Dear Sir / Madam,

Sub: Press Release - Tata Communications Launches AI-Ready Suite to Empower Enterprises

Please find attached herewith the press release on the captioned subject being issued today.

Kindly take the same on your records.

Thanking you,

Yours faithfully,
For Tata Communications Limited

Zubin Adil Patel
Company Secretary and Compliance Officer

Tata Communications Launches AI-Ready Suite to Empower Enterprises

Tata Communications IZO+™ Multi Cloud Network, Tata Communications Edge Distribution Platform and ThreadSpan™ are designed to connect, protect and provide control across enterprise digital environments

Mumbai, INDIA, January 30, 2026

Tata Communications, the leading global communications technology player, today unveiled an AI-ready suite of platforms and solutions designed to help organisations scale the adoption of artificial intelligence (AI) with confidence, control and clarity.

The suite comprises three independent, complementary offerings — Tata Communications IZO+™ Multi Cloud Network, Tata Communications Edge Distribution Platform, and ThreadSpan ™ — built on the company's digital fabric of solutions, that brings together network, cloud, cybersecurity and other offerings. The offerings aim to remove silos, simplify operations and embed trust across the digital continuum.

As AI moves from pilot projects to the core of business decision-making, enterprises are discovering a hard truth: yesterday's infrastructure was never built for today's AI ambitions.

AI is rapidly moving from experimentation to the mainstream, placing unprecedented pressure on digital foundations. But as AI workloads spread across clouds, edges and regions, organisations are finding themselves grappling with spiralling costs, unpredictable performance, security gaps and limited visibility.

Point solutions are proving insufficient. What enterprises need today is an infrastructure that is designed — end to end — for AI: flexible enough to scale, smart enough to optimise itself, and secure enough to be trusted with mission-critical data.

Tata Communications' AI-ready suite directly addresses these challenges — not in isolation, but as a cohesive platform. Together, they form an architectural foundation that will help enterprises navigate the complexity, cost and risk that come with deploying AI at scale.

Commenting on the release, **A.S. Lakshminarayanan, MD & CEO, Tata Communications, said**: "Digital infrastructure is becoming increasingly complex, and AI is amplifying that challenge. With our new suite of AI-ready offerings and our Digital Fabric, we are bringing together a secure, unified and intelligent foundation that simplifies how enterprises design and run their

digital environments. This enables our customers to reduce complexity, operate with confidence and focus their energy on innovation and scale AI securely."

These principles are embedded across Tata Communications' AI-ready suite of platforms that redefine how enterprises build and run distributed AI environments.

Tata Communications IZO+^{TM} Multi Cloud Network

In the age of distributed AI, connectivity is no longer a utility—it is a strategic advantage. As enterprises spread workloads across clouds, complexity and cost quickly become barriers to scale. Tata Communications IZO+^{TM} Multi Cloud Network removes that friction, giving organisations control over how data moves, performs and costs. Intelligent policy, built-in optimisation and a single view of performance make scaling AI simpler, faster and more predictable.

Tata Communications Edge Distribution Platform

Tata Communications' Edge Distribution Platform brings intelligence closer to where data is created, enabling faster responses and real-time digital experiences. By combining content delivery, security and compute at the edge, the platform reduces latency while ensuring enterprise applications remain protected and resilient. The integrated approach goes beyond faster delivery — it creates the foundation required to run real-time AI applications at global scale. The need is for platforms that deliver millisecond-level performance, protect AI models and APIs, and scale efficiently across regions.

ThreadSpan™

ThreadSpan™ brings clarity and control to complex digital environments by providing a unified, single-pane view across hybrid and multi-vendor networks. It combines visibility, manageability, security, and automation across network, cloud and security domains. Powered by AI-driven orchestration, it enables enterprises to enforce consistent policies, intelligent resource coordination and early identification of potential issues — shifting operations from reactive firefighting to proactive autonomy, improving security audit readiness and efficiency at scale.

By bringing connectivity, edge intelligence and predictive observability into a unified AI-ready ecosystem, Tata Communications is helping enterprises unlock real business value from AI, with infrastructure that is simpler to manage, faster to deploy and built for the demands of tomorrow.

Forward-looking and cautionary statements

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports.

The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
