPI has released only the unadjusted (original) monthly IIP, which tracks changes in output across the mining, manufacturing, and electricity sectors.

As part of the ongoing base year revision exercise for the IIP, shifting from 2011-12 to 2022-23, with the new series scheduled for release in May, MoSPI is revisiting methodologies, incorporating new data sources, and consulting stakeholders.

MoSPI on Wednesday released Discussion Paper 3.0: Seasonal Adjustment of Index of Industrial Production. The discussion paper highlights that high-frequency data like IIP are often distorted by seasonality, including India's unique moving festivals (Diwali, Holi, Dussehra, Id-ul-Fitr, etc) that shift across Gregorian months due to lunar cycles.

The influence of these moving holidays can include the loss of working days and changes in economic and social behavior, the discussion paper reads.

Many official statistical agencies are now disseminating seasonally adjusted IIP series in light of increasing demand for such data and explicit recommendations from multilateral institutions. Therefore, the issue was deliberated at length in the Technical Advisory Committee for Base Year Revision of All-India Index of Industrial Production (TAC-IIP), the discussion paper reads.

India comes out on top in trade pact with EU: Greer

FE BUREAU
New Delhi, January 28

THE US, WHICH was eyeing a quick trade deal with India but could not find a common ground, in its first comments on the India-EU Free Trade Agreement (FTA) has said that India has emerged as the winner.

"I think India comes out on top on this, frankly. They get more market access in Europe. It sounds like they have some additional immigration rights. I don't know for sure, but President (Ursula) von der Leyen of the EU has talked about mobility for Indian workers into Europe. So I think on the net, India's going to have a heyday with this. They have low-cost labour," US Trade Representative Jamieson Greer said in an interview with *Fox Business*.

US Trade Representative Jamieson Greer

Trade Representative (USTR) Jamieson Greer said in an interview with *Fox Business*.

The FTA signed on Tuesday has drawn attention all over the world and has been seen as an example of the emergence of a multipolar trade world. With the US involved in tough

trade negotiations across the world and handing out tariff threats liberally, the countries are looking at partnerships beyond the US that would keep their international trade going.

Greer pointed to the contrasting approach of the US and EU, stating that Brussels is "doubling down on globalisation" when the US is trying to fix some of the "problems of globalisation".

"First of all, strategically, it's important to understand that because President (Donald) Trump has prioritised domestic production and essentially started charging a fee for other countries to access our market, these countries are trying to find other outlets for their overproduction," Greer said.

EU FTA preserves India's gains: Govt to protect the benefits of the free trade agreement (FTA) from any regulations that the European Union may come up with, both sides have agreed to Rapid Response Mechanism (RRM) in the deal finalised on Tuesday.

Both sides have agreed to establish a mechanism to address concerns arising from measures and regulations that create significant disruption in trade, a senior official said. FE BUREAU

NOTICE TO THE MEMBERS

This is to inform that the Board of Directors of the Company at its meeting held on 23 January 2026 has declared an Interim Dividend (Dividend) of Rs. 3.50 per Equity Share having Nominal Value of Rs. 2/- each (i.e. 175 percent) for the financial year 2025-2026 and has fixed the Record Date as Friday, 30 January 2026 for determining eligibility of members to receive dividend and the dividend will be paid on or before 21 February 2026.

In accordance with the provisions of the Income Tax Act, 1961 (the Act) as amended from time to time, dividend declared and paid by a company is taxable in the hands of shareholders and the company is required to deduct tax at source (TDS) from dividend paid to the shareholders at the applicable rates. We shall therefore be required to deduct tax at source at the time of making the payment of the said dividend.

Tax rate applicable to a shareholder depends upon residential status and classification as per the provisions of the Act. All shareholders are thereby requested to update any change in residential status and/or category with depository participants (in case of shares held in electronic form) or with the Registrar and Share Transfer Agent (RTA), i.e. MUFG Intime India Private Limited (in case of shares held in physical form), as may be applicable, before the Cut-off date i.e. 30 January 2026.

A detailed communication explaining the process on withholding tax on dividend paid to the members at prescribed rates along with the necessary annexures and guidance on updating PAN/ bank account details has been sent by the Company to all those members whose email ID's are registered with the Depositories/ RTA.

Application forms for claiming Nil or less rate of TDS by Resident Shareholders [such as Form 15G / Form 15H in case of individuals and self-declaration by entities] and by Non Resident Shareholders [such as Form 10F and self-declaration] can be downloaded from the website of the RTA at [https://web.in.mpmgs.mufg.com/formsreg/submit-form-15g-1](https://web.in.mpmgs.mufg.com/formsreg/submit-form-15g-15h.html)
