PRESS RELEASE

STL delivers Cloud-Native OSS/BSS Solution Powered by Microsoft Azure

Pune, India – 29 July 2021: STL [NSE: STLTECH], an industry leading integrator of digital networks, will provide cloud-native OSS/BSS solutions for telecom service providers, leveraging Microsoft Azure. This solution will give telcos the agility they need for building future-ready applications through its Digital BSS Platform.

The future-ready applications are highly scalable, agile and built on four technology confluences - **convergence** (of wired and wireless), **combination** (of connectivity, compute and storage), **disaggregation** (of standard hardware and open source software), and **edge compute** (bringing all capabilities to the network's edge). Given this, telcos are increasingly embracing cloud-native solutions. By partnering with Microsoft, STL expects to provide them access to a cloud-native and comprehensive app development ecosystem, flexible modular microservices and a hybrid cloud management system. STL is now an independent software vendor (ISV) partner of Microsoft.

Venkat Krishnan, Executive Director, Global Partner Solutions, Microsoft India, said, “Bringing the power of the Intelligent Cloud and the Intelligent Edge closer to the rapidly evolving needs of the telecommunications industry is helping future-proof organisations streamline their operations and create new business or service models. Powered by Microsoft Azure, STL’s platform gives telcos the agility they need to build next-gen applications. STL’s digital BSS portfolio is engineered for innovation at scale and

speed. We are confident that STL will help customers build secure, scalable, and reliable cloud solutions and create intelligent applications.”

Commenting on the collaboration, **Saiket Mitra, Chief Operating Officer,** STL Network Software, said, “STL believes in accelerated creation and monetisation of smart and secure cloud-native innovations. In our endeavor to provide customers with the right cloud leverage, we have been taking and use cases to the industry relentlessly. By partnering with Microsoft, we will add Microsoft Azure’s capabilities to our portfolio in order to actualize our customers' vision.”
