HCLTech recognized as a Leader in Avasant GCC Services 2025 RadarView™

NEW YORK and NOIDA, India, Aug 29, 2025—[HCLTech](#), a leading global technology company, has been named a Leader in the Avasant Global Competency Center (GCC) Services 2025 RadarView™ report.

The report highlights HCLTech's leadership in end-to-end GCC services, powered by GenAI, engineering excellence and deep domain expertise. With a technology-first, industry-centric delivery model and full-stack capabilities, HCLTech has helped establish 200+ GCCs across finance, HR, customer operations and advanced engineering.

"HCLTech delivers end-to-end GCC services with strong vertical focus," said Praveen Kona, Associate Research Director, Avasant. "Its global footprint spans India, Poland and the Philippines, with expansion into Tier II Indian cities via the New Vistas program. Investments in talent, IP and partnerships — including AWS, Google Cloud and other ecosystem players — have made HCLTech a Leader in our RadarView™."

According to the report, HCLTech's AI Labs serve as a strategic foundation for co-innovation and collaboration with clients and play an important role in advancing the company's GCC services. These AI Labs support over 400 clients and underpin 500+ ongoing GenAI projects. HCLTech's flagship AI and cloud offerings — [AI Force](#), [AI Foundry](#), [AI Labs](#) and AI Engineering — increase productivity and efficiency across industries. Through [eSTiP™](#) and academic partnerships, HCLTech strengthens its talent pipeline for GCCs.

"Our GCC Services leverage engineering expertise, AI-powered tools and deep industry expertise across the full lifecycle of services (Advise, Setup, Run and Optimize, Transform). These factors contributed to HCLTech being positioned as a Leader in Avasant RadarView™. We drive innovation, growth and value for GCCs in alignment with their organization goals as they transform into autonomous transformation hubs," said Kiran Cherukuri, Global GCC Practice Leader at HCLTech.
