# Ve i g l Flux Cored Wire

## Overview

- Flux Core Arc Welding is a type of welding process using consumable electrode that contains flux around it
- Flux melts together with the electrode during the welding process and shields the joint
- Presently, India has little to none manufacturing capacity for this product range
- Its needs are met from imports, predominantly from China, thus offering an import substitution opportunity

## Applications

- Fabrication workshops
- Shipbuilding industry
- Construction activities
- Mechanical industries
- Usable on plain, carbon, alloy, stainless as well as duplex steel
- Used for hardfacing and surfacing

## Import Substitution Opportunity

2008

- Commenced production of Aluminium flipping coils with its first mill built in-house

2017

- Raised funds through its initial public offer and got listed on BSE SME

2022

- Crossed 450+ crores topline benchmark

2002

- In efforts to cater to the growing metallurgical industry in the country, commenced its first cored wire mill built in-house

2012

- Started manufacturing cored wire feeder machines

2018

- Started producing Aluminium wire rods (backward integration for flipping coils)

## Cored Wires

- Cored Wires are a product of wire injection technology of steels. They consist of steel tubes (wires) filled with various alloys that are injected in molten metal for introducing different characteristic in the metal.
- Some key cored wires manufactured by Sarthak are – Calcium Silicide, Calcium Iron, Calcium Aluminium Iron, Calcium Solid Wire, Lead Cored Wire, Ferro Titanium, Carbon, Ferro Boron, Magnesium Ferrosilicon, Nitride Manganese, Ferro Niobium.
- Key functions of cored wires is steel refining, alloy addition, deoxidation, desulphurization, denitrification, etc.

### Why cored wires?

Cored wires (or wire injection technology) are a substitute to single-shot addition of alloys into molten metal. Cored wire helps in uniform and homogeneous mixing of alloys in the ladle. It is a more accurate and efficient process of adding chemical elements in the casting. Cored wires have become a indispensable part of metallurgical plants today.

## Aluminium Flipping Coils

- Aluminium flipping coils are used in steel manufacturing process for de-oxidising of molten steel, and as a alloying element for manufacturing specialized steel.
- Key function of Aluminium wire is de-oxidising, grain refining, nitride forming and alloying of steel.

## Wire Feeder Machines

- Machines that are designed to inject cored wires into molten steel for metallurgical process control. The Company offers a wide range of customized machines, with 2 and 4 strand options that can draw wires from 5 to 15 mm diameter with a speed of up to 300 meters per minute.

# I f a c e

- The Company has two state-of-the-art manufacturing facilities in Bhilai, Chhattisgarh
- Strategically located in proximity to many clients
- Cumulative ~2,50,000 sq. ft. plot area, with land availability for future expansions
- 4 lines for manufacturing cored wires and 2 lines for Aluminium flipping coils, built in-house specific to the Company's needs
- Equipped with sophisticated machinery and testing equipment's
- ISO 9001:2008 certified unit
- Equipped with a fully-functional chemical lab, and atomic absorption spectrophotometer for testing and QC of raw materials & finished products
